## Long-Range Forecast Discussion

- Temperatures look to run at right about normal the next 7 days. Once we work into early next week, we are in favor of a bit more of an active pattern with increased chances compared to the hit and miss chances we've seen the past few days.
- Week 2 is anticipated turn more active in precipitation, with temps staying overall slightly below normal across the area.
- The weeks 3/4 (1<sup>st</sup> half of July essentially) period likely features more seasonable to cooler than normal temperatures, while precipitation looks to continue running above normal in this period as well.
