Short-Term Forecast Discussion

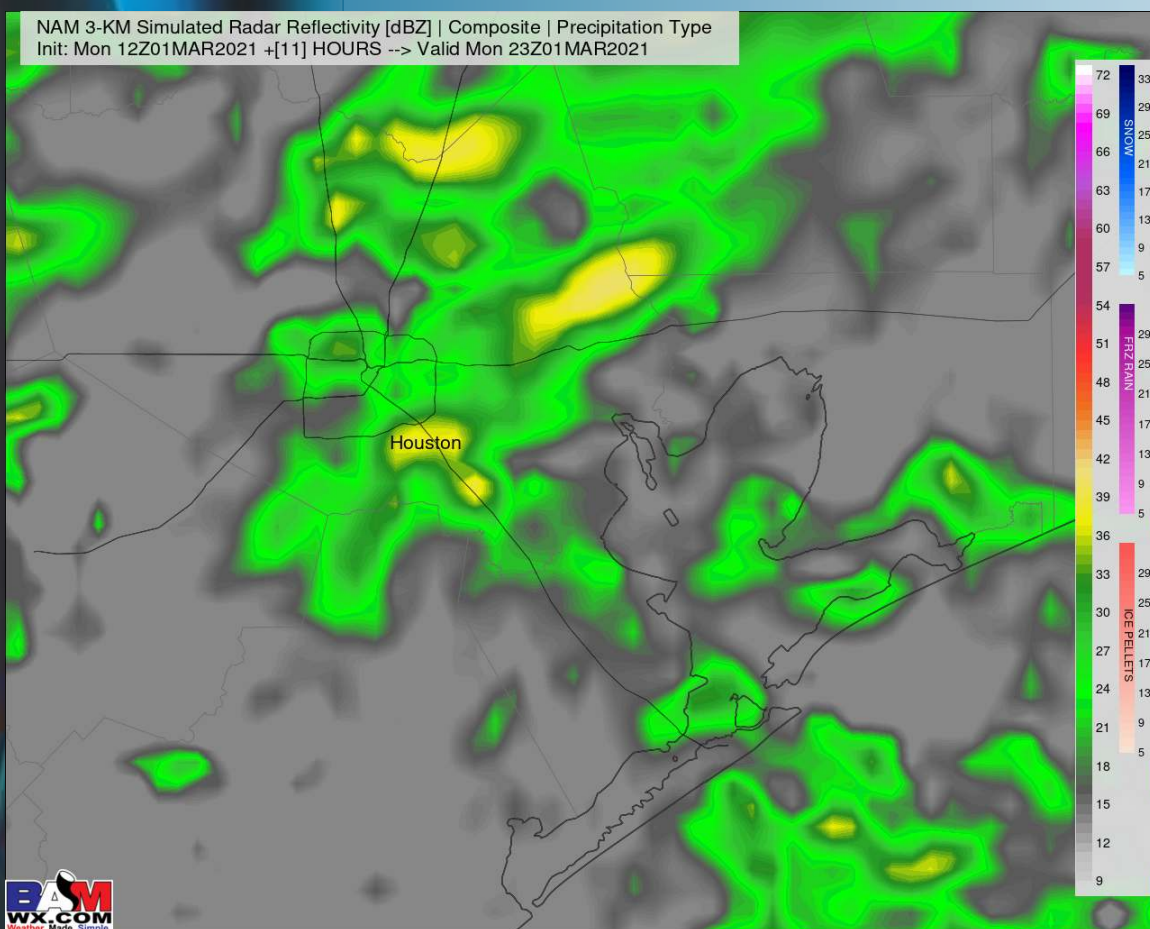

- The main precipitation remains off to the north and east right now, but as the frontal boundary continues to work southward this evening, rain chances will increase. Best rain chances look to be between ~4PM and Midnight with light to locally moderate rain showers off/on. Lingering mist possible into tomorrow morning.
- Winds have shifted to be out of the northeast, sustained at 10-20 MPH with gusts to 25-30MPH. Winds likely stay out of the E/NE the rest of the day generally sustained at 10-20 (higher over water) with gusts to 25-30 MPH shifting more northerly overnight.
- Additional precipitation looks to be a general 0.2 to 0.5".
- *Fog threats have moved south of the area.*

