Short-Term Forecast Discussion

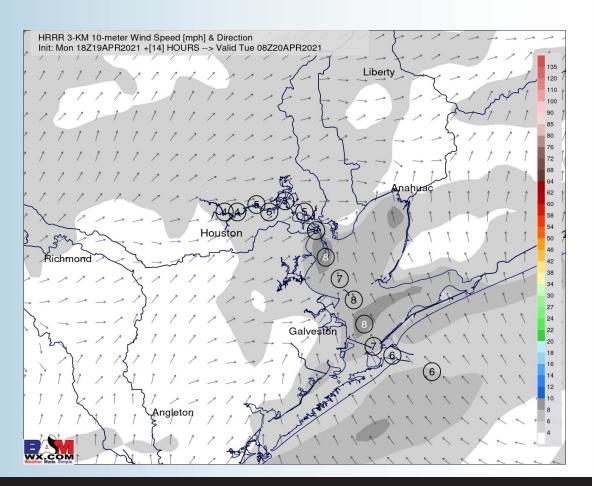

➤ As discussed this AM, a weak area of energy moving in will introduce some very light and isolated rain chances after 6-7 PM (10-20%), and into ~2am CT Tuesday, but moisture looks mostly north and overall limited with this.

- Winds will be quite weak tonight, expected out of the Southeast at 4-8 MPH sustained.
- Low temps tonight will drop down into the low to mid 60s.
- Fog is not favored for tonight into Tues AM.

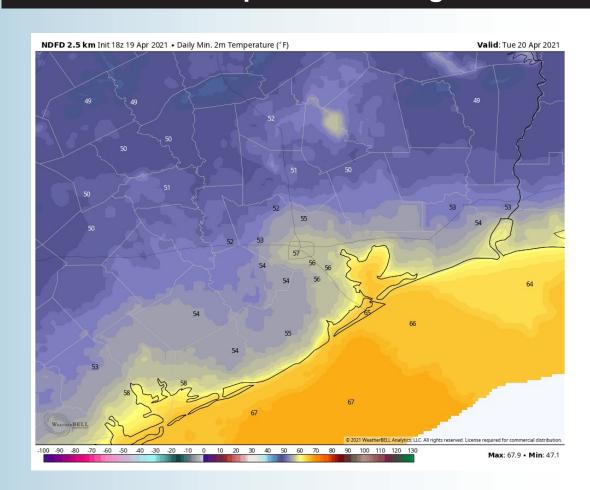

Simulated Radar Snapshot (12 AM CT)

Sustained Winds (3 AM CT)

