We wanted to make a note, that we believe the chart above could be quite a bit overdone with its suggestion of fog potential from Stations 75-76 to 1&2 Bravo tonight into the overnight.

 The atmospheric soundings in our favored model solutions are not supportive right now of widespread fog risks; will update on this risk in today's PM report.

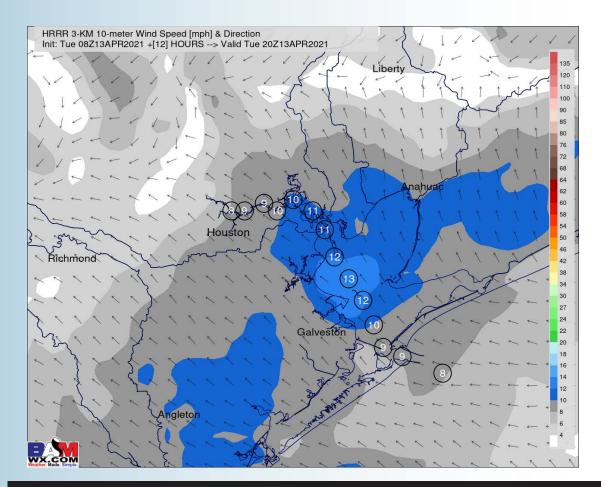

#### **Short-Term Forecast Discussion**

Periods of light showers/rumbles of thunder will be possible this morning from the Boarding Stations towards downtown Houston. As mentioned yesterday, we think this threat starts to diminish late morning to early afternoon.

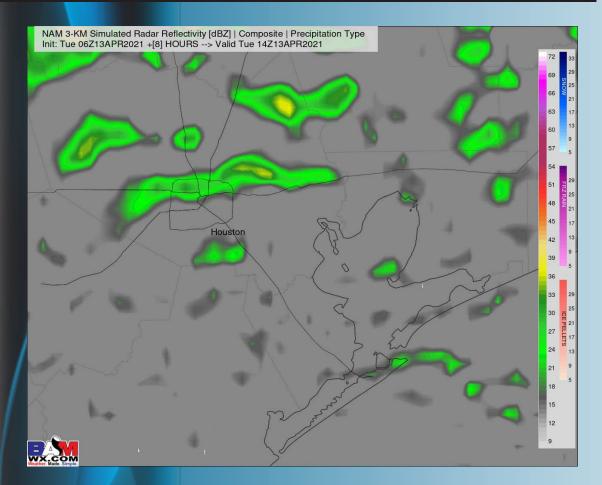

- Winds are favored to come out of the SE at 7-12 MPH sustained for much of the day today, with gusts at times up to ~15 MPH.
- Highs once again should sit in the mid 70s for our Stations.
- As mentioned in the slide above, we below the data is overdone with fog potential tonight into the overnight. Will update on this in today's PM report.

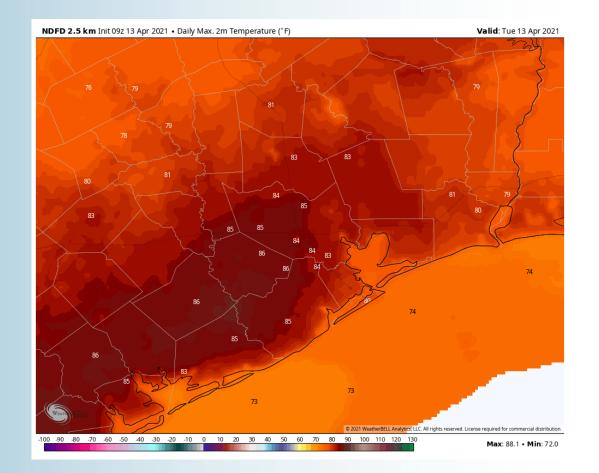

## Simulated Radar Snapshot (9 AM CT)

## Sustained Winds (3 PM CT)

#### **High Temperatures Tuesday**

#### **Short-Term Forecast Discussion**

Scattered showers and storms will be possible Wednesday AM, which could briefly reduce visibility and provide gusty conditions & heavy downpours. We expect more breaks into the afternoon. We anticipate another increase in precipitation mainly after midnight tomorrow night through Thursday AM with similar risks mentioned above.

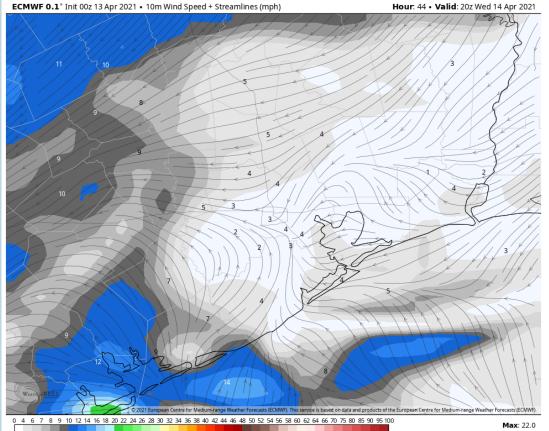

**Expecting the winds to veer out of the SSE at 10-15** MPH sustained, gusting at times up to 15-20 MPH in the AM hours. Wed PM winds are expected to weaken down to 5-10 MPH sustained.

Temps will be in the mid-70s over the Boarding Stations.

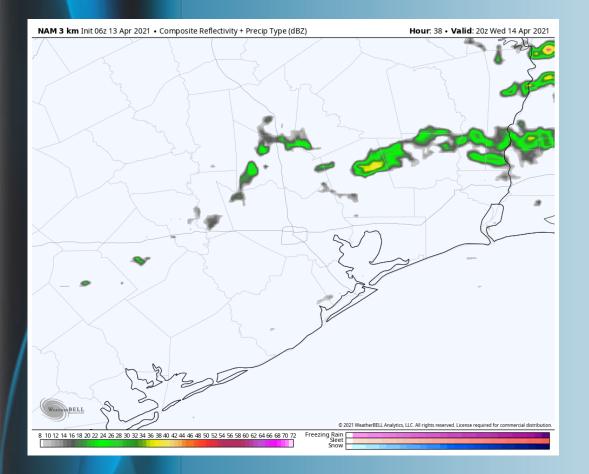

#### No fog expected Wednesday night.

#### Long-Range Forecast Discussion

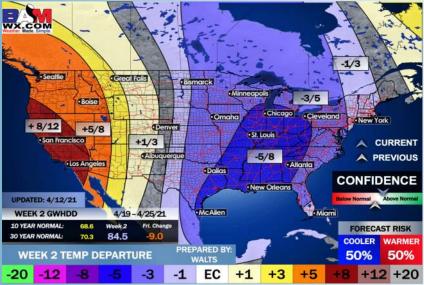

- Precipitation chances increase largely across the area mid to late week to early weekend. Temperatures will look to start trending cooler ahead with the increase in precip chances.
- Precipitation looks to continue to be above normal in week 2 across the area, while temps look to stay well below normal.
- Expectations are for a below normal pattern for precipitation risk for the Houston area for weeks 3 + 4.
   Temperatures are anticipated to average out to near normal for this time frame.