Monday, March 1st, 2021

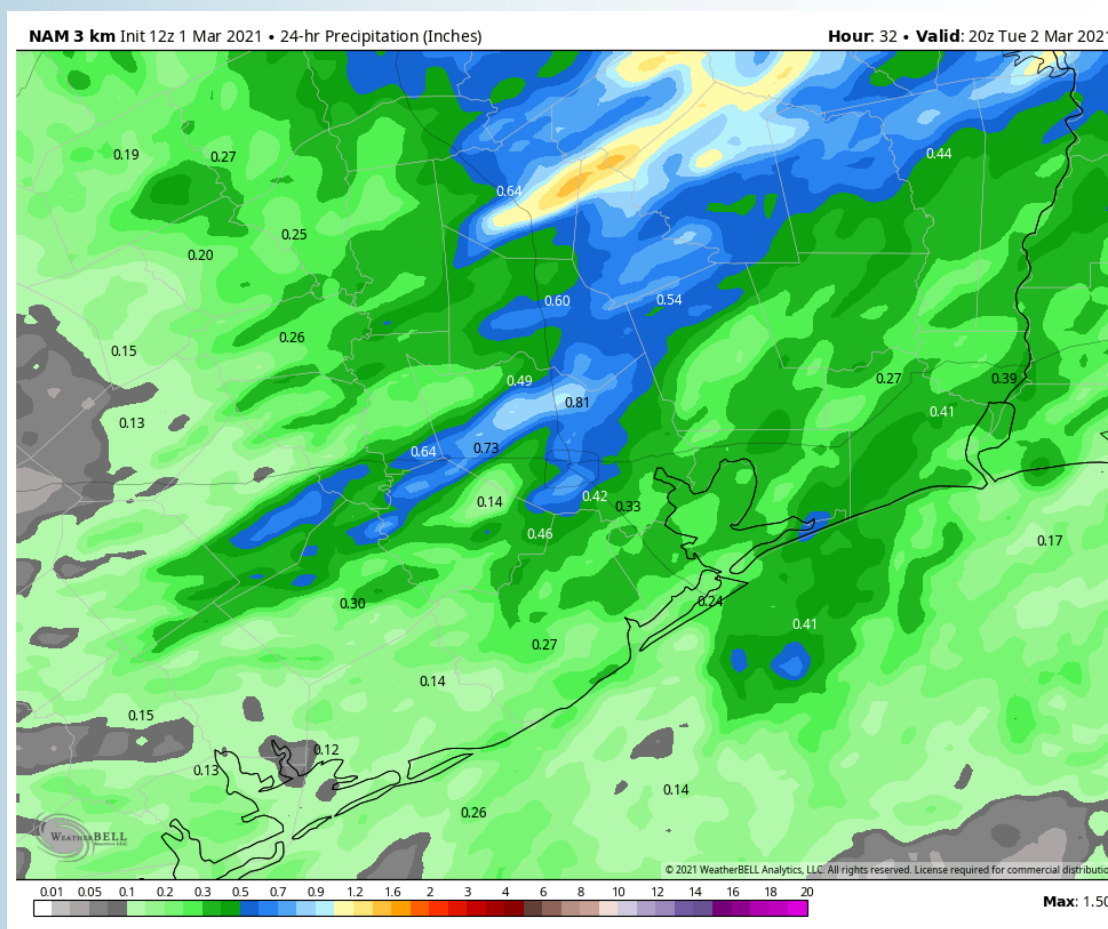

Sustained Winds (4 PM CT)

Simulated Radar Snapshot (5 PM CT)