Low Temperatures Tonight

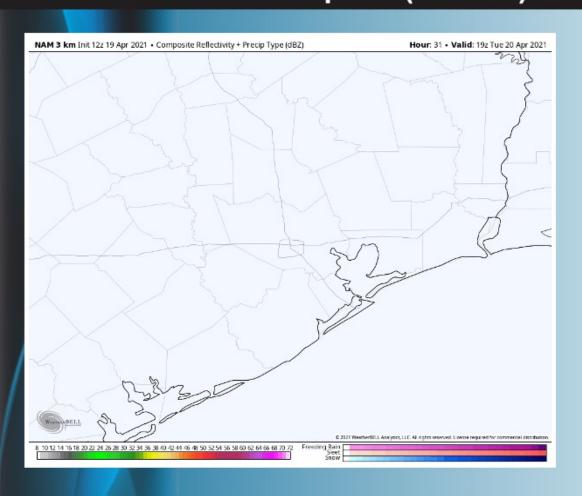

Short-Term Forecast Discussion

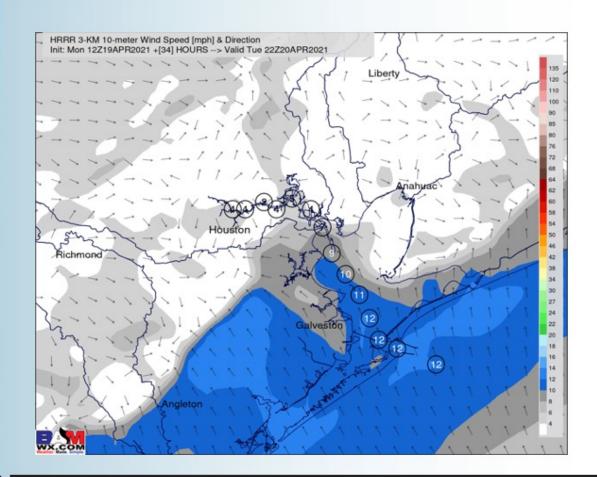

- Drier conditions expected Tuesday after our wave of energy exits in the pre-dawn hours.
- ➤ Calm and variable winds expected for much of the day, increasing to 8-13 MPH out of the S/SW in the evening hours. Timing of the front will be key, but eyeing our next front to move into the area in the 11 PM Tue – 2 AM Wed timeframe, shifting winds more out of the north at 10 – 20 MPH.
 - Tuesday's temps will be on the increase out ahead of the front, rising into the lower to mid 70s.
 - No fog expected Tuesday night.

Simulated Radar Snapshot (2 PM CT)

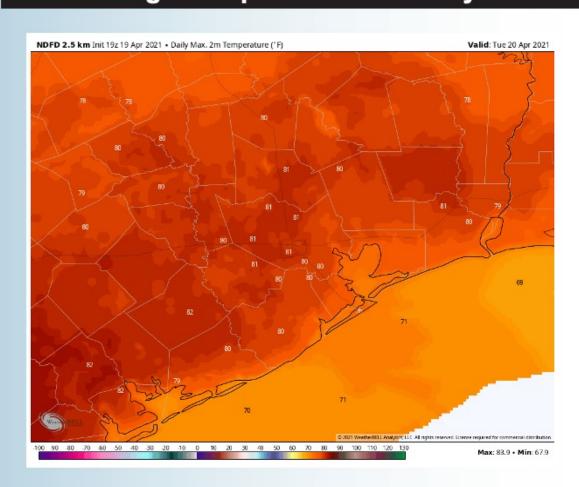

Tuesday, April 20th, 2021

Sustained Winds (5 PM CT)

