### Fog Report

Monday, March 1, 2021

#### **VISIBILITY (10 AM CT MON)**

#### **VISIBILITY (2 PM CT MON)**

➤ While fog is still expected for the morning hours today, we are eyeing the late AM – mid afternoon hours (~10 AM – 2 PM) for fog to finally depart the area. We would favor the earlier part of that time period for fog to move out of locations N of Morgan's Point, and the back half of the window for fog to exit locations S of Morgan's Point.

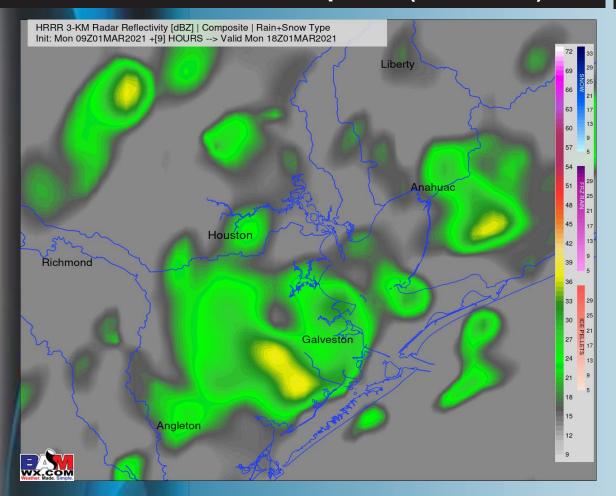

#### Monday, March 1st, 2021

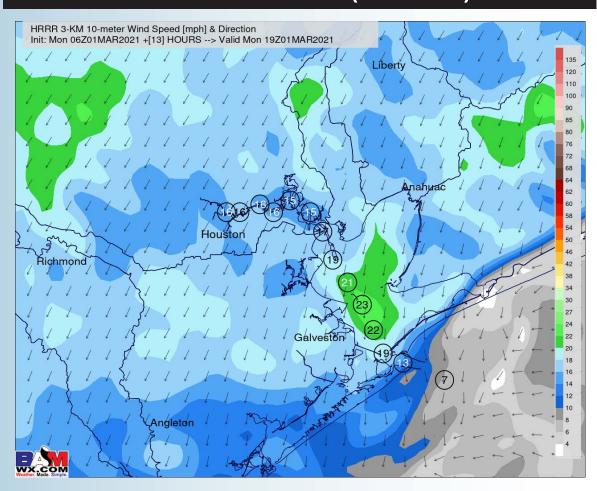

#### **Short-Term Forecast Discussion**

- For Monday, we are favoring a few iso AM showers starting around ~6 AM to give way to better late AM to early PM chances (~11 AM and beyond) which includes the potential of a few thunderstorms. Overall precip will be light to at times moderate in intensity and a more moderate pocket of rain holds the potential to reduce visibility.
- Winds starting out Monday are likely 5-10 MPH coming from the S. Around the ~10A − 2 P time, winds will start to shift to more NE and increase to 13-18 MPH, with gusts up to 25-35 MPH possible. Winds likely stay out of the NE the rest of the day.
  - High temps Monday will hover around the mid 60s over the water.
    - \*Please check slides above for fog potential\*

