Short-Term Forecast Discussion

- No precip expected the rest of the day
- Expecting winds to turn more ESE by ~5-6 PM. Winds the rest of the afternoon for the boarding station will be 8-13 MPH with gusts 13-18 MPH. Winds will be calmer as you get closer to the 610 bridge. Winds into the overnight hours likely will be 5-10 MPH for all stations.
- Temps this evening look to reach back into the lower to mid 50s for our stations, cooler inland.
 - *No fog is anticipated this evening.*

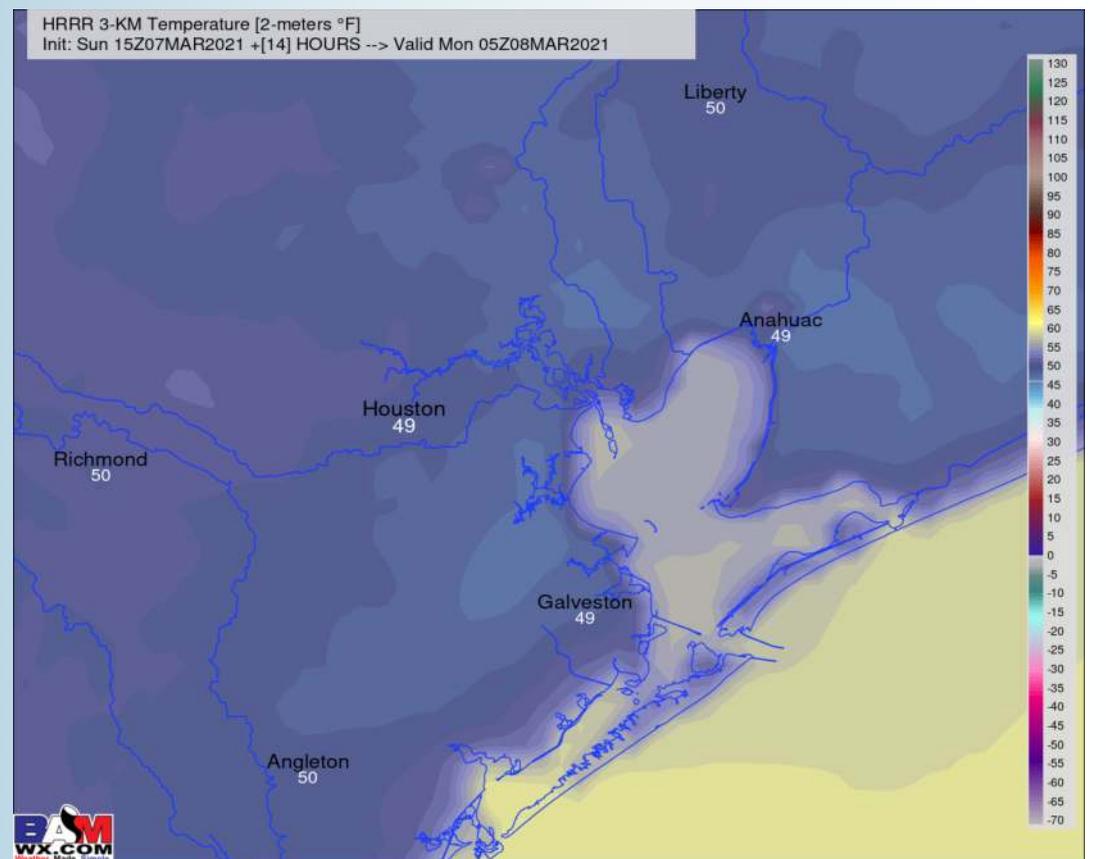

Sustained Winds (9 PM CT)

Simulated Radar Snapshot (10 PM CT)