Additional Precipitation the next 24 Hours

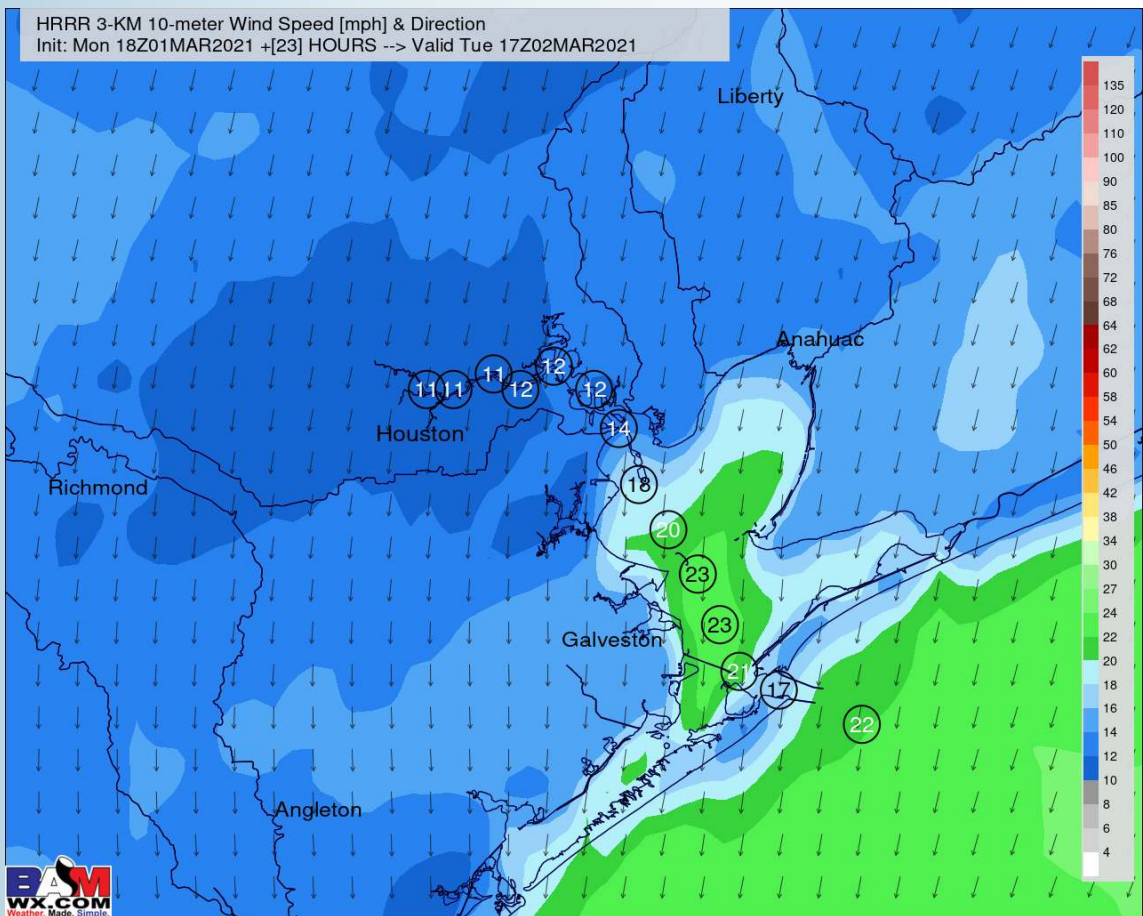

Short-Term Forecast Discussion

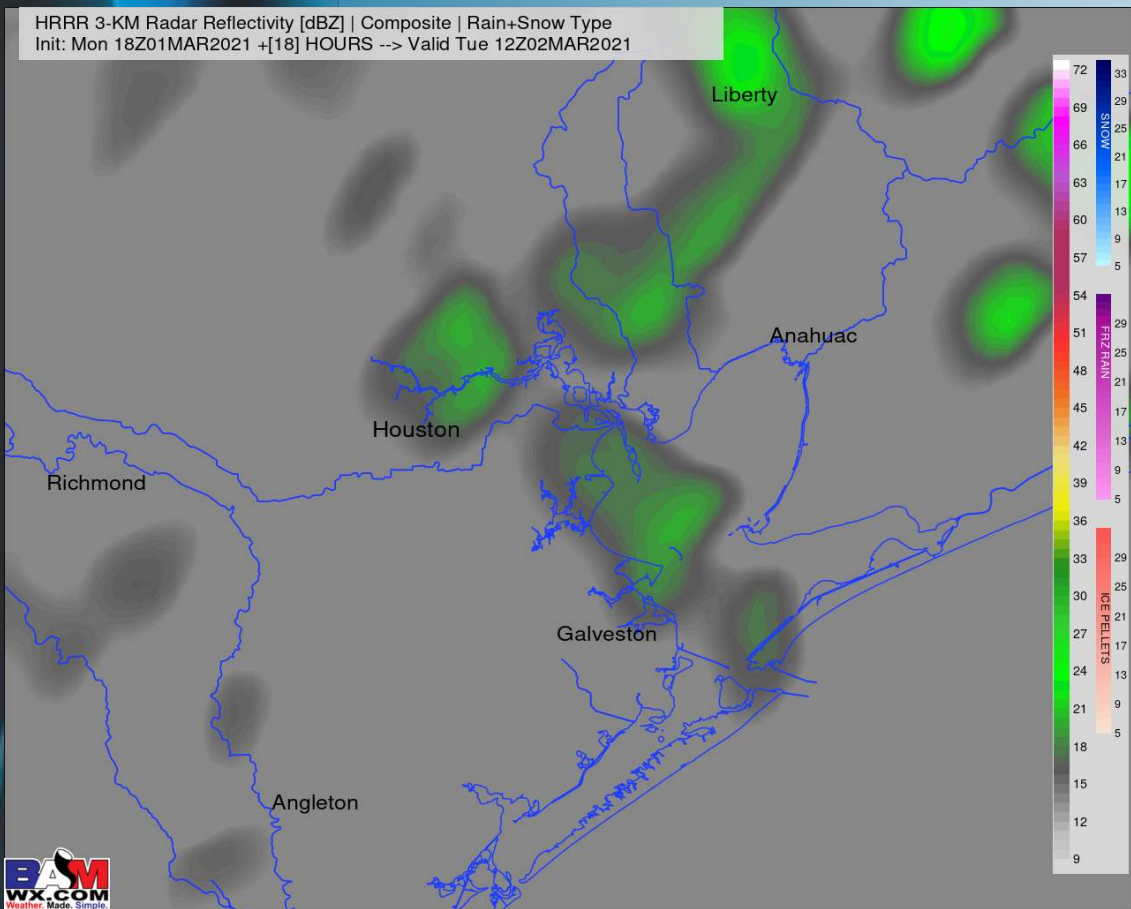

- A few scattered leftover showers/mist will be possible out through about mid-morning, but the later into Tuesday we work, the drier we will be.
- Winds will be primarily out of the North at the boarding stations through much of the day, and will be 17-23 MPH sustained with gusts 23-28 MPH. Winds may be locally higher as the winds shift direction in the morning hours.
- Highs temps across the area will be in the upper 50s / lower 60s with the passing of the front.
- *No fog is currently anticipated for Tuesday morning.*

