Short-Term Forecast Discussion

- Dry weather is anticipated today
- Winds will continue to come offshore (out of the N), however decreasing through the day. The first half of the day features sustained winds 10-15 MPH with gusts locally higher, while the back half of the day will have sustained winds 8-13 MPH with a few isolated gusts to 15 MPH.
- Highs today look to reach the mid 40s across the area
 - *No fog is anticipated today.*

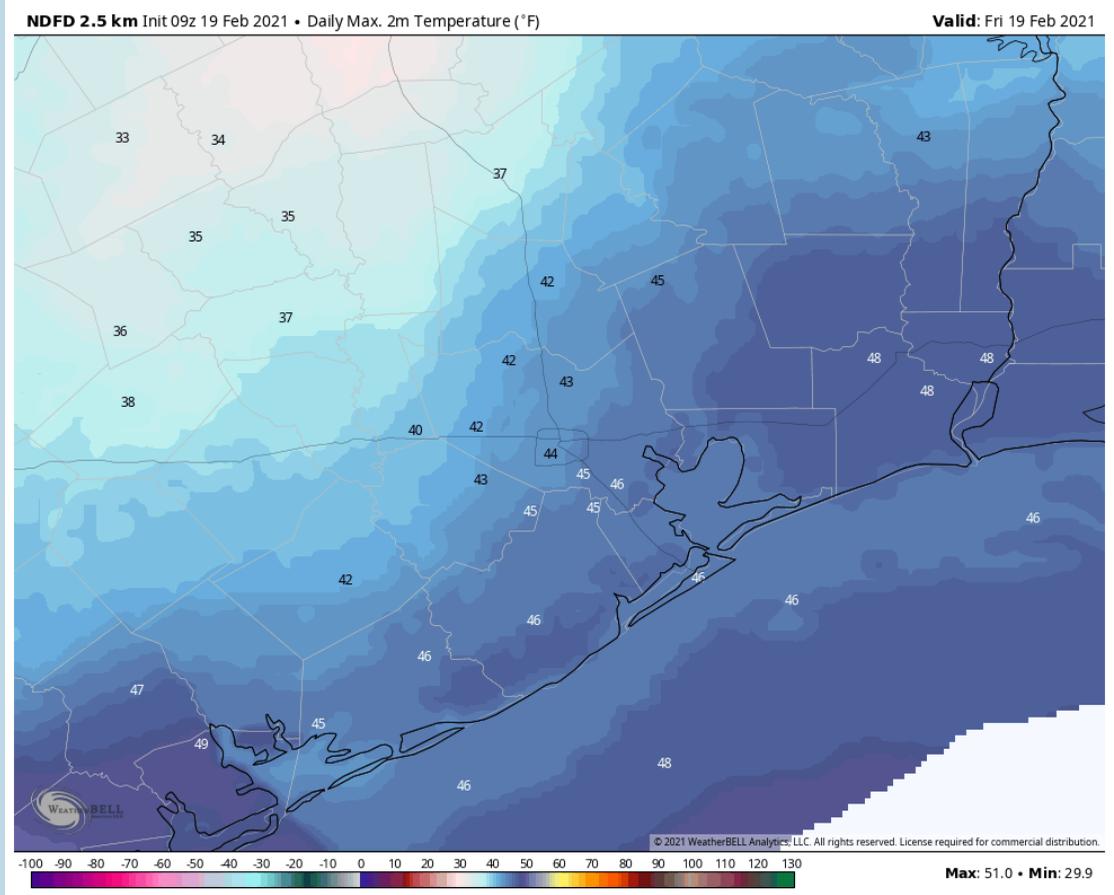

Sustained Winds (10 AM CT)

Simulated Radar Snapshot (12 PM CT)