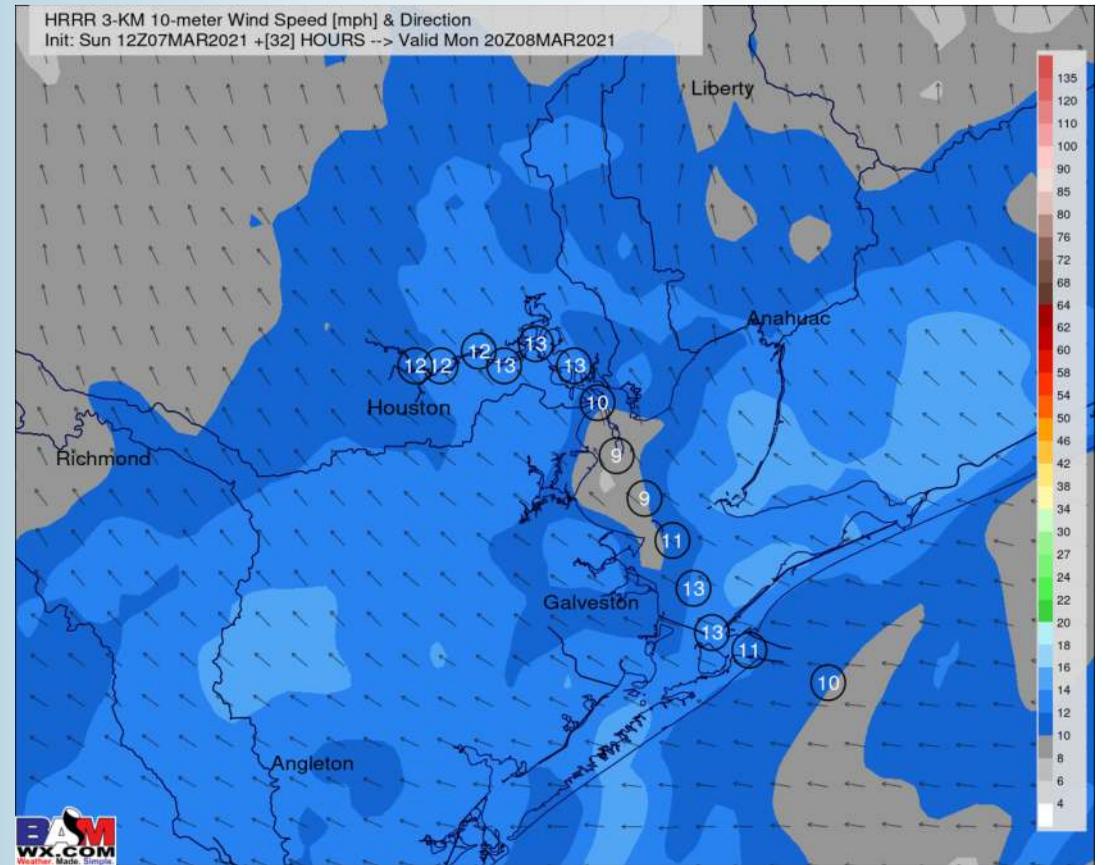

Temperatures this Evening (11 PM CT)

