Short-Term Forecast Discussion

- Today will be another wet day with precip chances for much of the day. Going to be very hard to get several hours of drier time. Reduced visibility via rain will certainly be possible. Overall light to moderate in intensity.
- Winds at the boarding station look to be around 18 – 23 MPH sustained out of the SE with a few gusts up to 25 MPH possible. Eyeing mid-day (1-4 PM) for the best window of sustained winds at the boarding station of 20-25 MPH with gusts 25-30 MPH not off the table. Through the day, locally stronger winds within heavy rain will be possible.
- High temps should work into the mid 80's F.
- *No fog expected for today.*

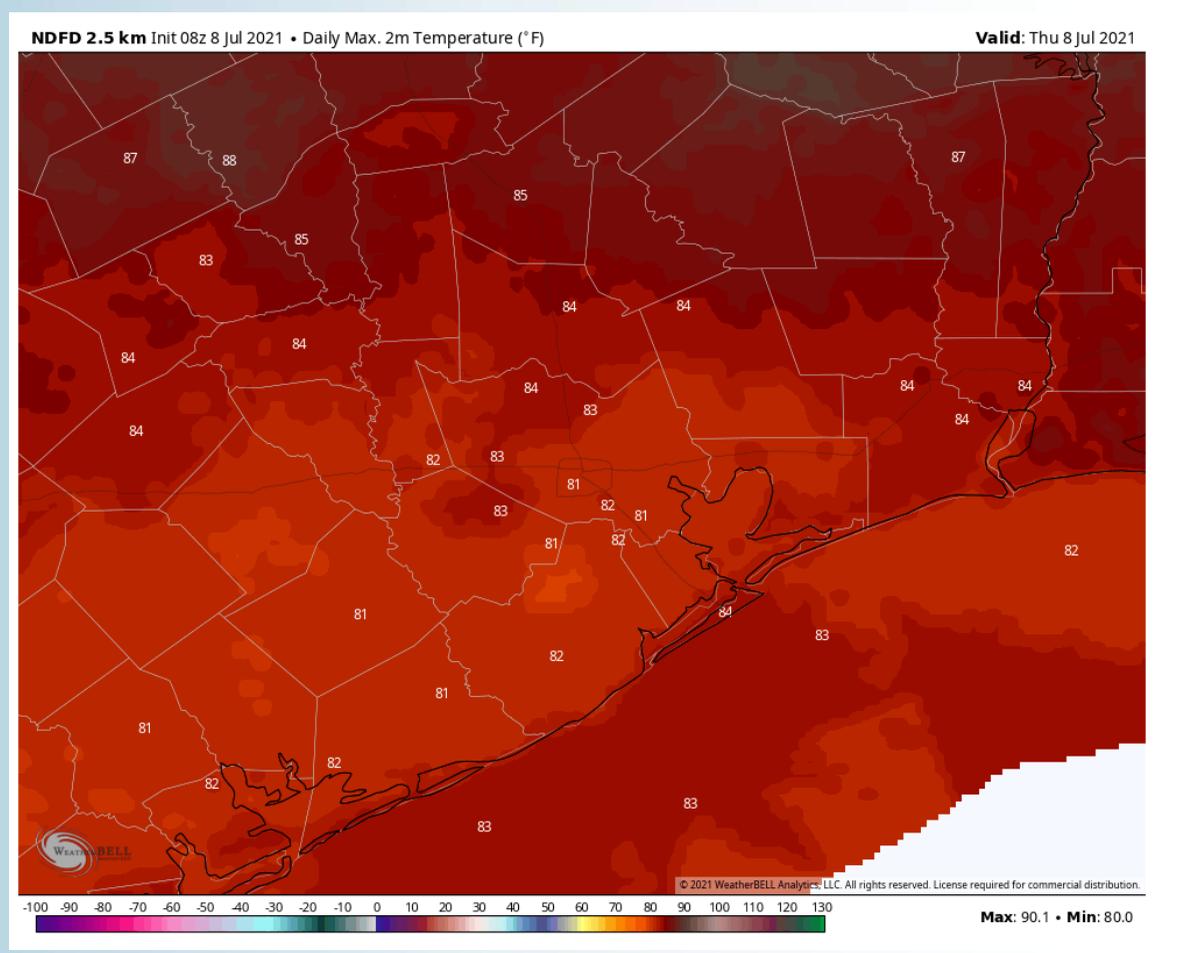

Sustained Winds (1 PM CT)

Simulated Radar Snapshot (3 PM CT)