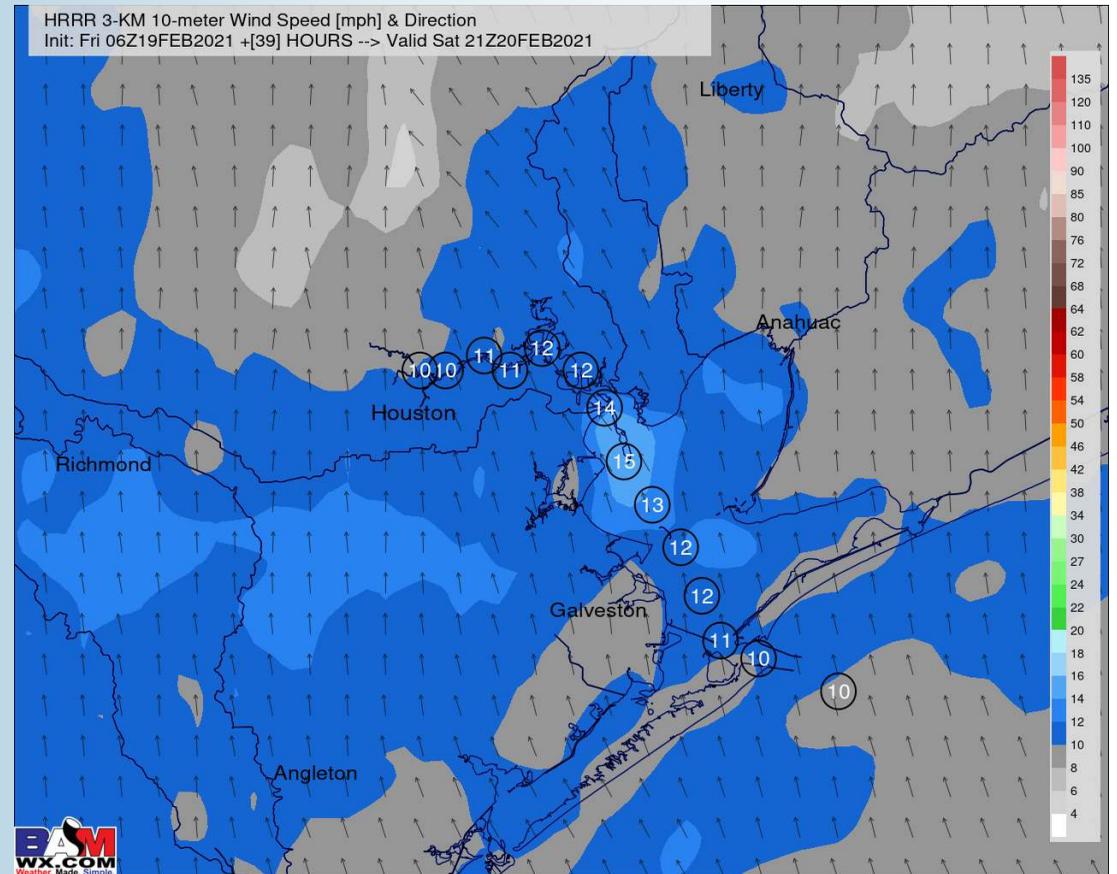

High Temperatures Friday

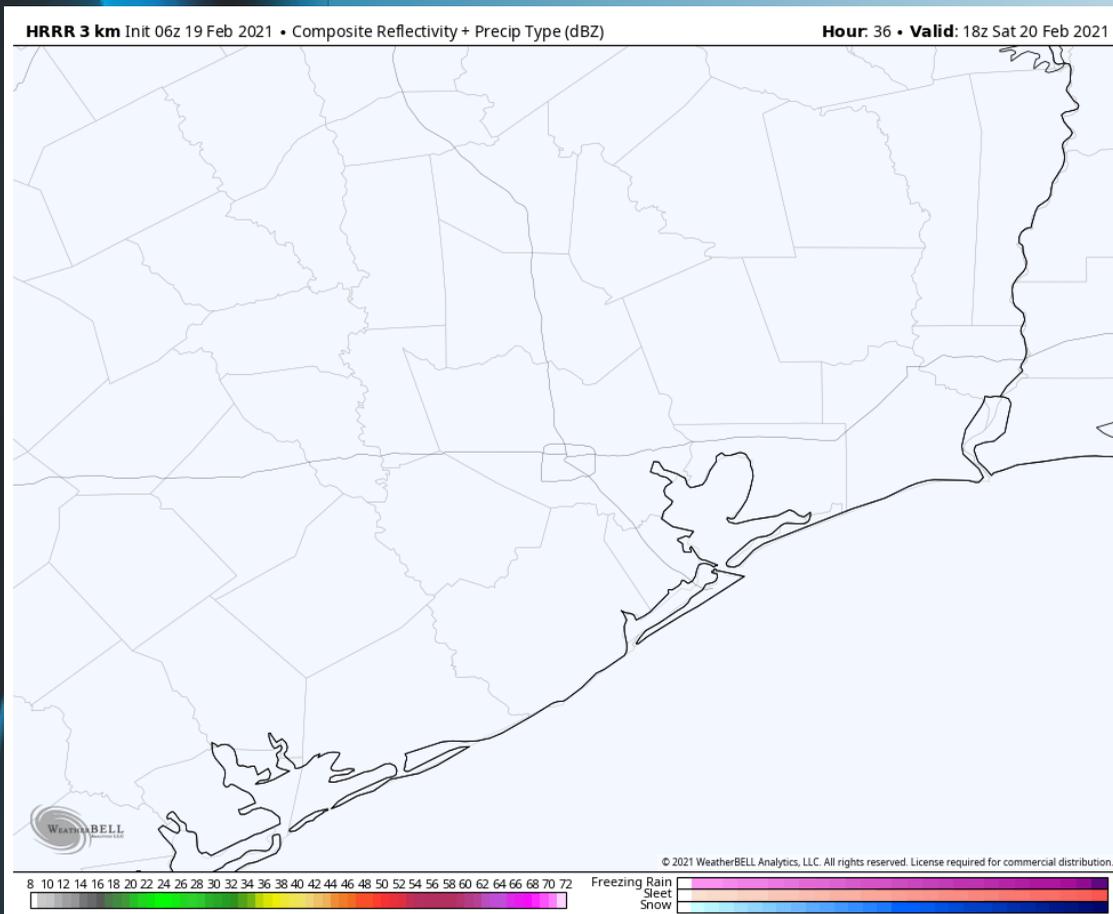

Short-Term Forecast Discussion

- Saturday is expected to be a quieter day
- Winds Sat AM will be very light. Winds will turn more more to the NE by ~8 AM and then more onshore (from SE) by ~11 AM at 8-13 MPH with gusts 13-18 MPH the first half of the day, sustained winds 10-15 MPH the back half of the day.
- Temps on Saturday are looking to push into the mid 50s.
- *A few pieces of guidance are trying to suggest fog Sat AM north of our stations, so we are currently not in favor of fog at this time for Sat.*

