#### **Short-Term Forecast Discussion**

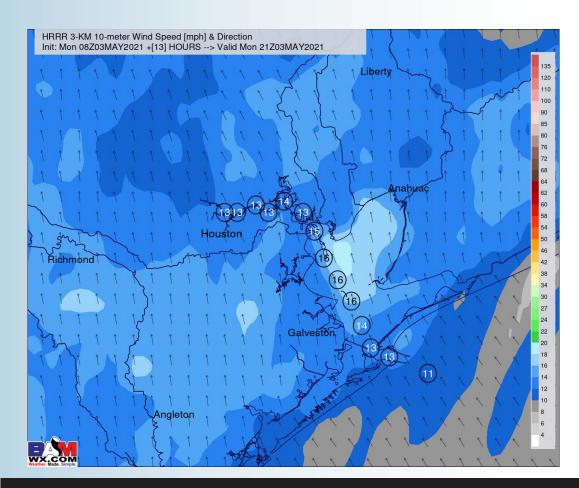

# ➤ Today will feature much drier weather than what we've seen over the past few days across the area. Keeping an eye on the mid to late AM hours for an isolated lighter shower. Chances are only favored to be ~10%. Drier PM.

- Today's winds looks similar to yesterday's and will continue coming out of the S / SE, 13-18 MPH with gusts to 20-25 MPH.
- High temps are expected to be in the mid-toupper 70s over the open water, much warmer inland.
  - No fog expected tonight.