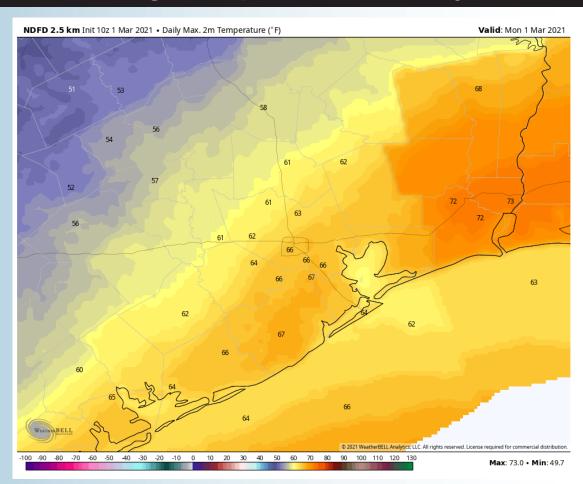

#### **Simulated Radar Snapshot (12 PM CT)**

#### **Sustained Winds (1 PM CT)**

#### **High Temperatures Monday**

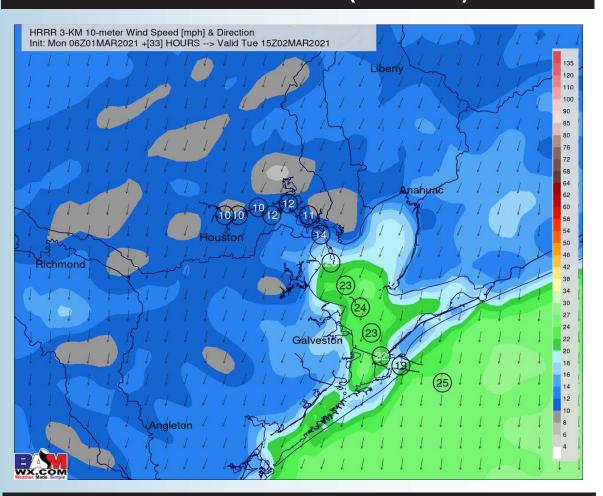

#### Tuesday, March 2nd, 2021

#### **Short-Term Forecast Discussion**

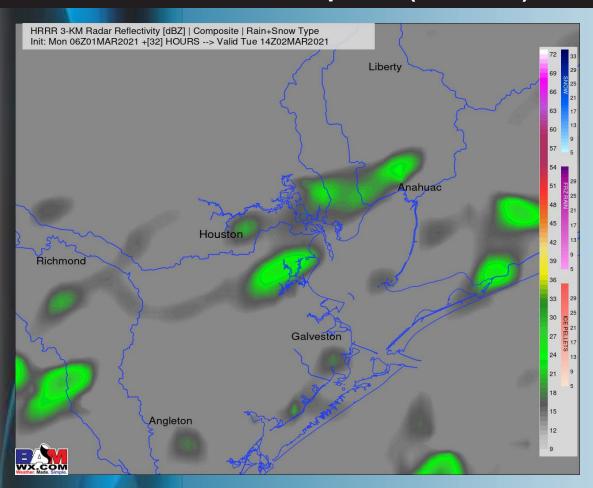

# A few scattered leftover showers will be possible out through about mid-morning, but the later into Tuesday we work, the drier we will be.

- ➤ Winds will be primarily out of the North at the boarding stations through much of the day, and will be 18-23 MPH sustained with gusts 23-28 MPH. Winds may be locally higher as the winds shift direction in the morning hours.
- Highs temps across the area will be in the upper 50s / lower 60s with the passing of the front.
- No fog is currently anticipated for Tuesday, however isolated lower visibilities in the AM will be possible thanks to rain showers.

