## Short-Term Forecast Discussion

- Expecting quiet weather the rest of the day.
- Winds will continue coming out of the NE, sustained at 10-15 MPH, gusting at times to 15-20 MPH.
- Temps tonight fall back into the mid to upper 60s
  - *No fog expected this evening.*

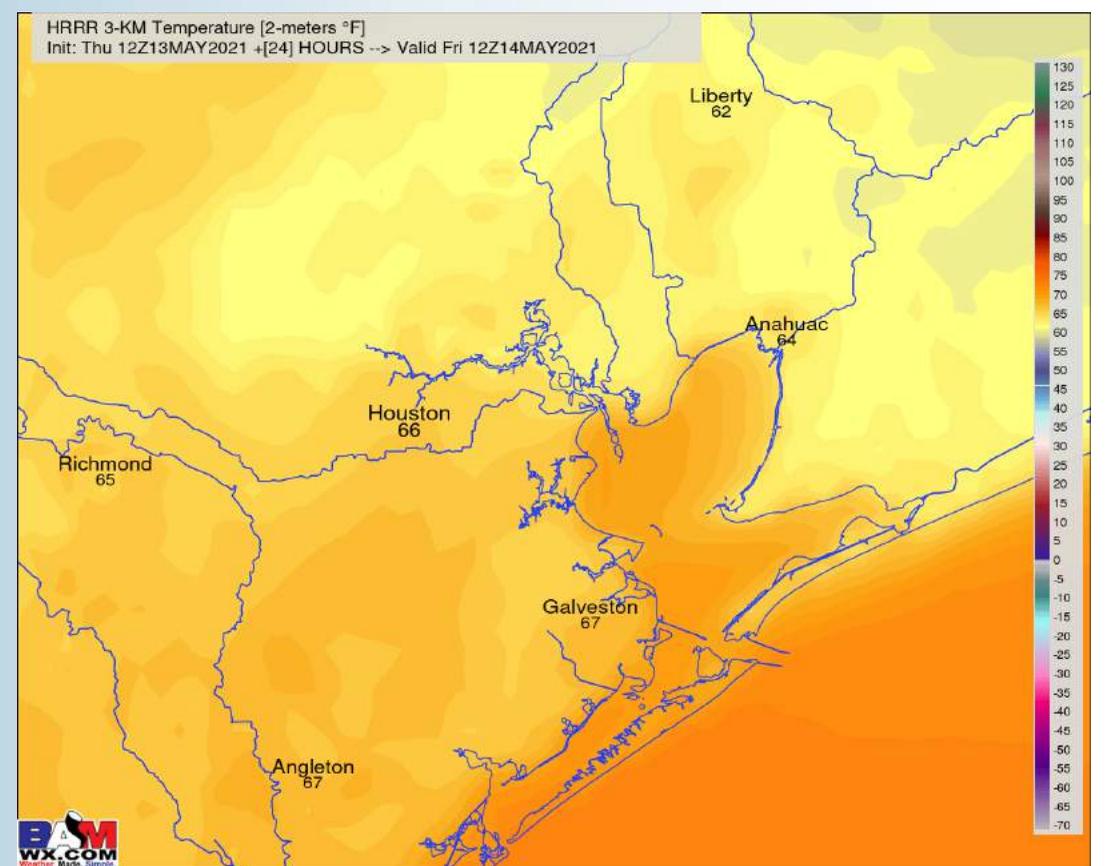

## Sustained Winds (9 PM CT)

## Simulated Radar Snapshot (9 PM CT)

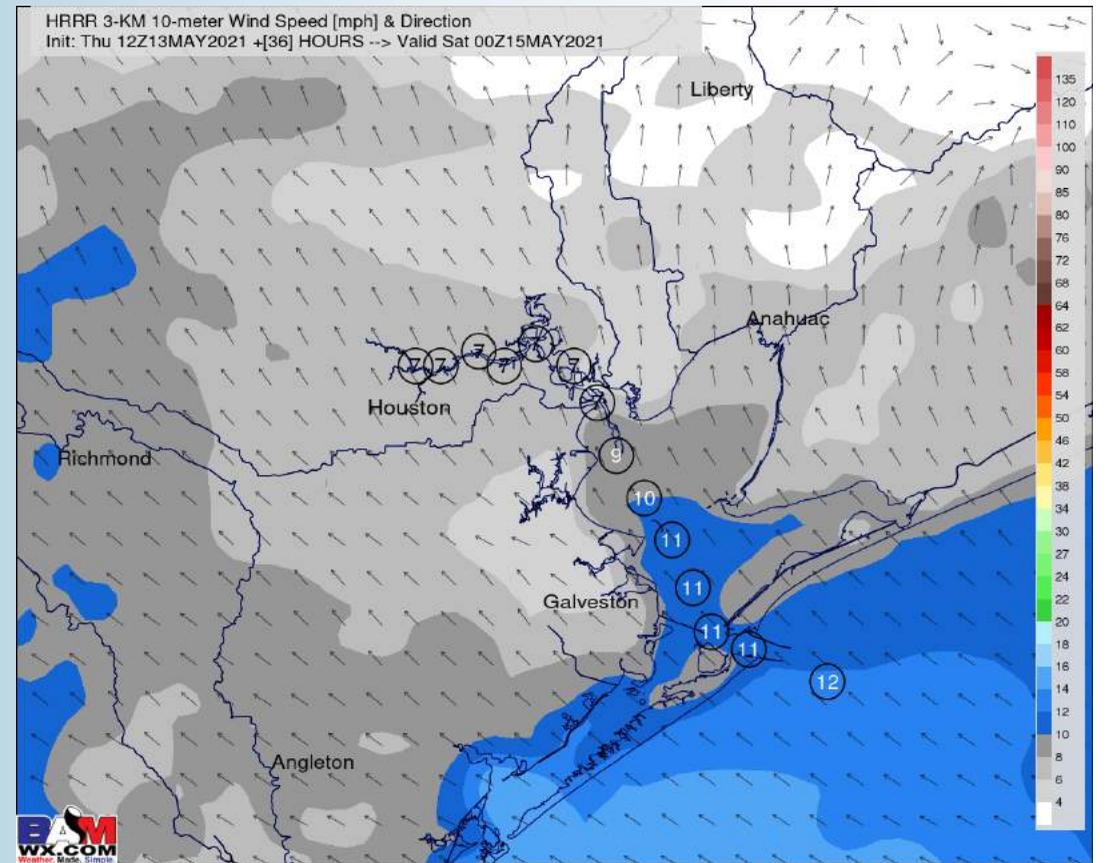

## Low Temps This Evening

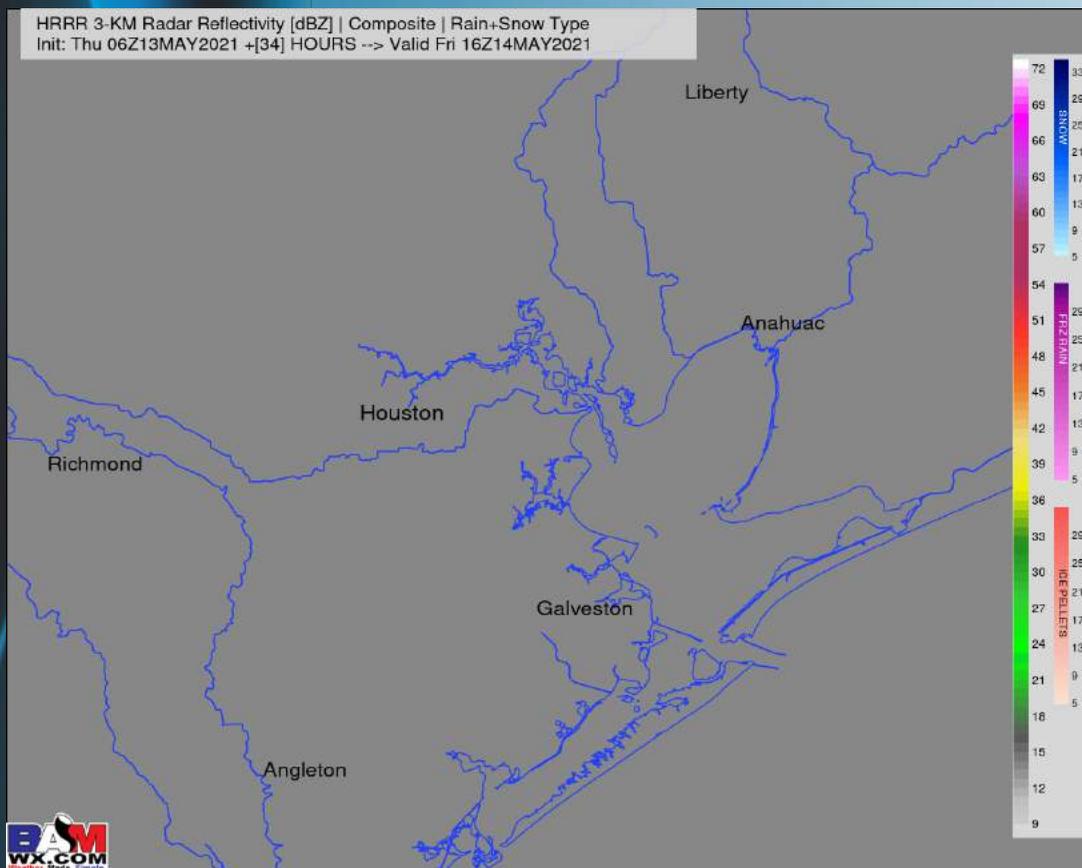

## Short-Term Forecast Discussion

- Favoring a quieter day Friday
- Our winds will gradually shift from the NE to SE on the day Friday. Expecting winds to turn more Easterly around ~Noon and more Southeasterly by sundown. Much of the day will see sustained winds 8-13 MPH
- Highs will be in the mid to upper 70s for Friday
  - *No fog expected Friday*

