Week 1 Forecast

Long-Range Forecast Discussion

- Slightly cooler to near normal temps are expected today with above normal temperatures expected Tuesday through Friday. Precipitation chances look to be mainly north over the next week.
- The week 2 timeframe will offer up some better precipitation risks with the best potential just North / East of the Houston area. Temperatures will likely drop below normal for this period.
 - The end of March is expected to have near normal precipitation risks with slightly above normal temperature risks. The last week of MAR can see some periods of drier weather with better opportunity for more active weather coming the first week of APR.
