## Short-Term Forecast Discussion

- Today is looking at another dry day
- Winds this AM will slowly start to weaken into the afternoon hours. Winds this morning will be 10-15 MPH before calming in the afternoon to 5 – 10 MPH with gusts around 15 MPH. Winds will continue coming out of the NE until ~6 PM when a more ENE wind is expected.
- Highs in the mid 60's F will be possible over open waters.
  - *No fog is expected today*

## Sustained Winds (10 AM CT)

## Simulated Radar Snapshot (4 PM CT)

## High Temperatures Saturday

## Short-Term Forecast Discussion

- Another dry day is anticipated on Sunday.
- Winds for much of the day will be coming from the E at 8-13 MPH with gusts to 15 MPH. Expecting a wind shift to more SE near the sundown hours (6-8 PM). Winds will then be out of the SE for the remainder of the day and increase to 10-15 MPH.
- Highs should sit in in the upper 60's/ lower 70s F over open waters on Sunday.
  - *No fog expected on Sunday.*

## Sustained Winds (6 PM CT)

## Simulated Radar Snapshot (3 PM CT)

## High Temperatures Sunday

## Short-Term Forecast Discussion

- With the return of onshore flow (SE winds), a few scattered showers into mid-day cannot be ruled out across the area.
- Winds across the area will continue coming out of the SE, but will increase. Into the afternoon hours of Monday, sustained winds of 13-18 MPH with gusts 18-23 MPH will be possible.
- Highs Monday should be sitting in the lower 70s
- *Fog is currently not favored for Monday.*

## Sustained Winds (10 AM CT)

## Simulated Radar Snapshot (1 PM CT)

## High Temperatures Monday

## Week 1 Forecast

### Long-Range Forecast Discussion

➤ Cooler temperatures this weekend moderate on Monday with temperatures near normal. Monday – Wednesday will offer up the best shots of moisture this week with with heavier downpours/ storms possible.

➤ Temperatures likely average out to near normal for the week 2 timeframe with warmer weather out ahead of a system on Mar 29 – 31 and cooler temps in behind. Precipitation should run near normal as well with better moisture chances with the storm system around Mar 29 – 31.

➤ The end of March/ early April will feature a more active subtropical jet with increased moisture risk. Temperatures are expected to be near normal and likely fluctuate between warmer and cooler pending passages of systems.