Tuesday, March 2nd, 2021

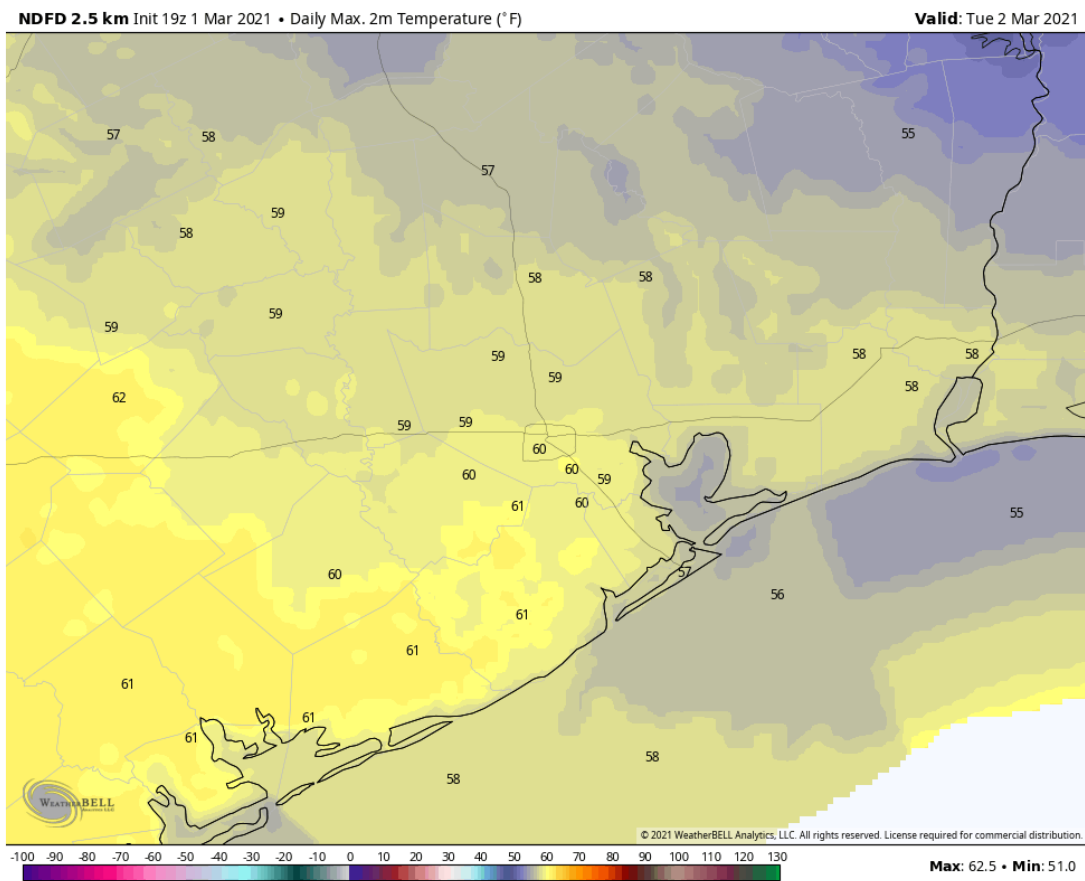

Sustained Winds (9 AM CT)

Simulated Radar Snapshot (6 AM CT)