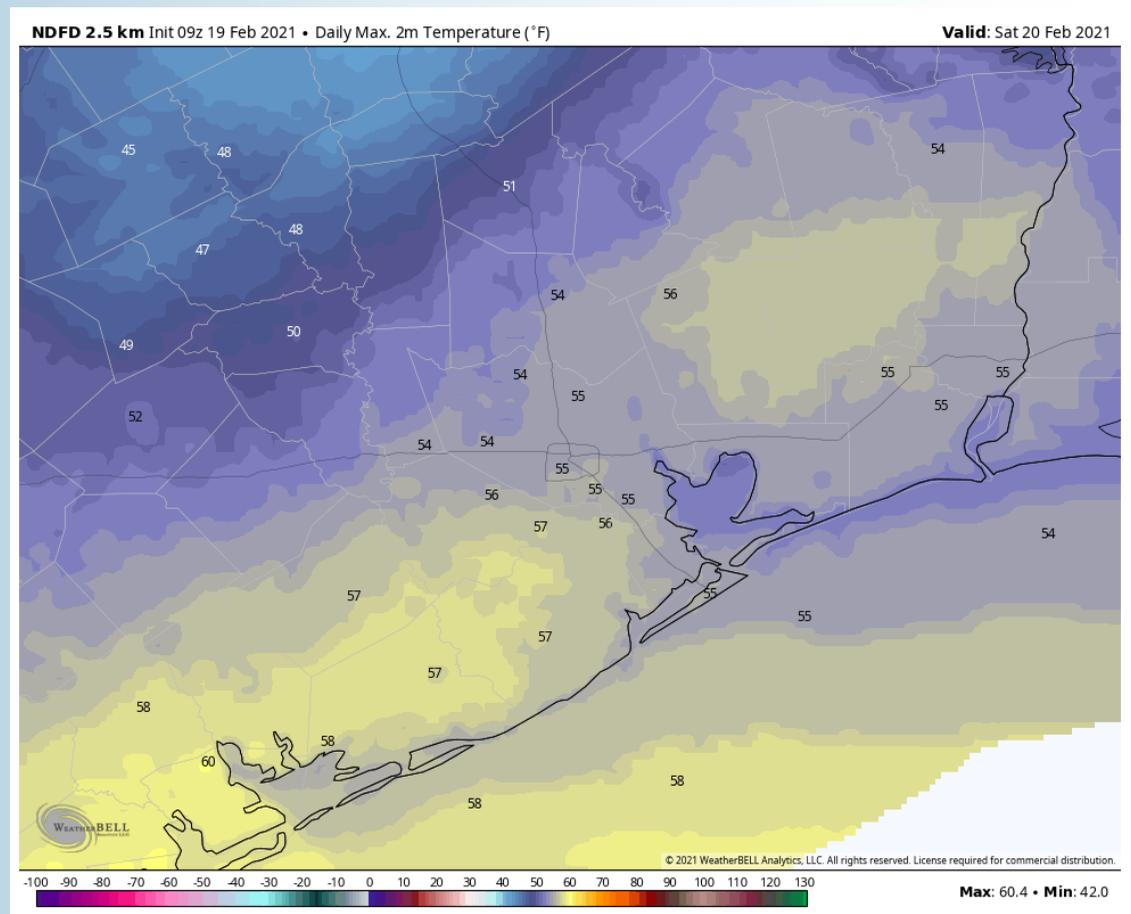

Sustained Winds (3 PM CT)

Simulated Radar Snapshot (12 PM CT)