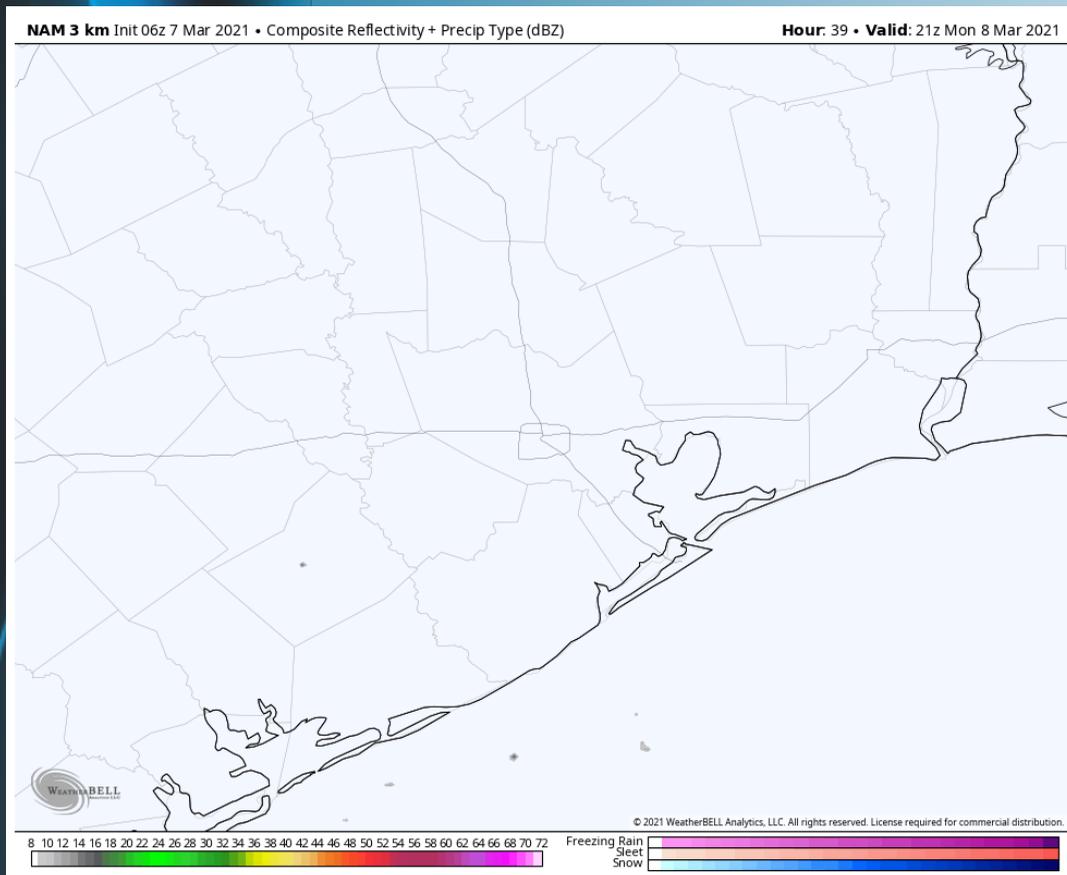

Short-Term Forecast Discussion

- Monday is likely another dry day across the area
- Winds for the first half of Monday will be coming out of the E at 8-13 MPH sustained. Starting around ~ 1 PM, winds will be out of the ESE / SE at 10-15 MPH sustained, gusts 15-20 MPH
- Monday's highs will be in the mid 60s
- *Currently not favoring fog for Monday*