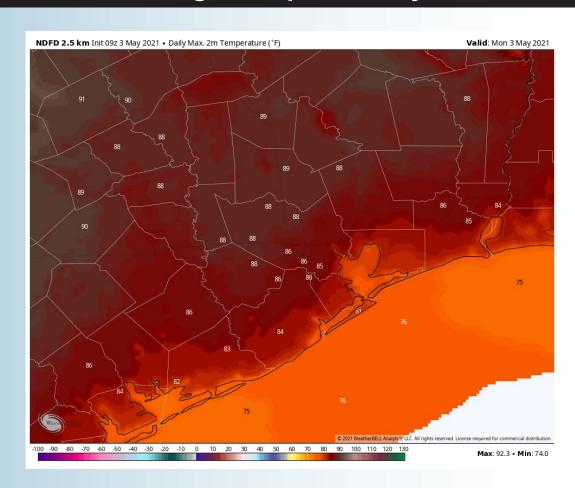

#### **Simulated Radar Snapshot (12 PM CT)**

#### **Sustained Winds (4 PM CT)**

#### **High Temps Monday**

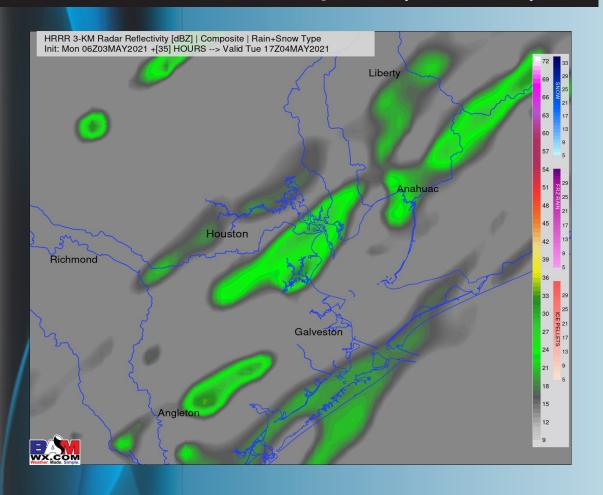

#### Tuesday, May 4th, 2021

#### **Short-Term Forecast Discussion**

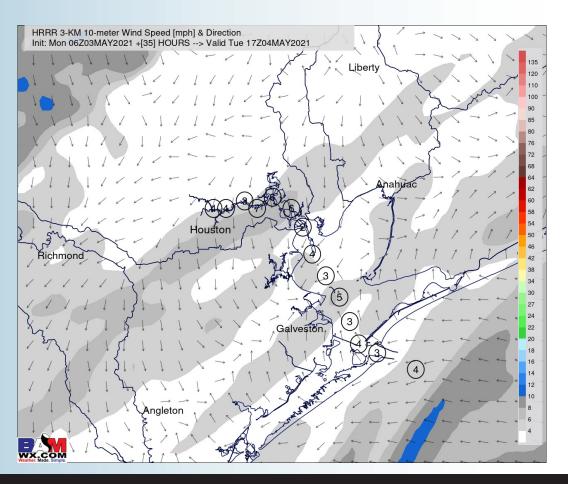

## ➤ A few isolated showers can't be ruled out Tuesday morning, but the better chance looks to come along a cold front from ~12-5pm from NW to SE. A few thunderstorms with lower visibility can't be ruled out, despite the chances for precipitation being rather scattered.

- Winds Tuesday morning look to continue to blow out of the S at 13-18 MPH sustained, gusting at times to 20-25 MPH. However, a gradual shift will occur in the winds around noon tomorrow through the afternoon out of the N, dropping to around 5-10 MPH sustained as well.
  - Highs will sit in the mid 70s over open water, slightly warmer in-land.
    - No fog expected Tuesday night.

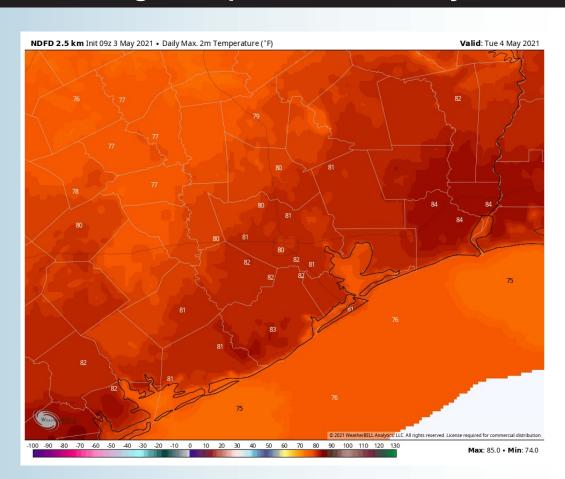

#### **Simulated Radar Snapshot (12 PM CT)**

#### **Sustained Winds (12 PM CT)**

#### **High Temperatures Tuesday**

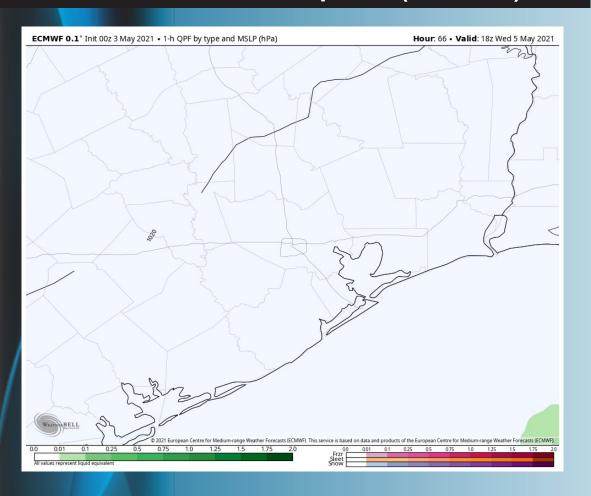

#### **Short-Term Forecast Discussion**

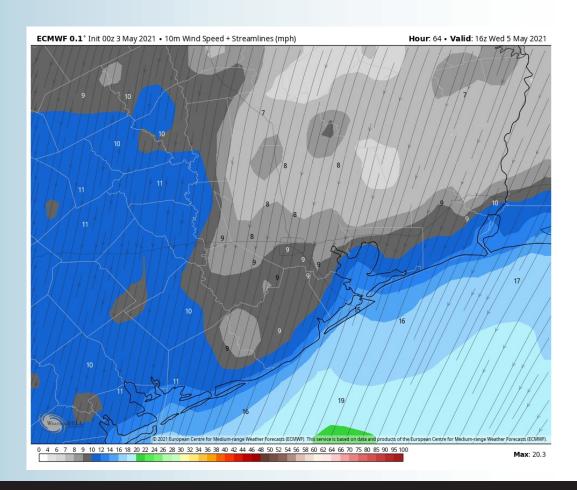

- Wednesday is expected to be a dry day across the area.
- Winds Wednesday will start out 10-15 MPH sustained out of the N / NNE in the morning, decreasing to 5-10 MPH into the PM hours.
- Highs will sit in the mid 70s over the open water, slightly warmer in-land.
  - No fog expected Wednesday night.