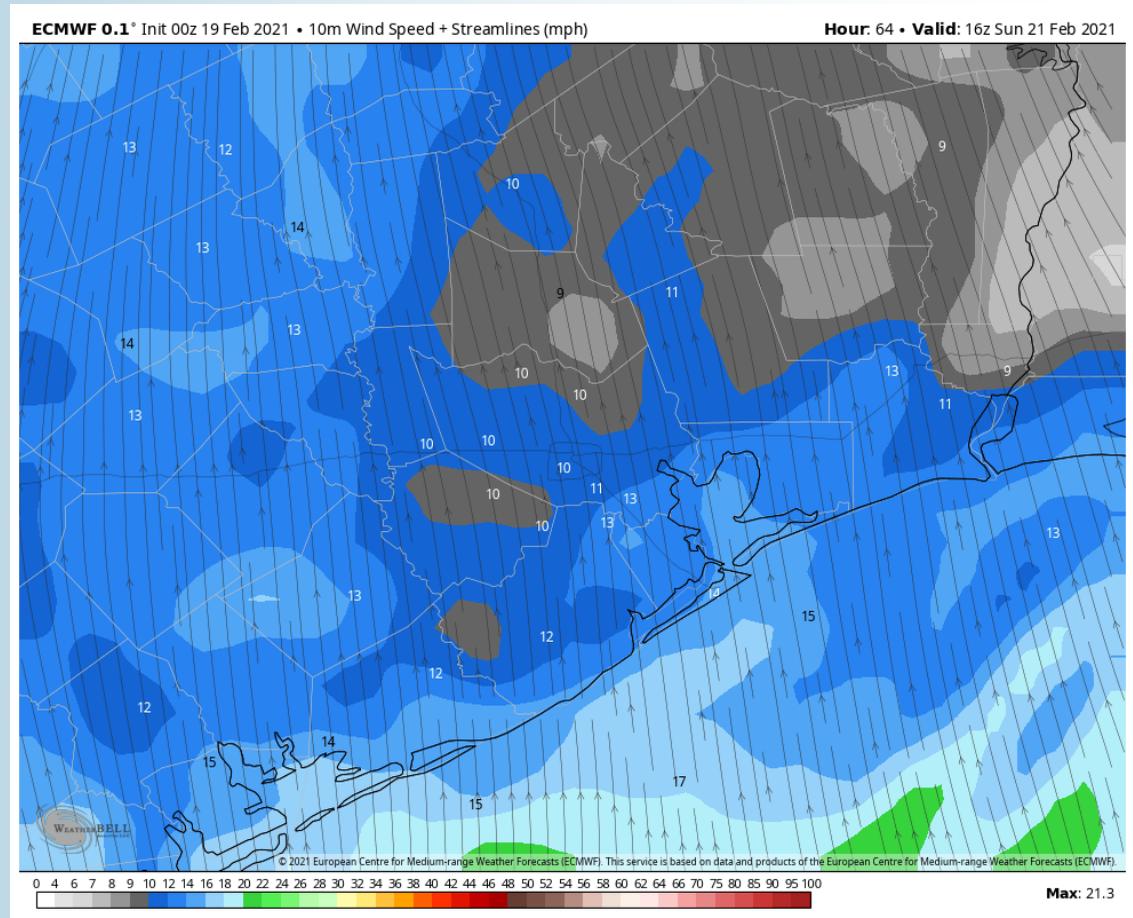

High Temperatures Saturday

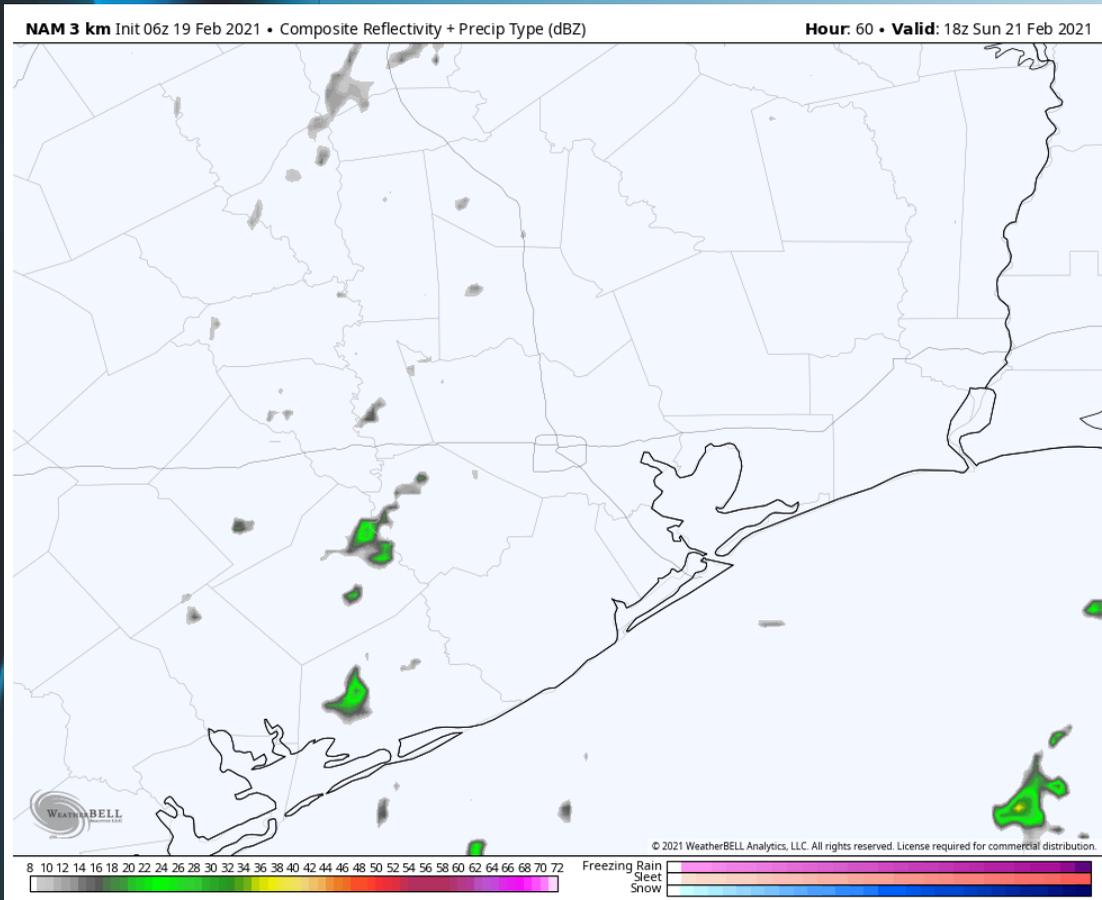

Short-Term Forecast Discussion

- Sunday should continue the quiet weather with any light showers staying away from the stations
- Winds will stay coming of the south with sustained winds 10-15 MPH with gusts 15-20 MPH. Winds with the upcoming cold front likely don't flip to the N until early Monday AM
- Highs on Sunday should climb back into the middle 60s
- *Sunday morning may have to be a period of *potential* fog to watch with warming temps and onshore winds. Guidance does not show fog, but it is something to watch nonetheless.*