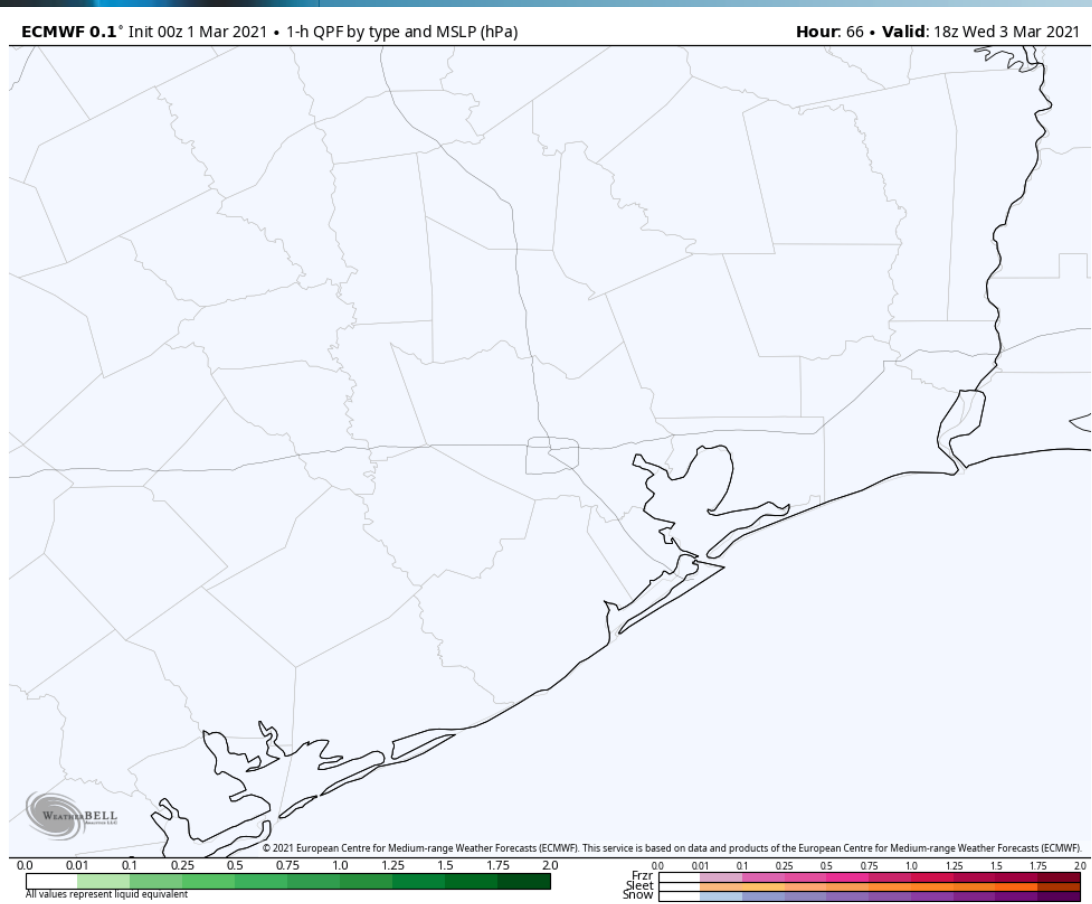

High Temperatures Tuesday

Short-Term Forecast Discussion

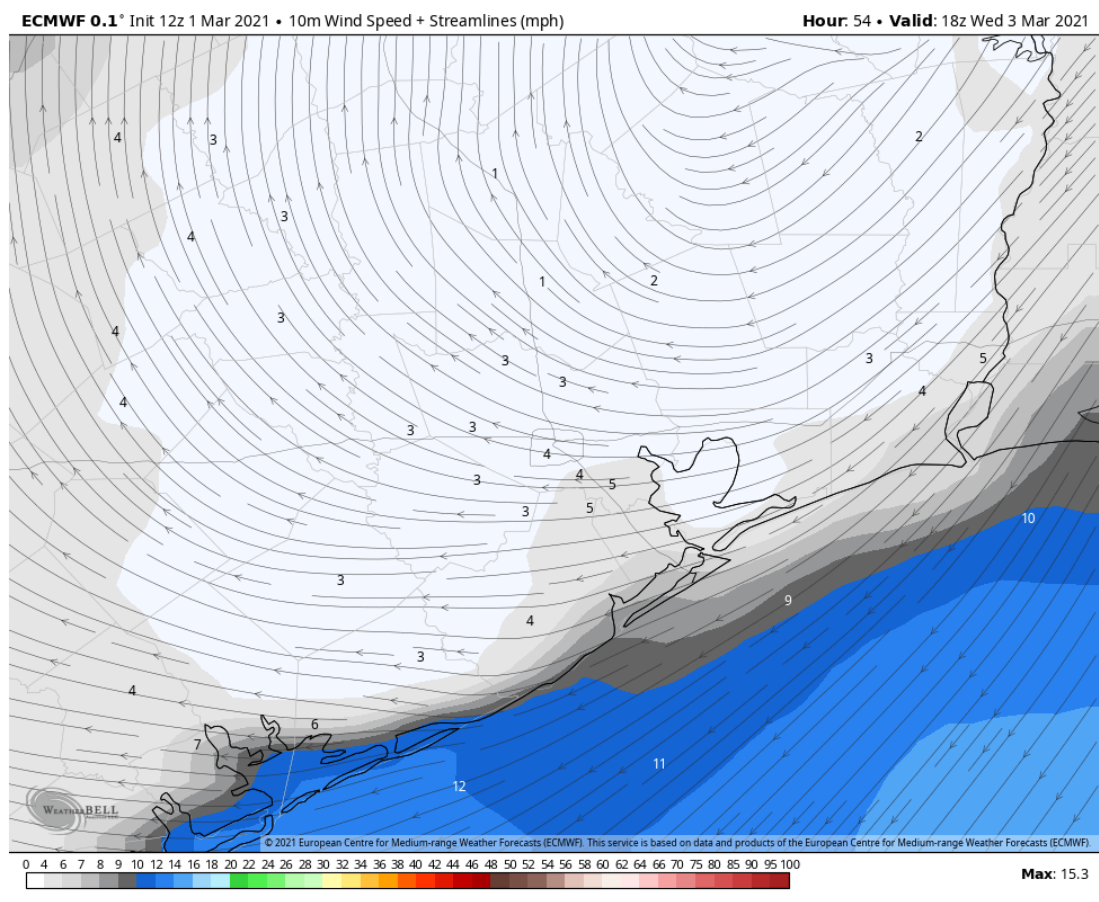

- Wednesday is expected to be a dry day across the area.
- Winds will start out of the Northeast at 5-10 MPH sustained, giving way to light, variable winds early to mid-afternoon to the evening hours.