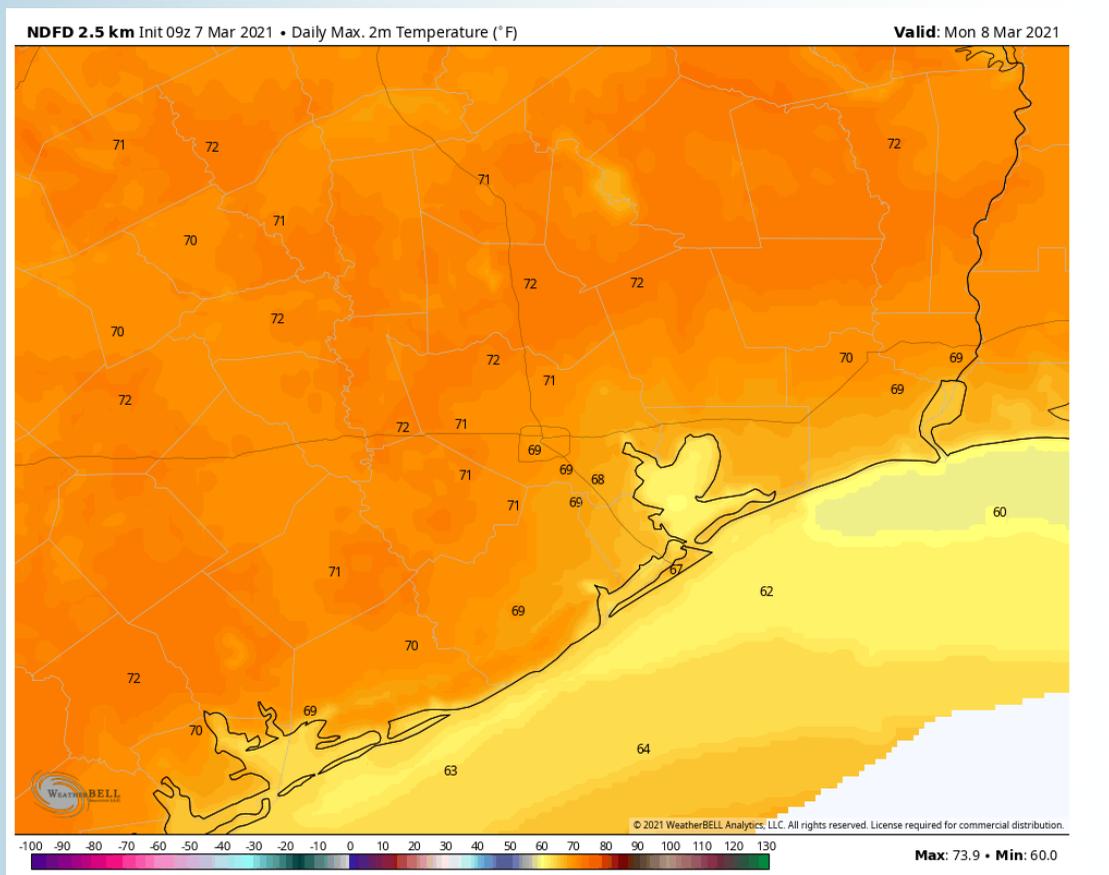

Sustained Winds (2 PM CT)

Simulated Radar Snapshot (3 PM CT)