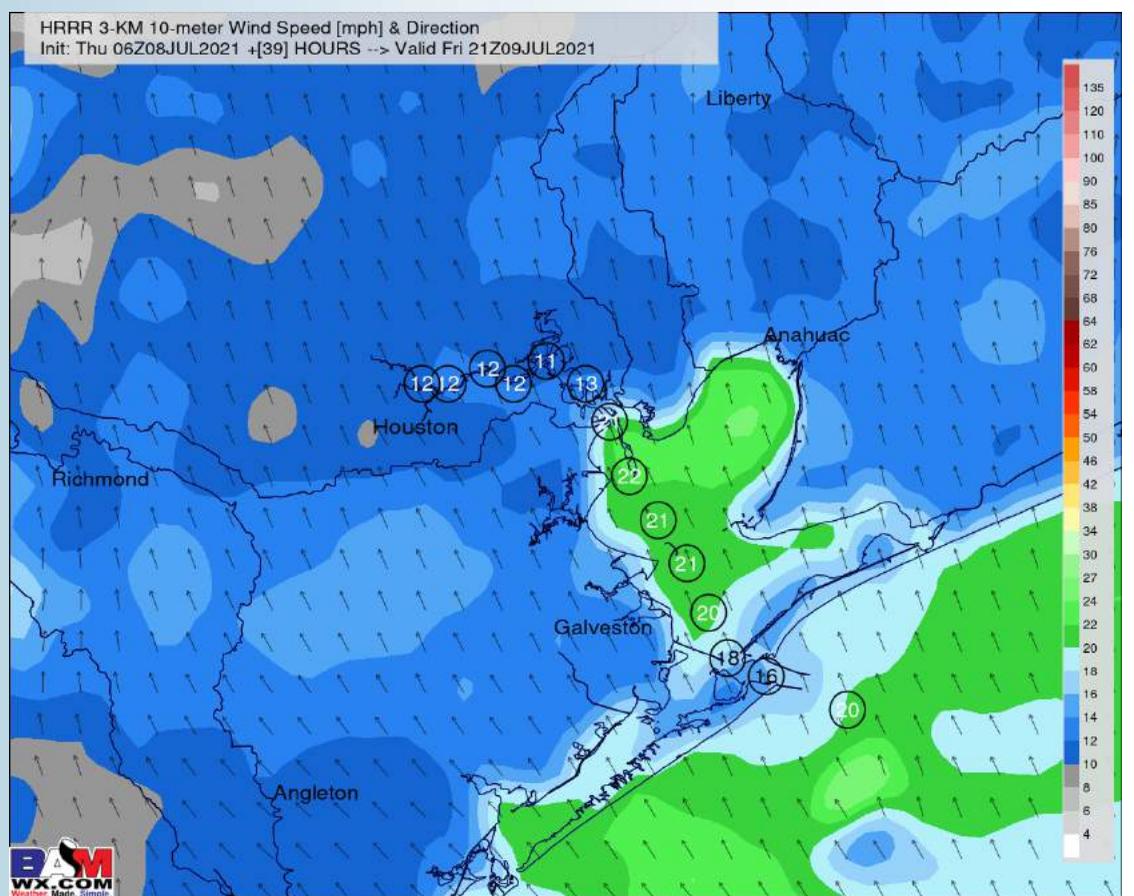

High Temps Today

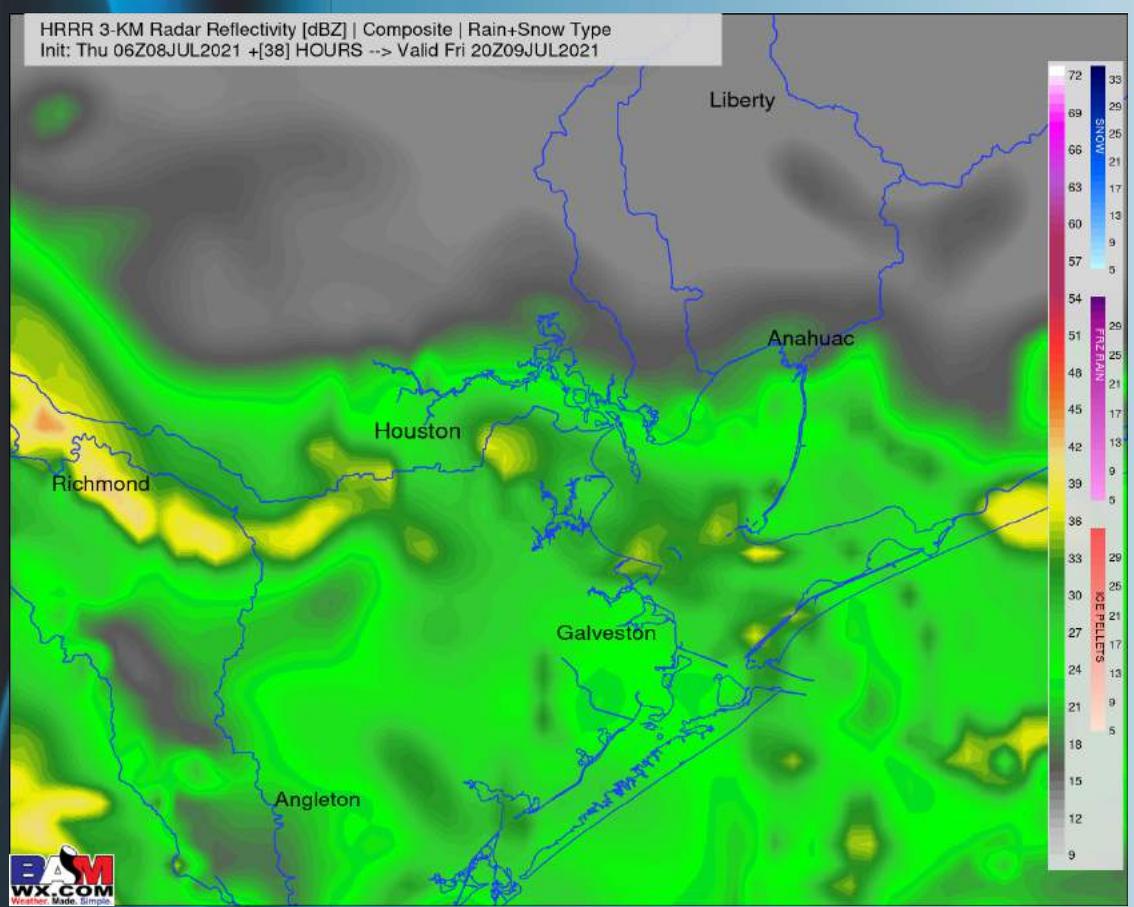

Short-Term Forecast Discussion

- Friday will be yet another day containing precipitation chances. Best opportunity looks to come in the first half of the day with the potential for things to become a bit more scattered into the late PM/ evening hours.
- Forecasted winds have increased for Friday- expecting SE winds 18-23 MPH with gusts 23-28 MPH.
- Mid 80s expected for most locations on the day Friday.
 - *No fog is anticipated for Friday.*