- Highs temps across the area will climb back into the low to mid 60s across the area.
- No fog is currently anticipated for Wednesday AM.

Simulated Radar Snapshot (12 PM CT)

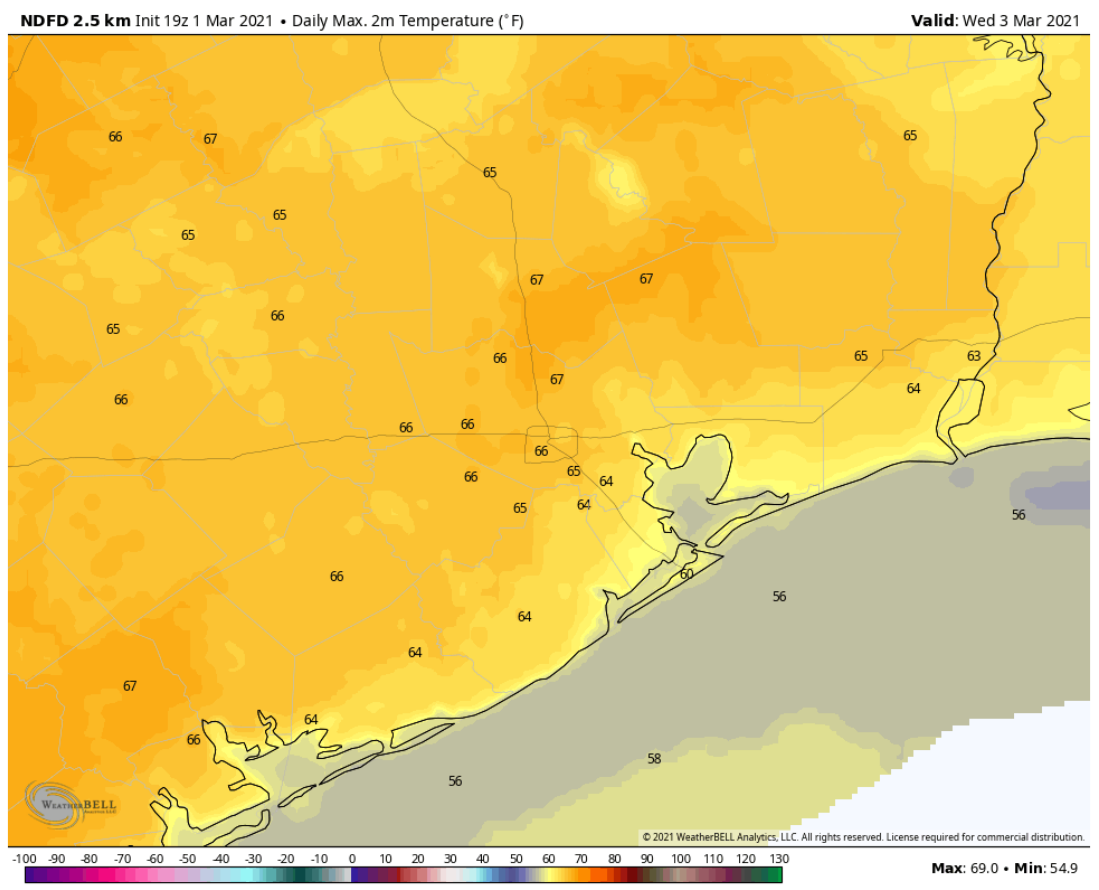

Wednesday, March 3rd, 2021

Sustained Winds (12 PM CT)

