- ➤ We will be quite windy on Wednesday, with sustained winds out of the SE expected at 20-25 MPH, gusting at times up to 30-35 MPH.

High Temps Wednesday

Long-Range Forecast Discussion

- Warmer than normal temps expected over the next week, watching for a cold front later on Thursday for our next precipitation chance (north). Outside of this chance, precip chances will be very quiet.
- Temps likely average out close to normal for the week 2 period...as we roll forward here as well, we would anticipate near-normal to slightly below normal moisture chances.
 - The normal temps
 continue in the weeks
 3-4 period, with
 precipitation chances
 not looking to climb
 above normal, but stay
 rather normal to
 inactive at times.