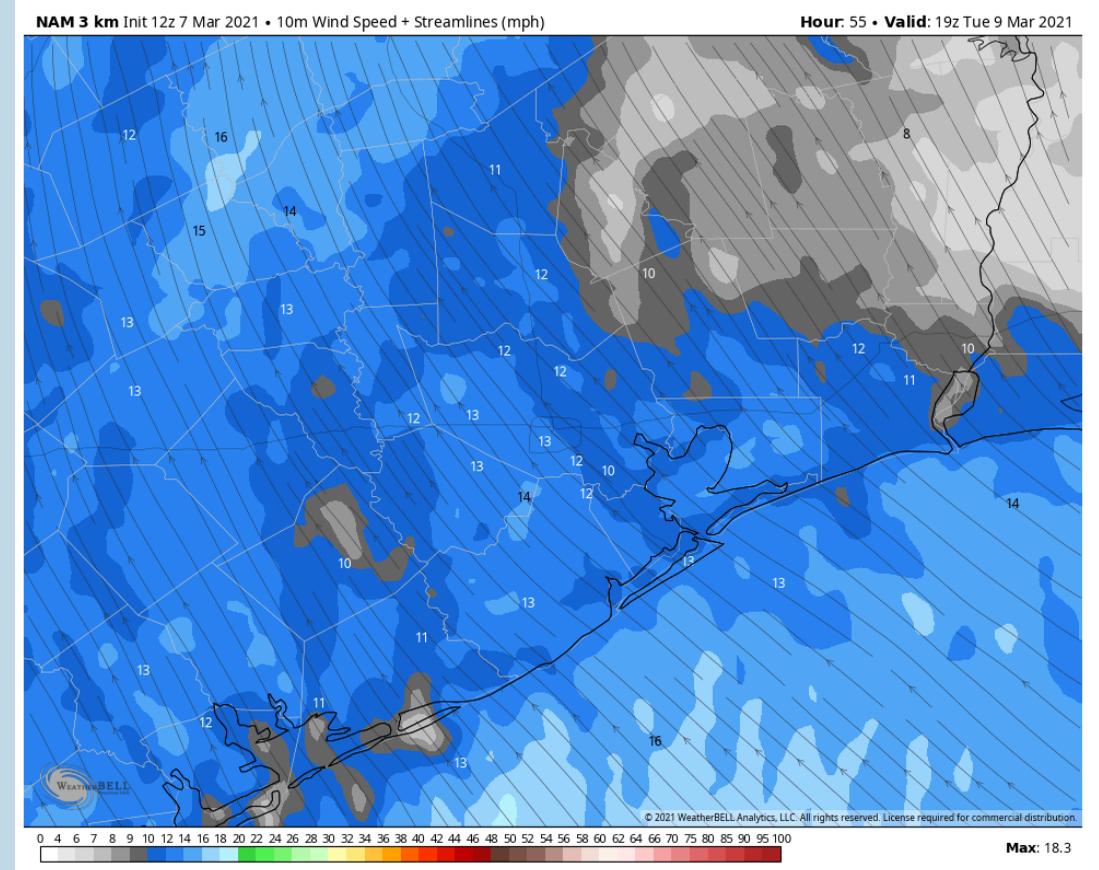

High Temperatures Monday

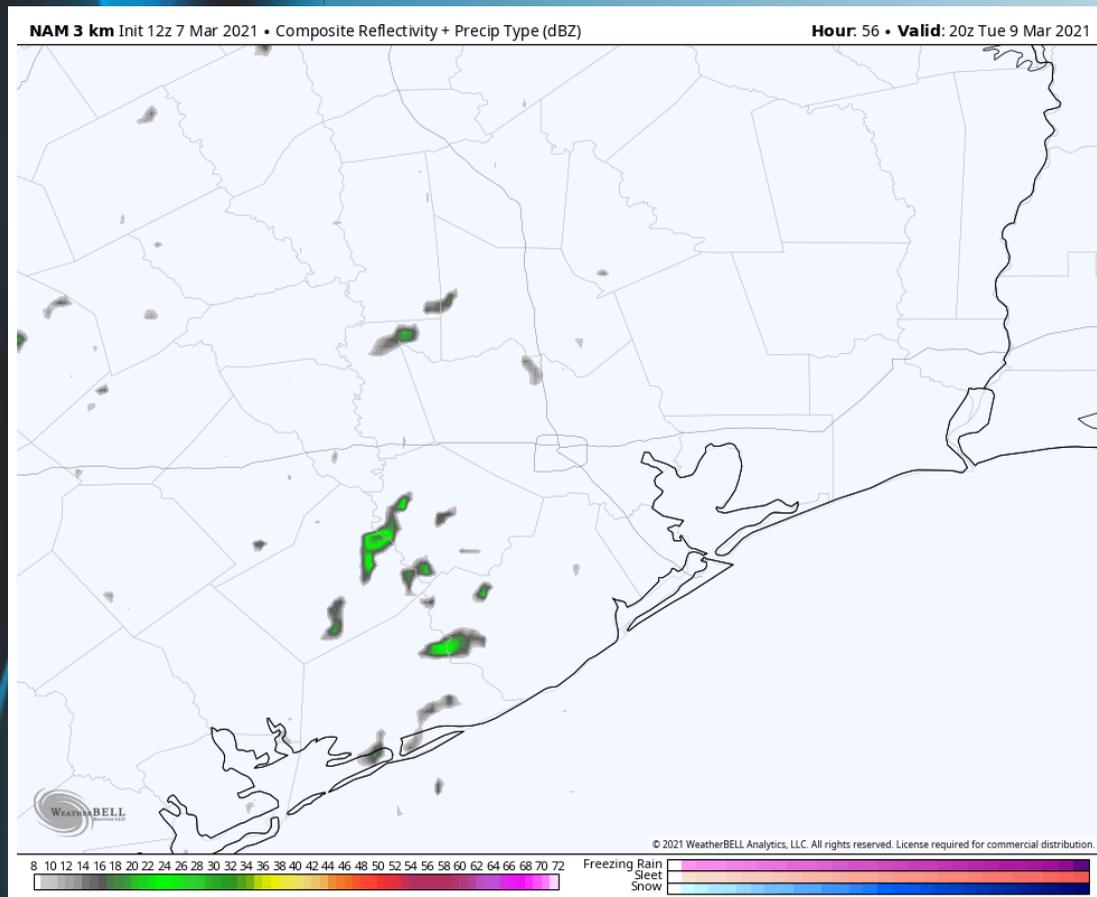

Short-Term Forecast Discussion

- We may need to watch for a few iso sprinkles (~20%) near mid-day Tue, but at this distance favoring an overall drier day. Guidance is a bit split on some energy arriving in the early PM- we are currently leaning on the drier side for Tue.
