## Long-Range Forecast Discussion

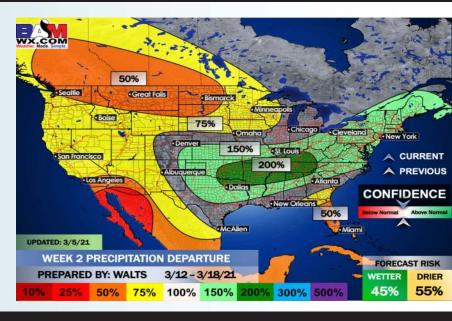

- Slightly cooler to near normal temps are expected over the next few days with above normal temperatures expected Tuesday through Friday.
  Precipitation chances look to be mainly north.
- The week 2 timeframe will offer up some better precipitation risks with the best potential just North of the Houston area. Temperatures will stay at about "normal" for this period, with the ups and downs the precip chances will be bringing ahead.
  - The end of March is expected to have near normal precipitation risks with slightly above normal temperature risks. The last week of MAR can see some periods of drier weather with better opportunity for more active weather coming the first week of APR.