High Temperatures Tuesday

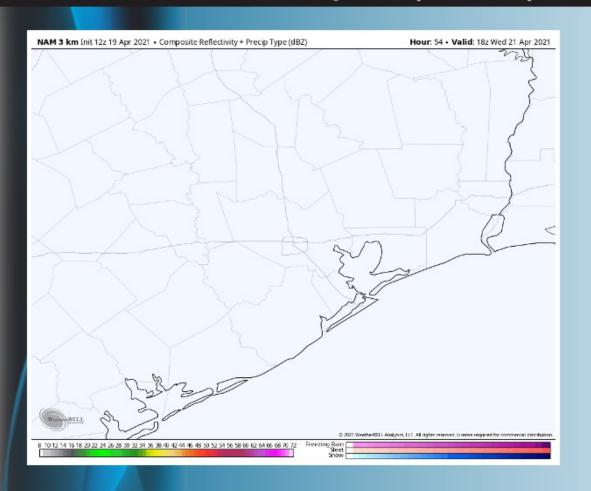

Short-Term Forecast Discussion

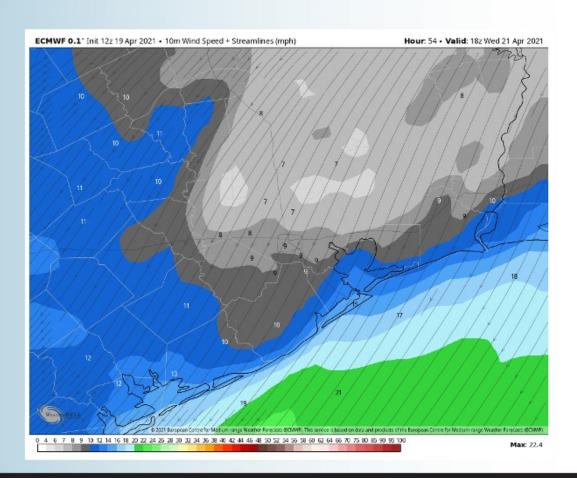

- Drier conditions expected to continue Wednesday.
- ➤ Winds will be out of the NE, 15-20 MPH sustained through noon, dropping to 8-13 MPH into the afternoon to evening hours with gusts at 15-20.
- Wednesday's temps will drop down to the upper 60s to near 70 for a high for our stations.
 - No fog expected Wednesday night.

Simulated Radar Snapshot (1 PM CT)

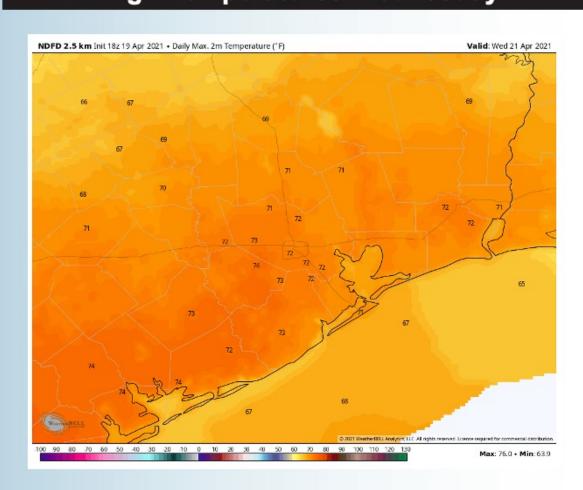

Wednesday, April 21st, 2021

Sustained Winds (1 PM CT)

High Temperatures Wednesday

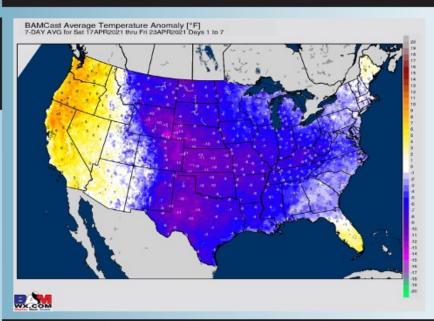

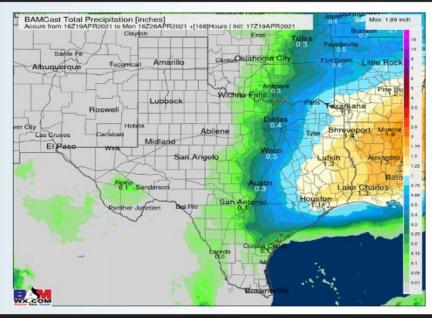

Monday, April 19, 2021

Week 1 Forecast

Long-Range Forecast Discussion

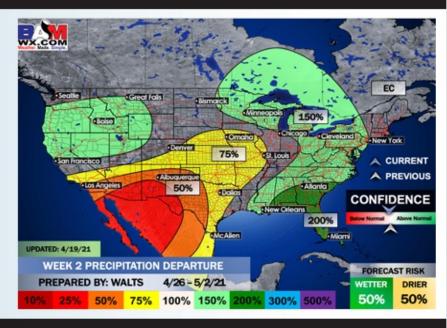

- below normal over the next week. The week starts out quiet down here, eyeing our best precip chance to come Friday later this week, turning drier into the weekend.
- The week 2 period will see a warm up to seasonable to above normal temperatures.
 Best precipitation will stay just east in the Deep South with near normal precipitation likely.
 - We expect that a warmer pattern develops as we work into May with the potential for drier risks to re-establish under a ridge of high pressure.

Week 2 Forecast

Weeks 3/4 Forecast