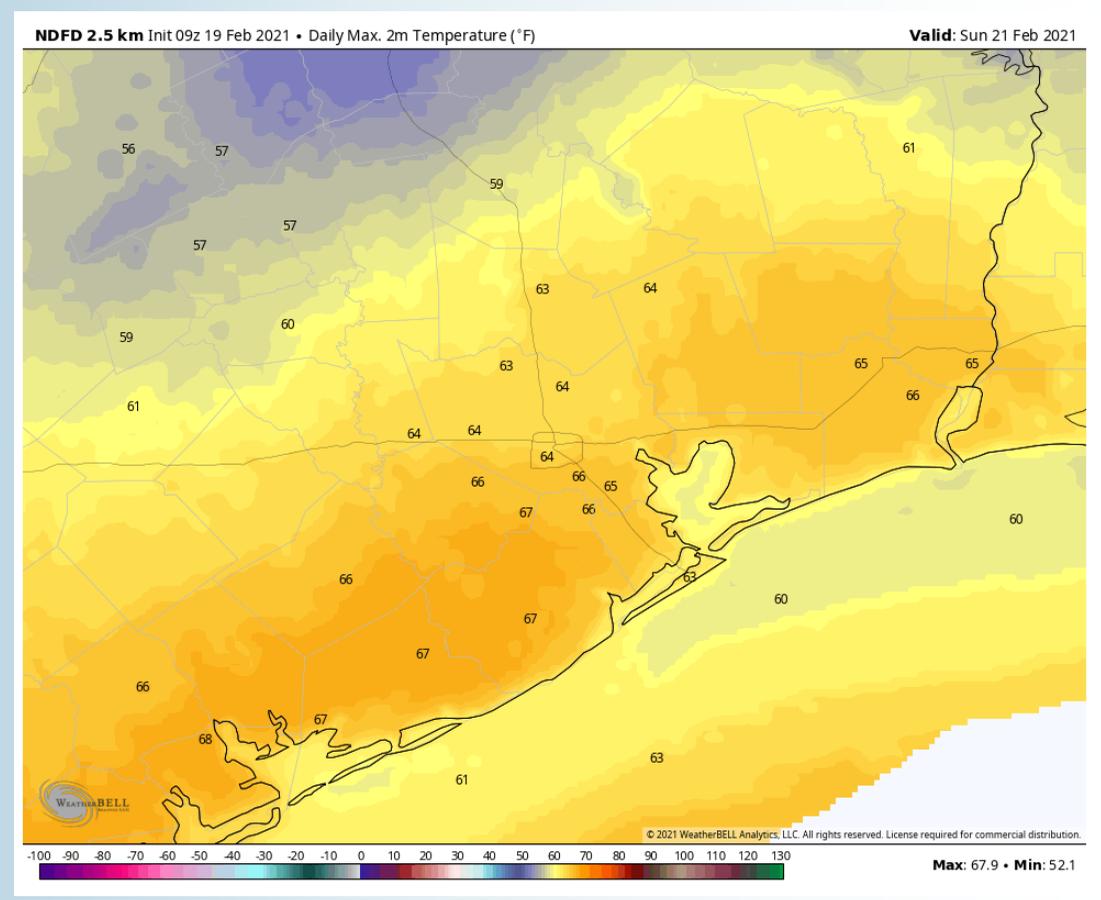

Sustained Winds (10 AM CT)

Simulated Radar Snapshot (11 AM CT)