- Tuesday likely features sustained winds of 13-18 MPH and gusts 18-23 MPH coming from the SE at the boarding station.
- Highs will be in the upper 60s for our stations on Tuesday, warmer inland.
- *No fog is currently anticipated for Tuesday*

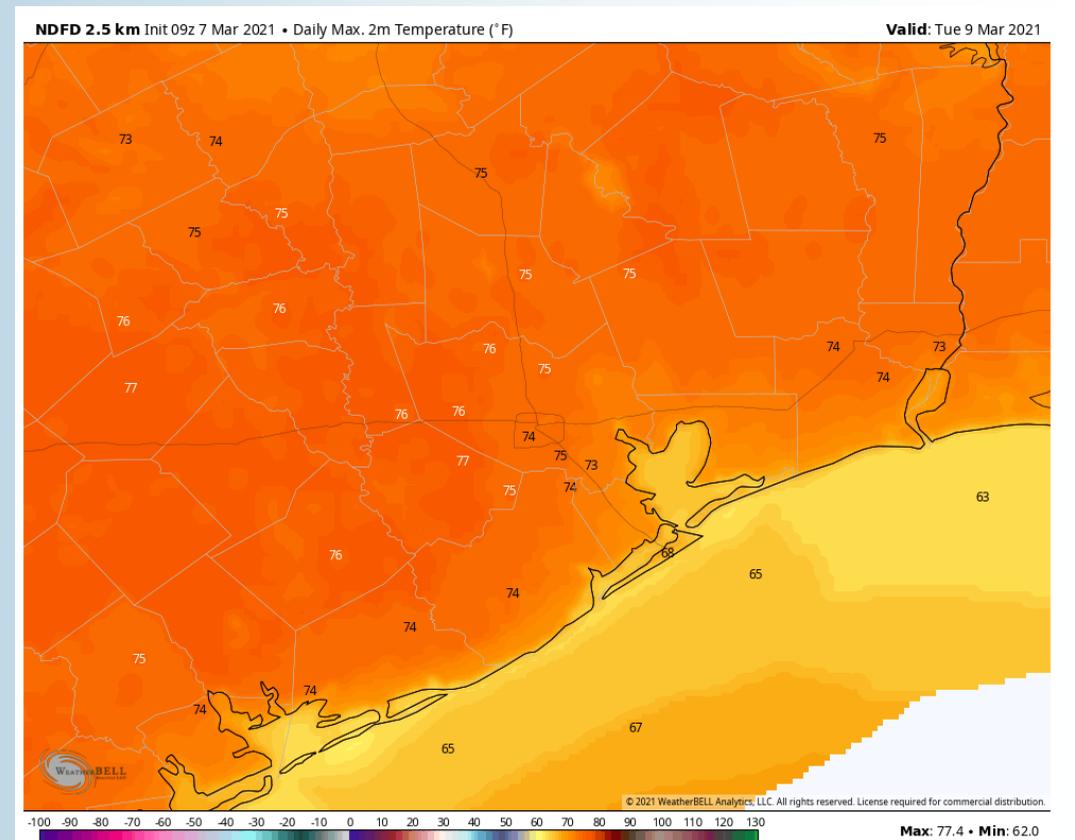

Sustained Winds (1 PM CT)