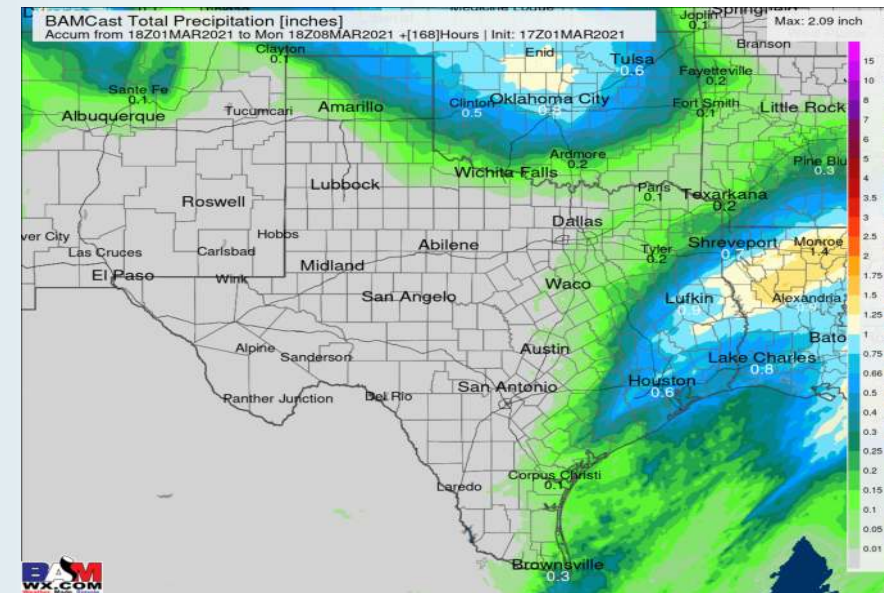

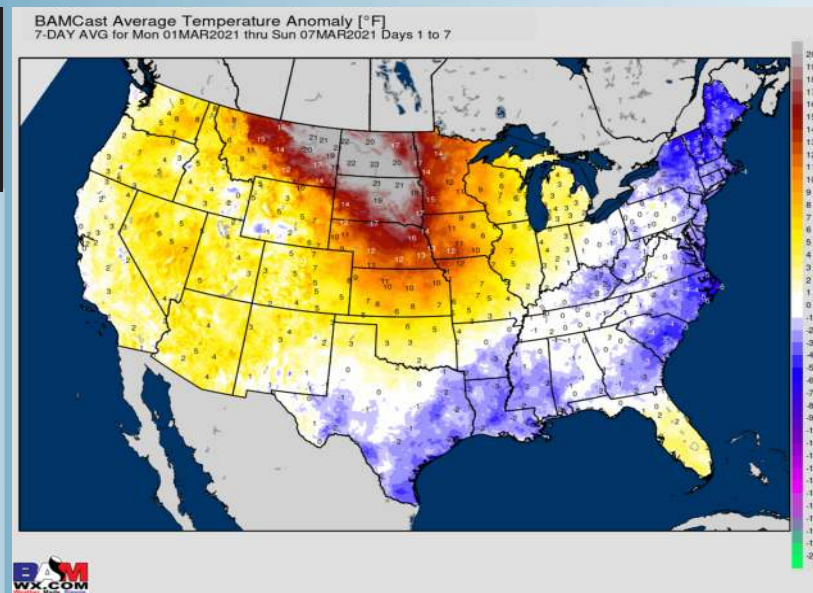

High Temperatures Wednesday

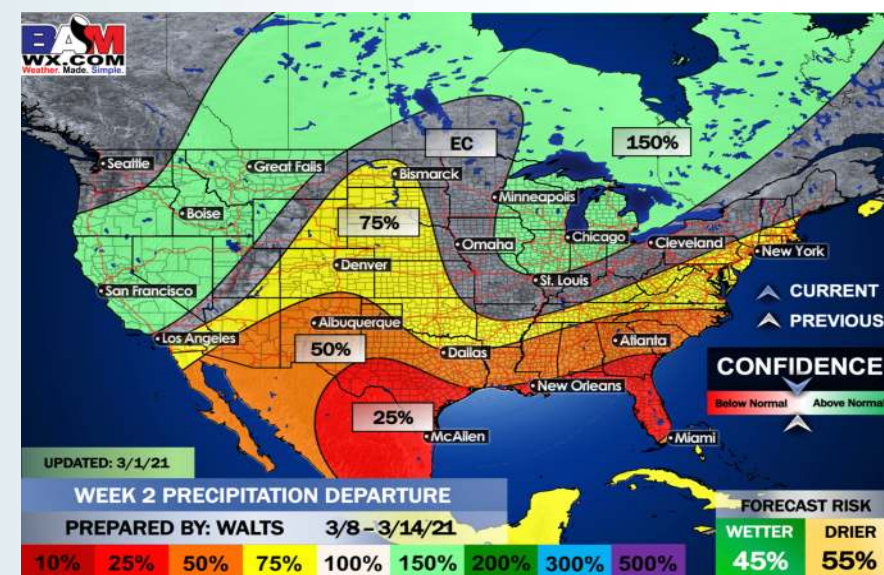

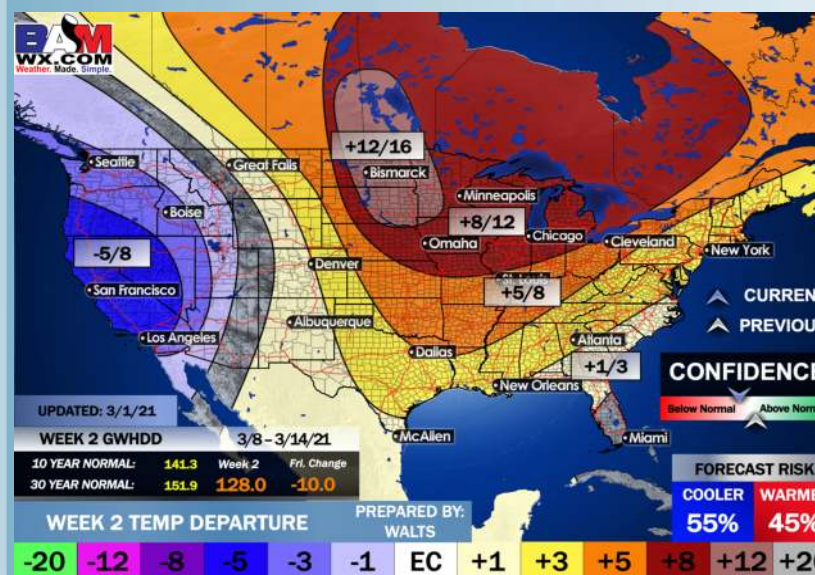

Week 1 Forecast

Long-Range Forecast Discussion

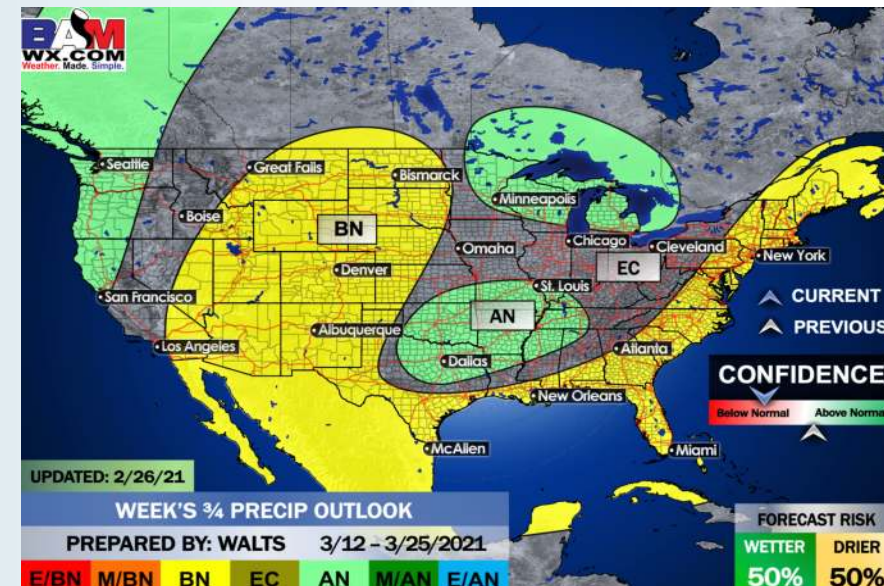

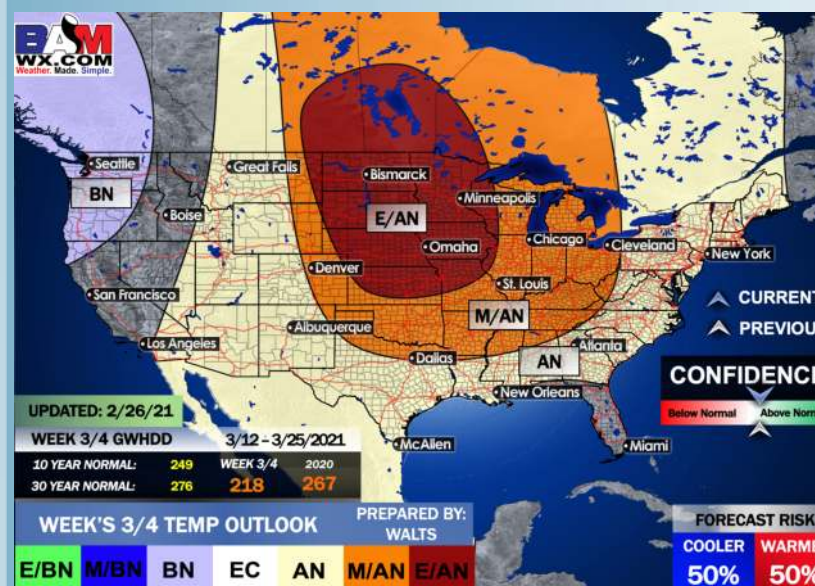

- Temps will start to climb down to 1-3F below normal over the next week. After precip moves out of the area on Tuesday, expecting quieter weather moving forward with the next chance then coming on Friday.
- Early March we continue to favor slightly above normal temps with below normal precipitation for this time of year.

Week 2 Forecast

Weeks 3/4 Forecast

- Into mid-late March we are favoring above normal temps for Texas and below normal precip as the upper air pattern does not look favorable for precip.