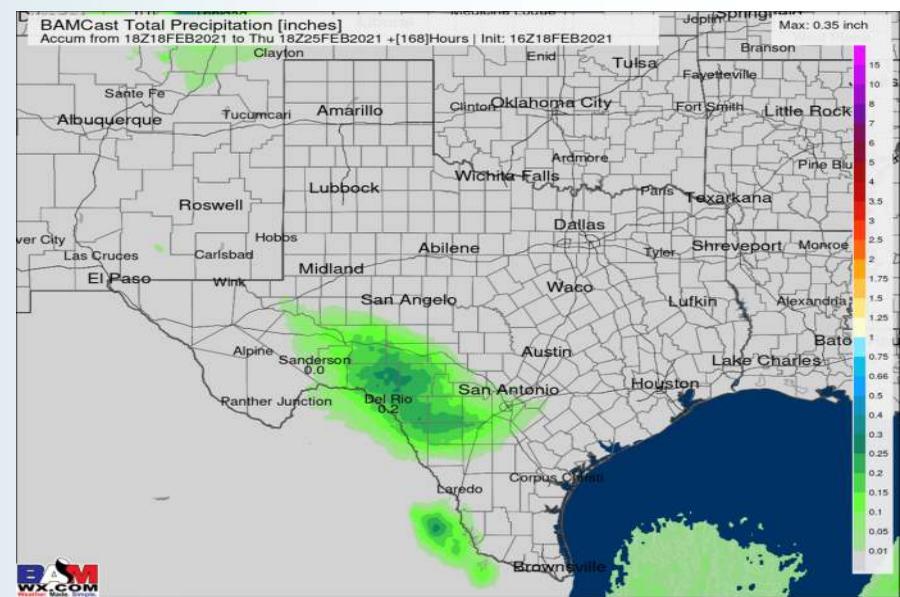

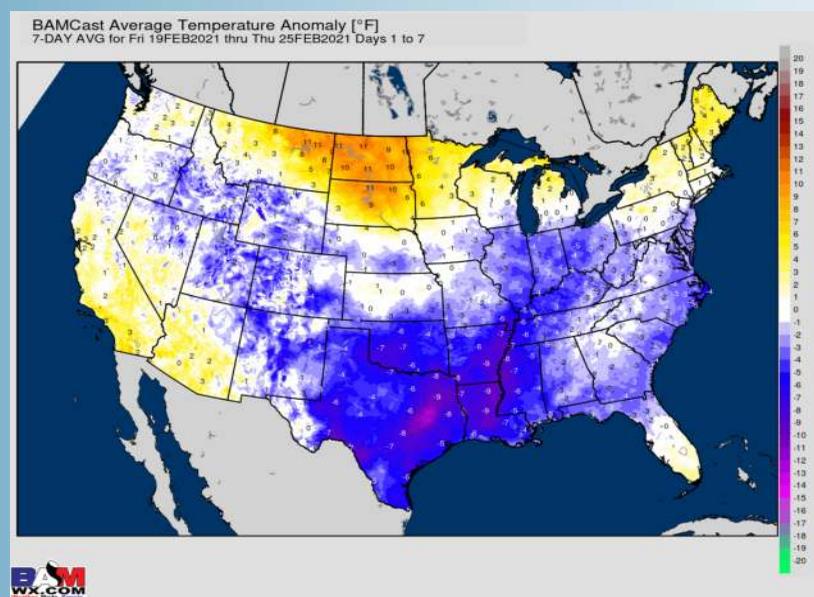

High Temperatures Sunday

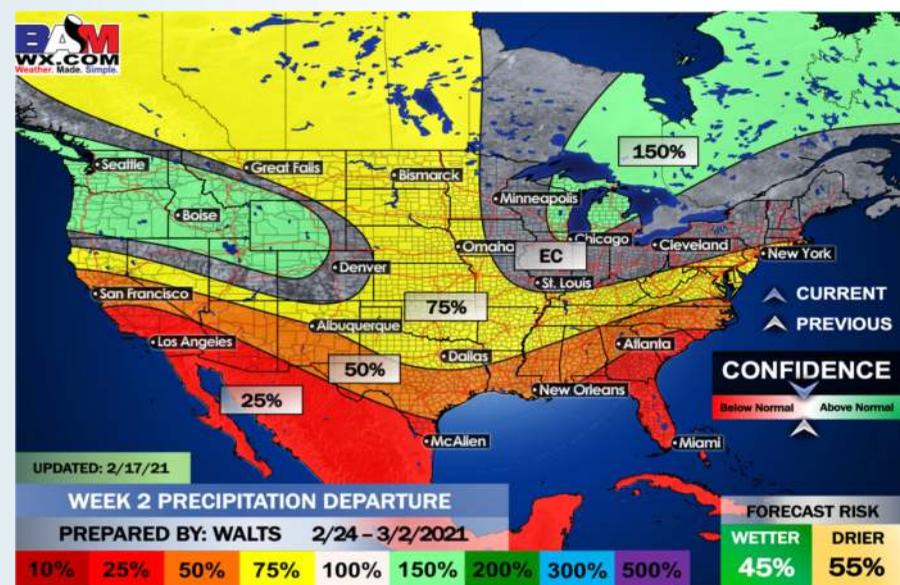

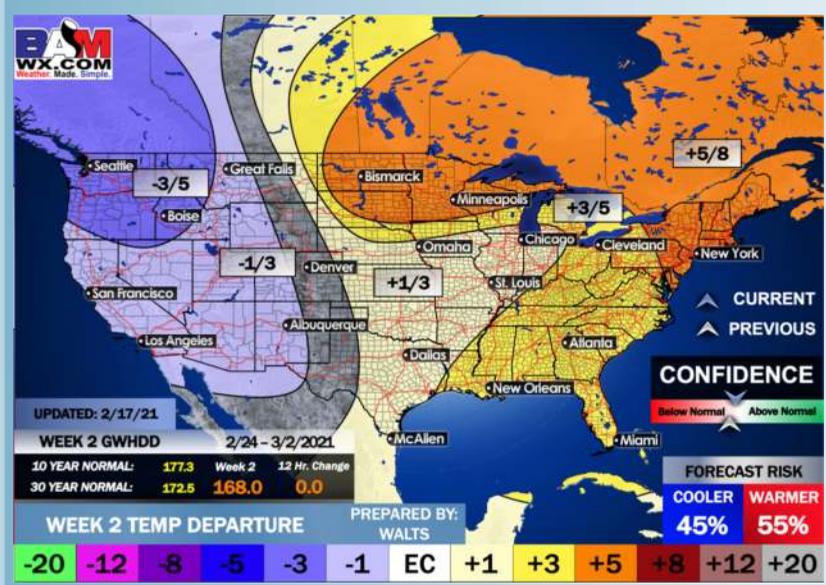

Long-Range Forecast Discussion

- The next best chance for precipitation looks to come on Monday, however at this distance these chances look rather weak. Temps will stay below average over the next 7 days, however temps will gradually increase moving forward
- Week 2 we are expecting to be slightly cooler than normal but also drier than normal. The cooler than normal temps will not be what temps over the past few days have been like.
- The end of Feb and the beginning of Mar we are anticipating conditions to be above normal regarding temps and below normal regarding precip.