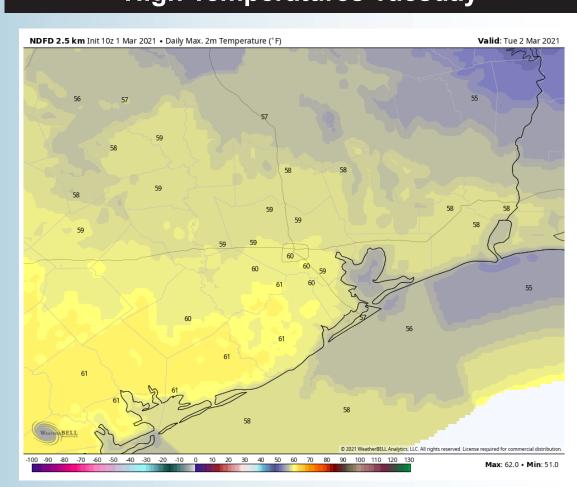

#### **Sustained Winds (9 AM CT)**

#### **Simulated Radar Snapshot (8 AM CT)**

#### **High Temperatures Tuesday**

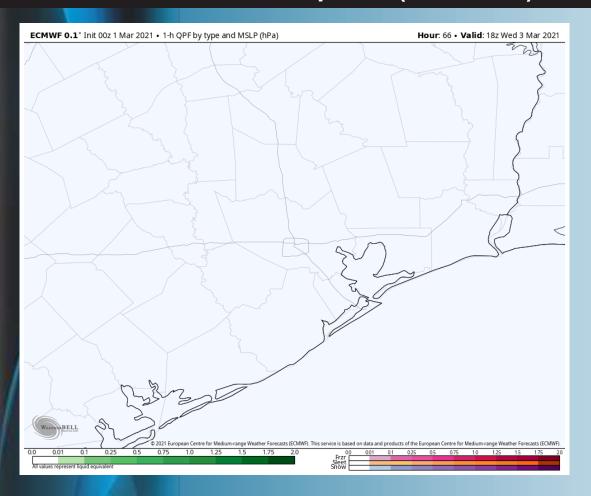

#### Wednesday, March 3rd, 2021

#### **Short-Term Forecast Discussion**

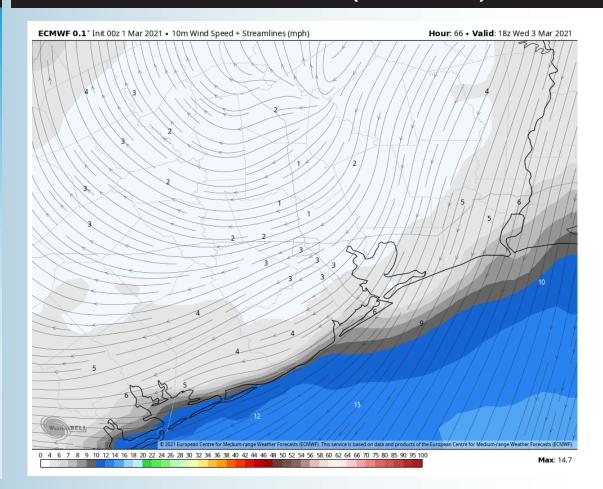

#### Wednesday is expected to be a dry day across the area.

- Winds will start out of the Northeast at 5-10 MPH sustained, giving way to light, variable winds early to mid-afternoon to the evening hours.
  - Highs temps across the area will climb back into the low to mid 60s across the area.
    - No fog is currently anticipated for Wednesday AM.

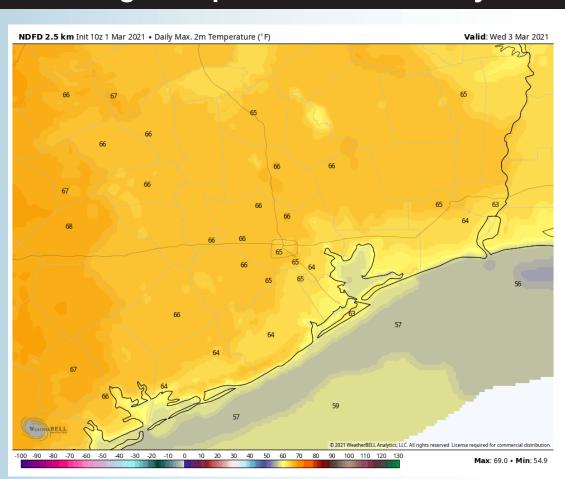

#### **Simulated Radar Snapshot (12 PM CT)**

#### **Sustained Winds (12 PM CT)**

#### **High Temperatures Wednesday**

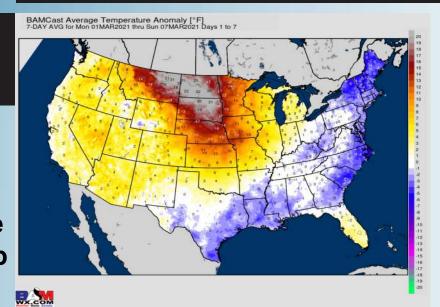

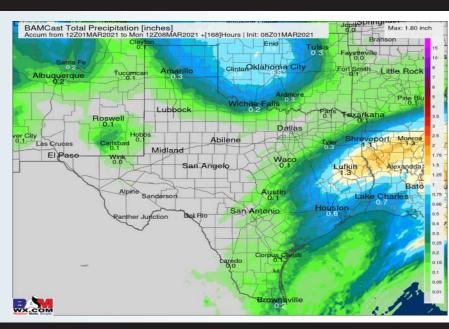

#### Monday, March 1, 2021

#### **Week 1 Forecast**

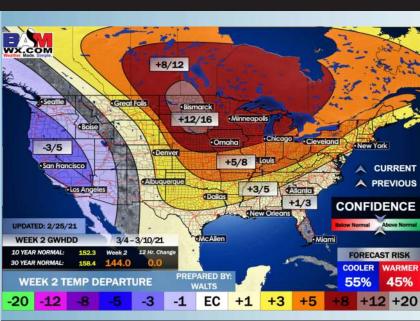

# Long-Range Forecast Discussion

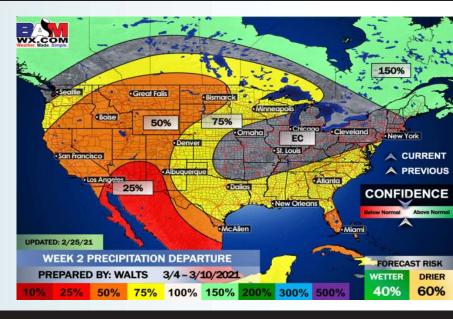

- Temps will start to climb down to 1-3F below normal over the next week. After precip moves out of the area on Tuesday, expecting quieter weather moving forward with the next chance then coming on Friday.
- continue to favor slightly above normal temps with below normal precipitation for this time of year.
- ➤ Into mid-late March we are favoring above normal temps for Texas and below normal precip as the upper air pattern does not look favorable for precip.

#### **Week 2 Forecast**

#### Weeks 3/4 Forecast