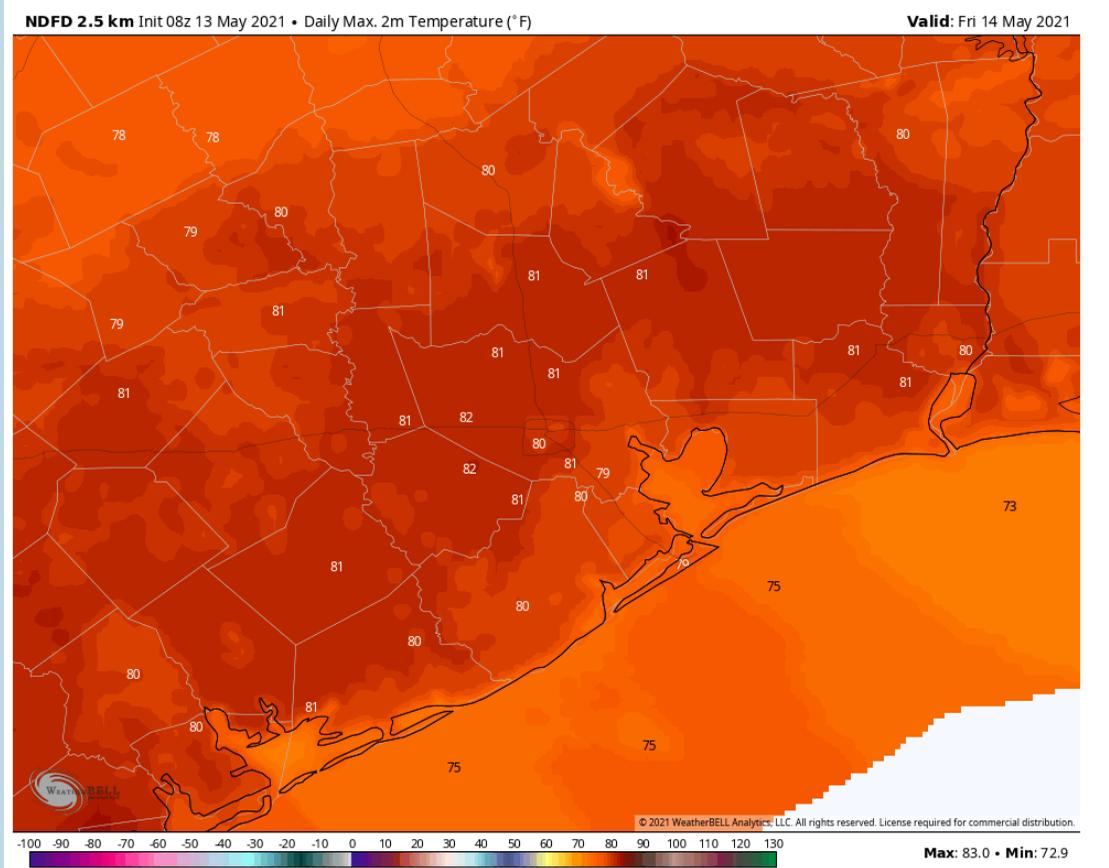

## Sustained Winds (7 PM CT)

## Simulated Radar Snapshot (11 AM CT)

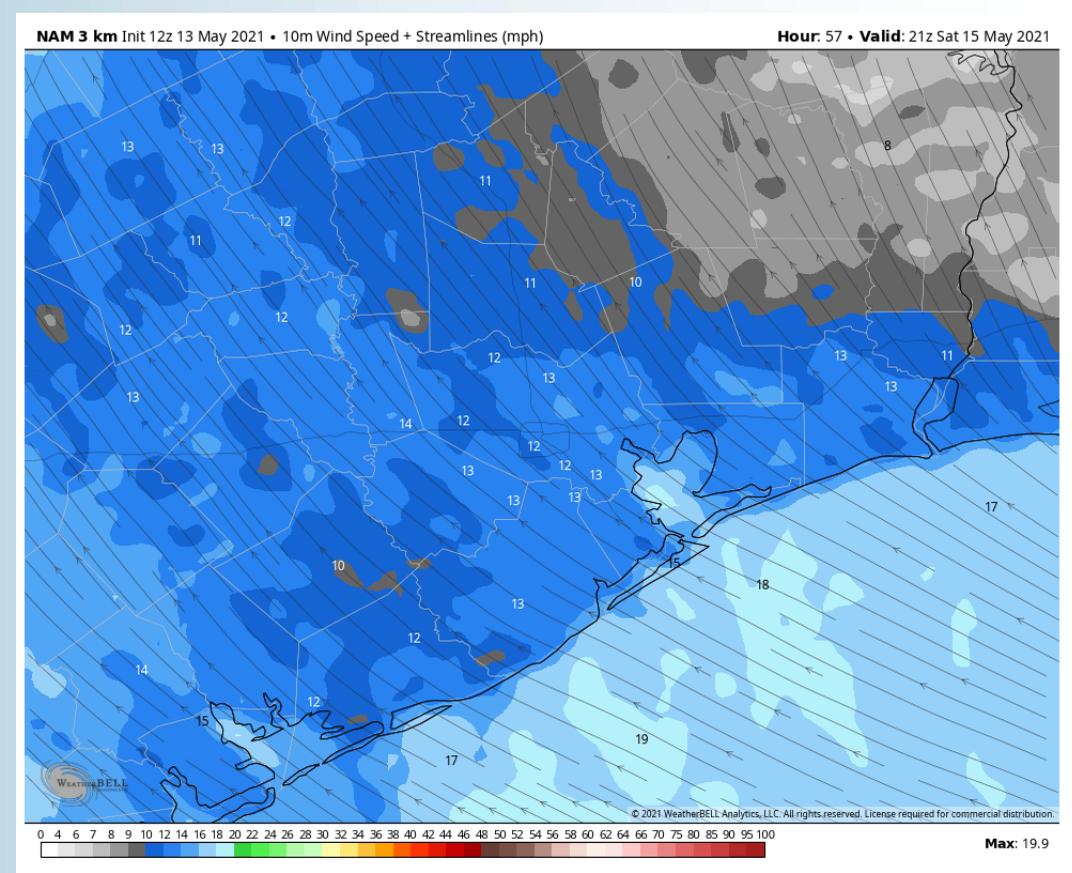

## High Temps Friday

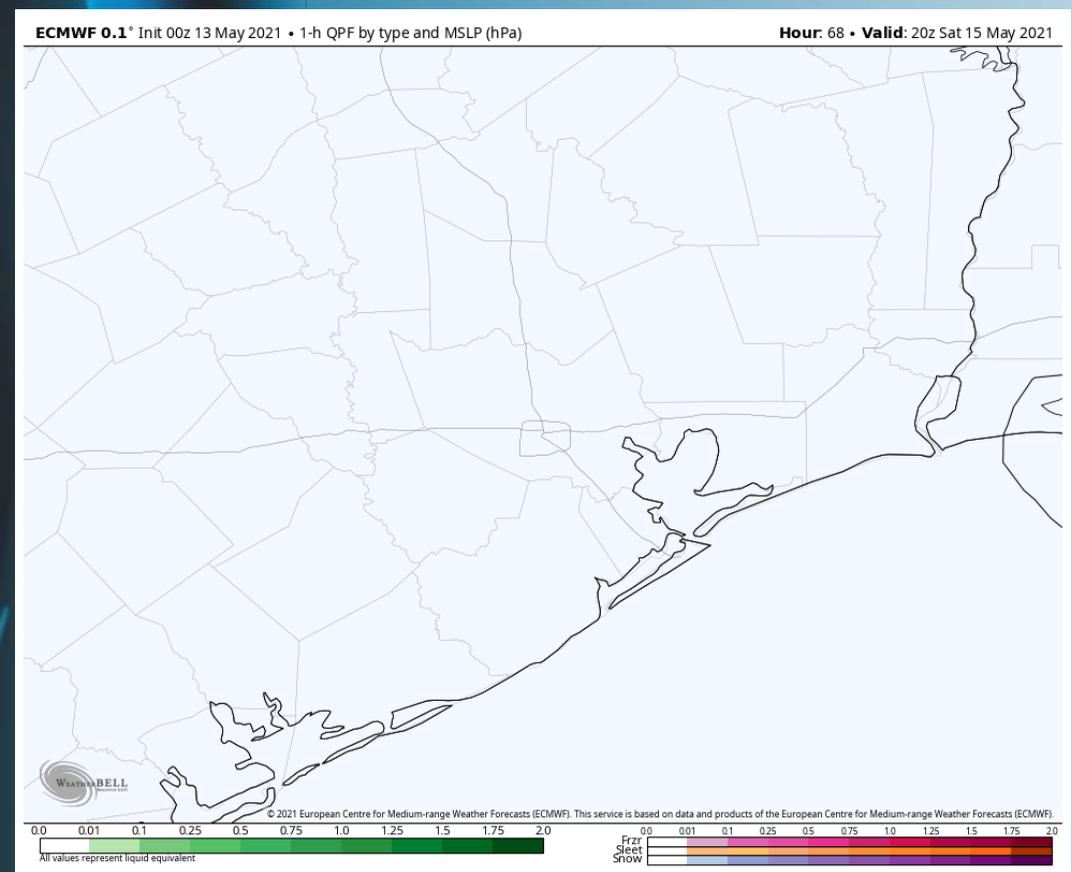

## Short-Term Forecast Discussion

- Another quiet day on Saturday before precip chances increase on our Sunday
- Winds Saturday will be out of the SE, sustained 13-18 MPH with gusts 18-23 MPH possible
- Highs should top out in the upper 70s / lower 80s
  - *No fog expected Saturday*