#### **Simulated Radar Snapshot (1 PM CT)**

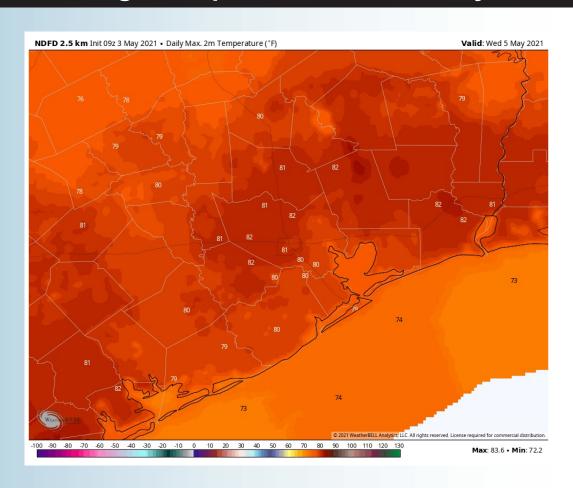

#### Wednesday, May 5th, 2021

#### **Sustained Winds (11 AM CT)**

#### **High Temperatures Wednesday**

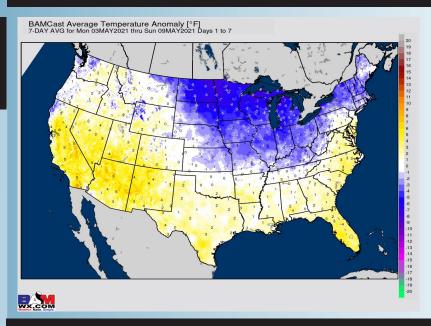

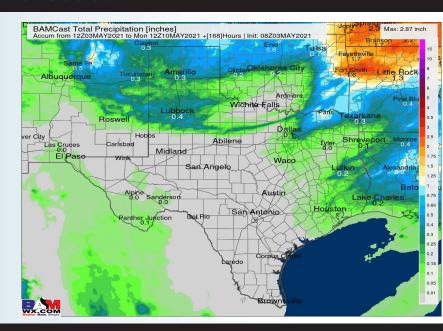

### Long-Range Forecast Discussion

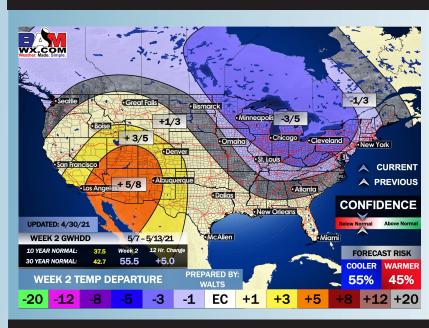

- Near normal temps expected over the next week, moisture risks look rather limited and further off to the north.
- Working into Mid-May, we are favoring slightly above normal temps for this time of year and for precipitation to stay on the active side of things. Increased moisture risks likely continue across the Southern US.
  - The weeks ¾
    (Mid/Late May) period likely features more normal conditions for SE TX. Temps and precipitation are favored to be near normal for this time of year.

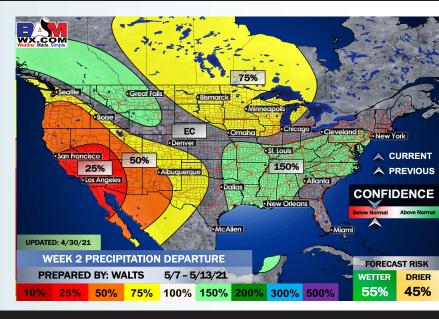

#### **Week 1 Forecast**

#### **Week 2 Forecast**

#### Weeks 3/4 Forecast