Simulated Radar Snapshot (2 PM CT)

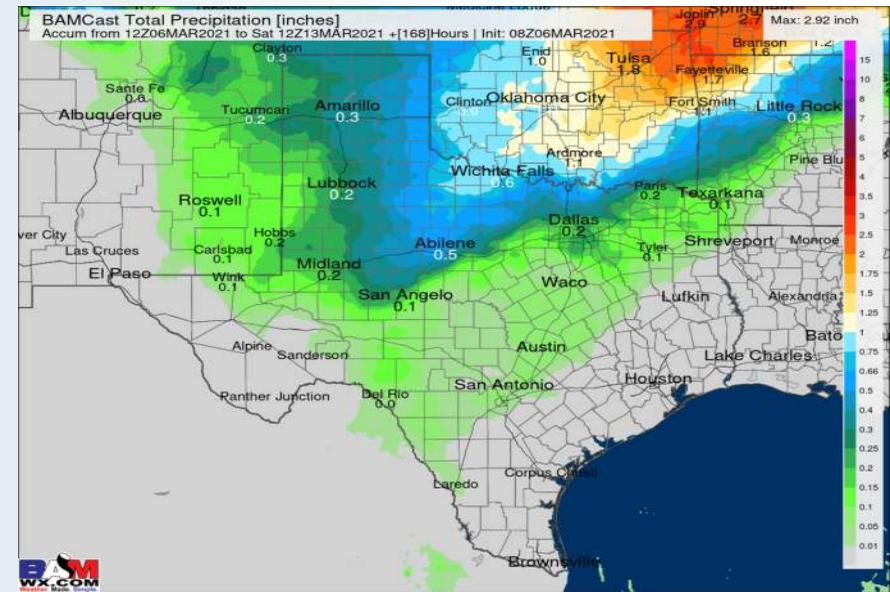

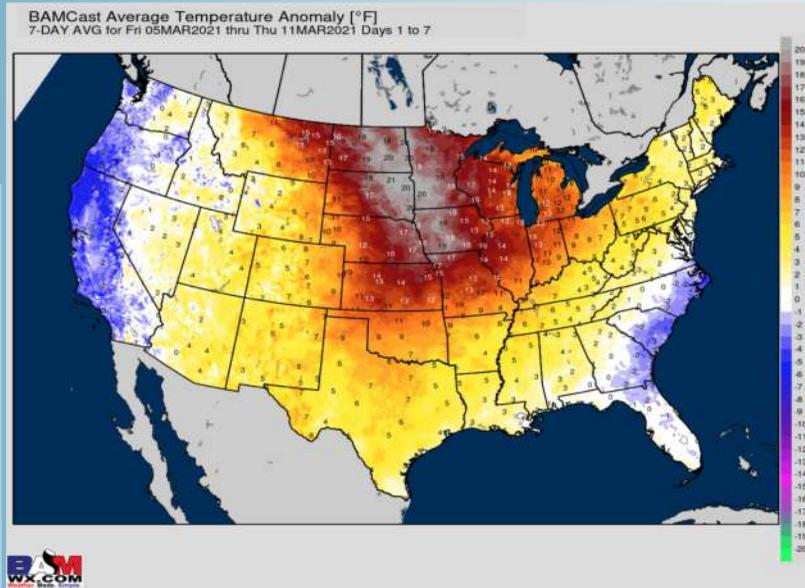

High Temperatures Tuesday

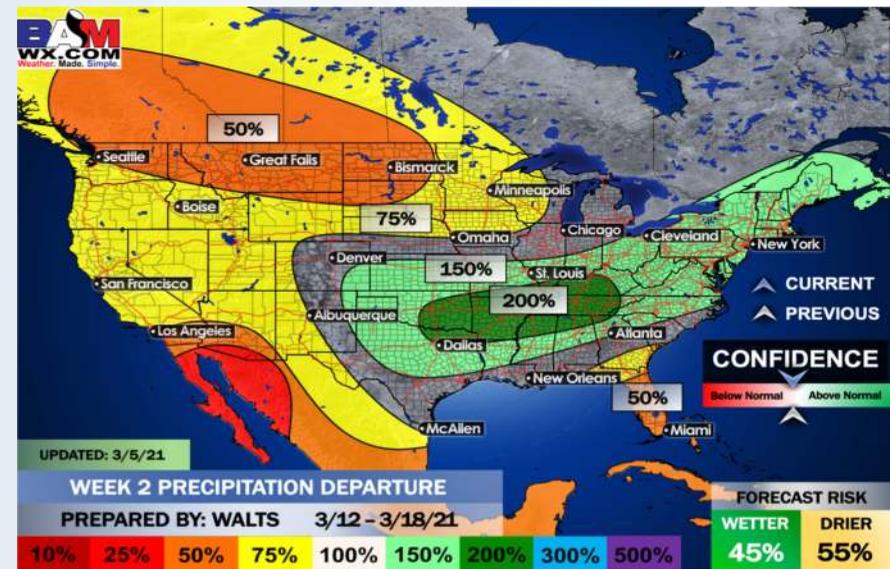

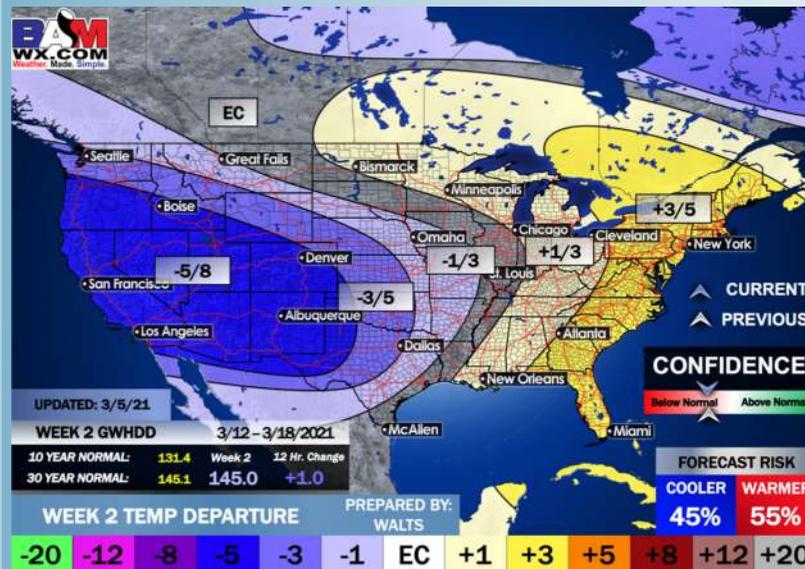

Week 1 Forecast

Long-Range Forecast Discussion

- Slightly cooler to near normal temps are expected over the next few days with above normal temperatures expected Tuesday through Friday. Precipitation chances look to be quite
- The week 2 timeframe will offer up some better precipitation risks with the best potential just North of the Houston area. In particular, we will need to watch for better chances associated with our 2 storm dates in this timeframe (Mar 10-13, Mar 14-16). Temps likely start out above normal with some cooler temperatures for the second half of the week (3/14 – 3/18). This likely means temps averaging out right around normal for the 3/12 – 3/18 window.
- The end of March is expected to have near normal precipitation risks with slightly above normal temperature risks. The last week of MAR can see some periods of drier weather with better opportunity for more active weather coming the first week of APR.

Week 2 Forecast

Weeks 3/4 Forecast