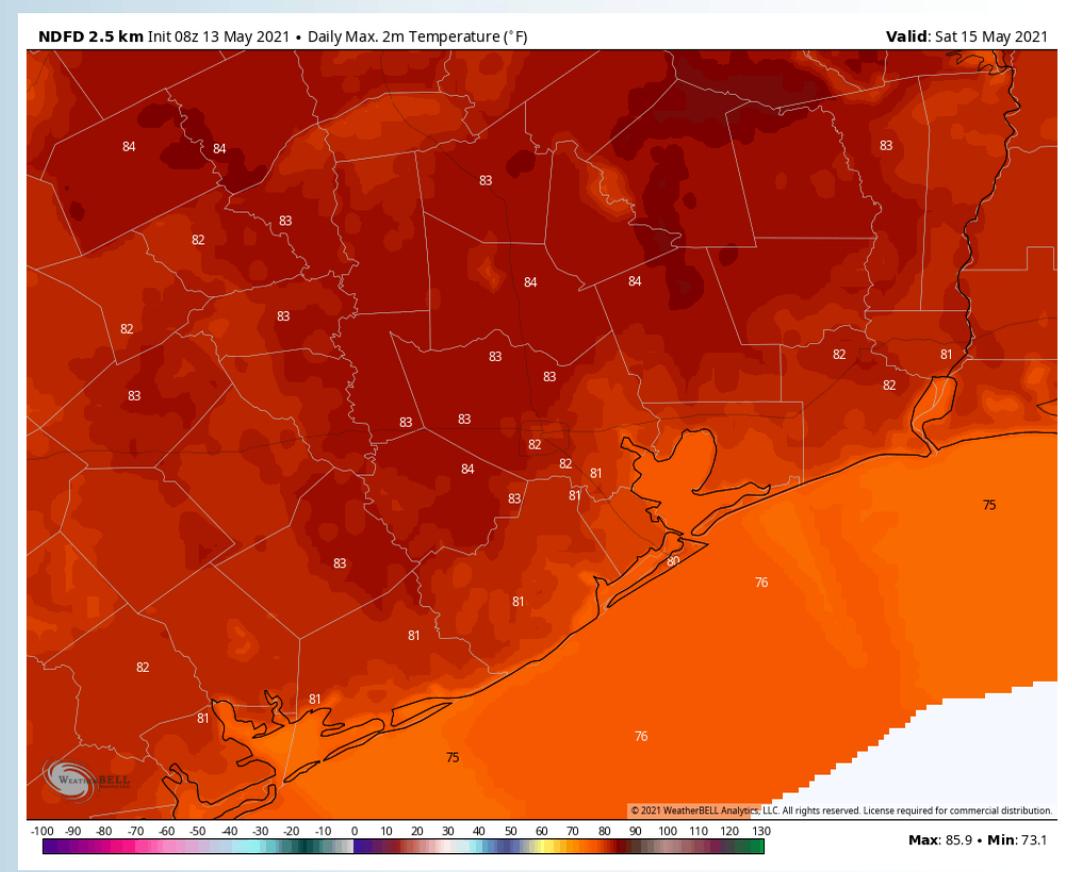

## Sustained Winds (4 PM CT)

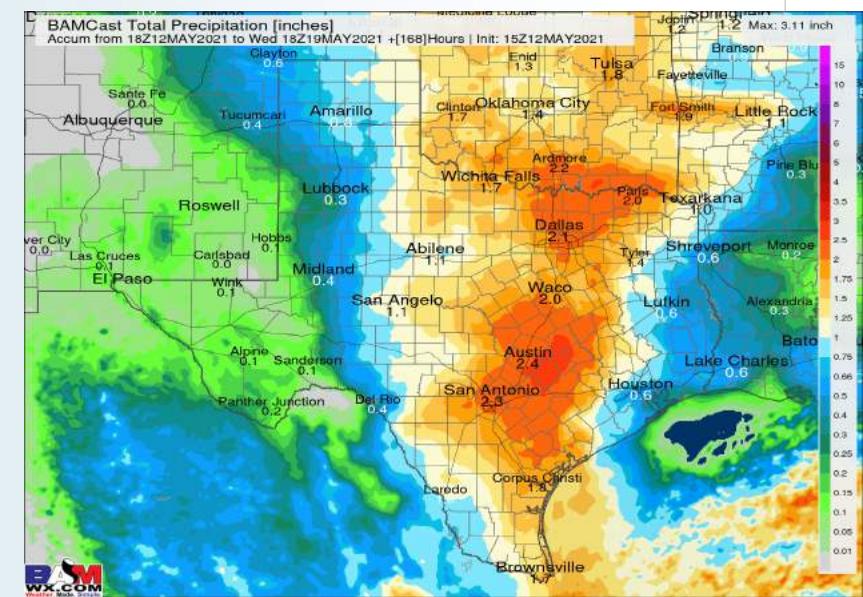

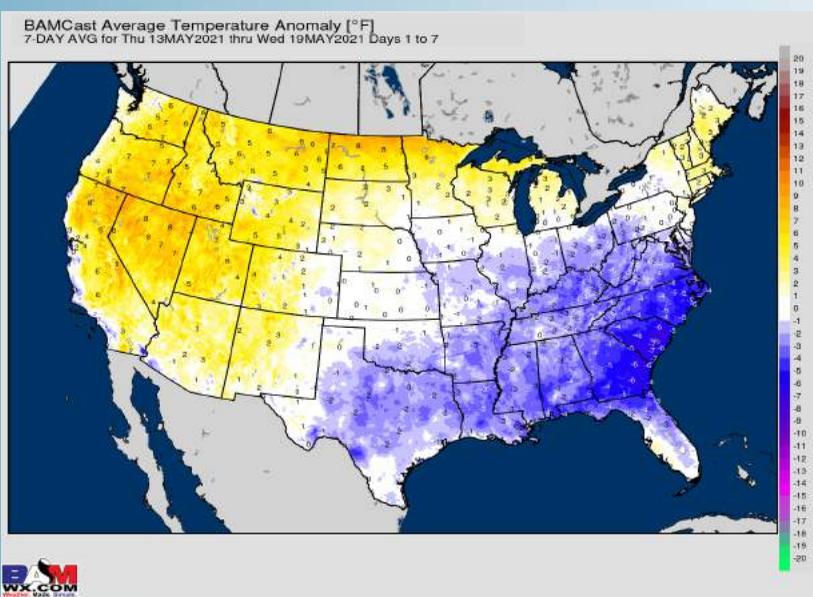

## Simulated Radar Snapshot (3 PM CT)

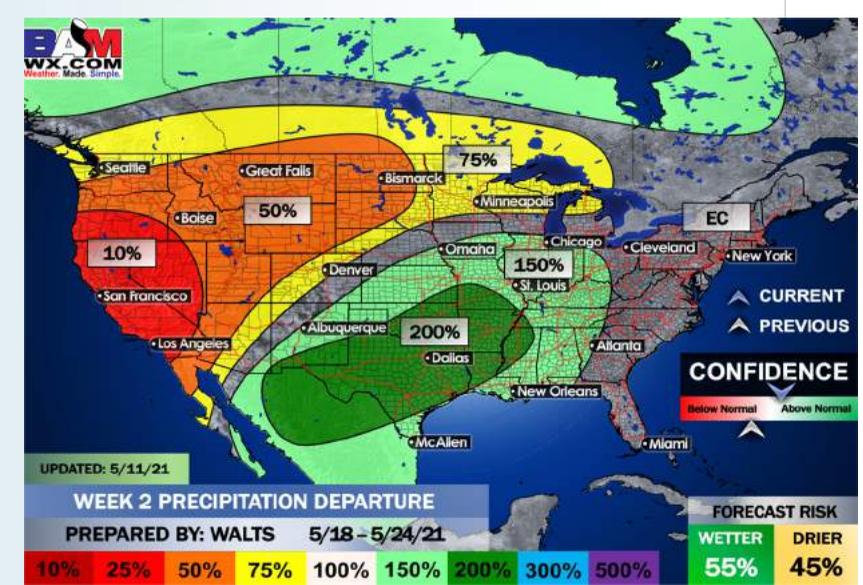

## High Temps Saturday

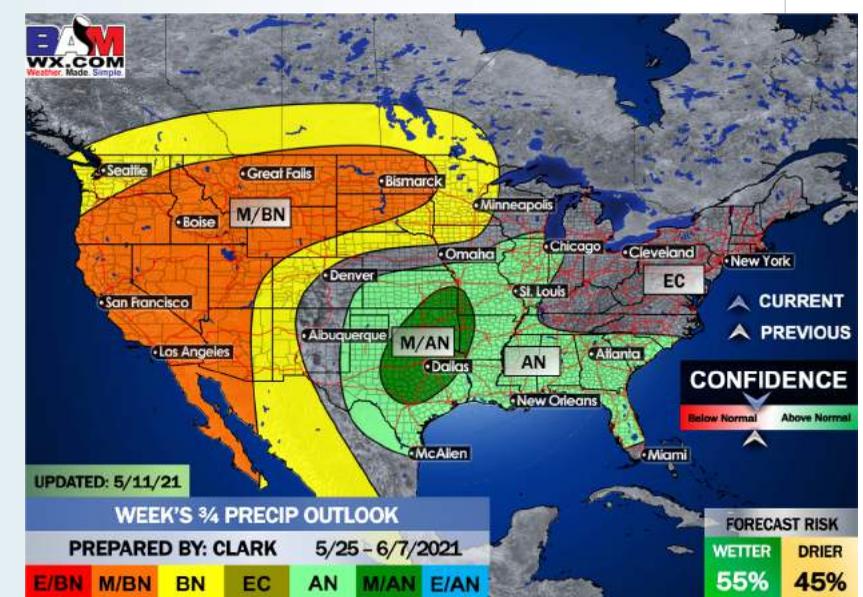

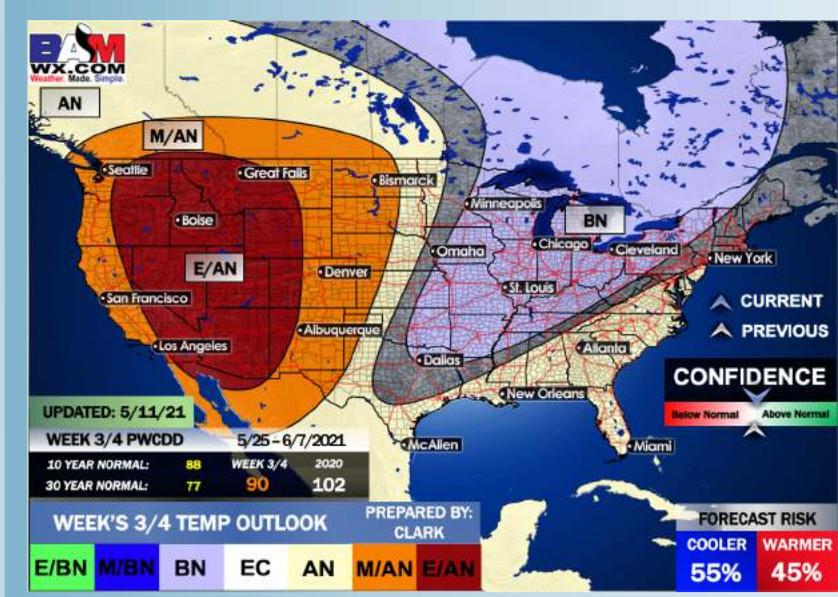

## Week 1 Forecast

## Week 2 Forecast

## Weeks 3/4 Forecast

### Long-Range Forecast Discussion

- Precip chances will become quieter late work-week, but eyeing additional chances late weekend and into early next week. Temps look to average slightly below average for this time of year.
- Working into late-May, we are favoring normal/slightly below normal temps for this time of year and for precipitation to stay on the active side of things. Increased moisture risks likely continue across the Southern US.
- The weeks <sup>3</sup>/<sub>4</sub> (Late May-Early June) period likely features more above normal temperatures and above normal moisture, similar to our current week 2 thoughts.