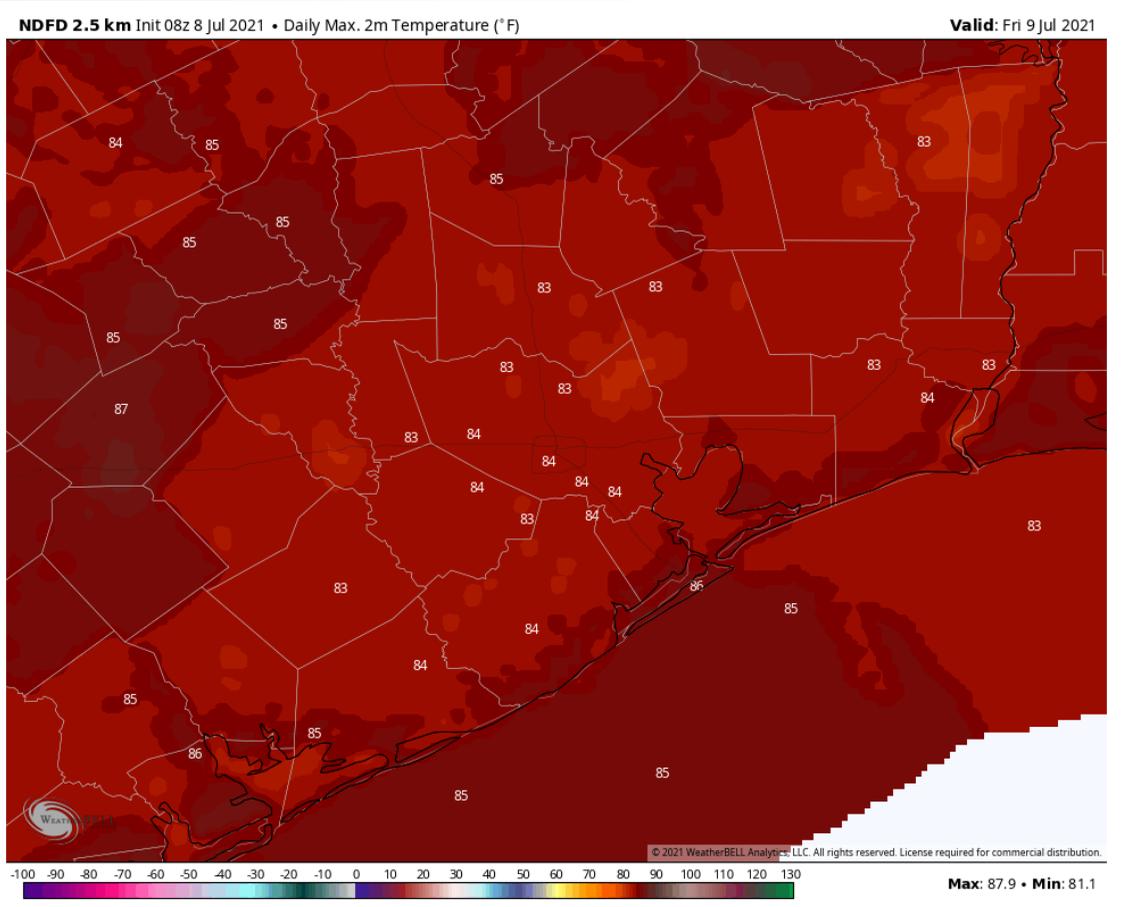

Sustained Winds (4 PM CT)

Simulated Radar Snapshot (1 PM CT)

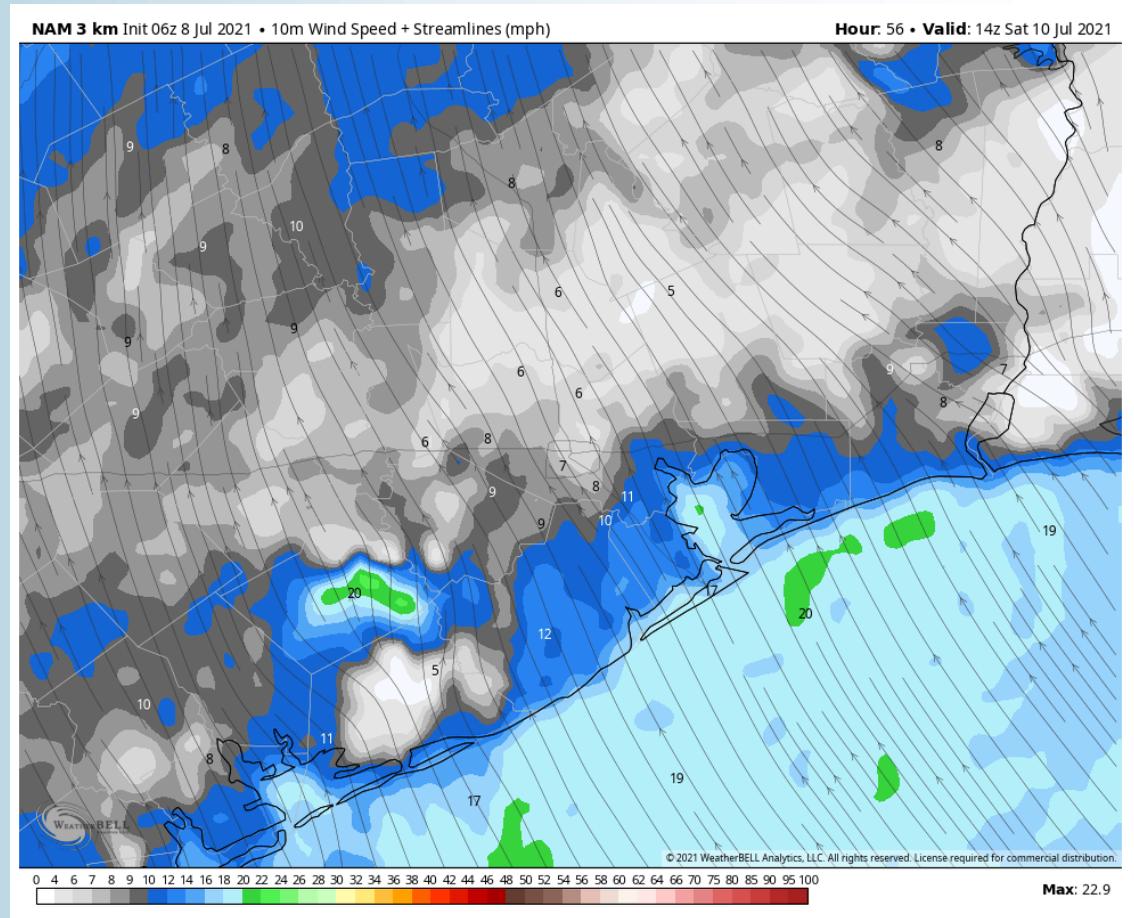

High Temps Friday

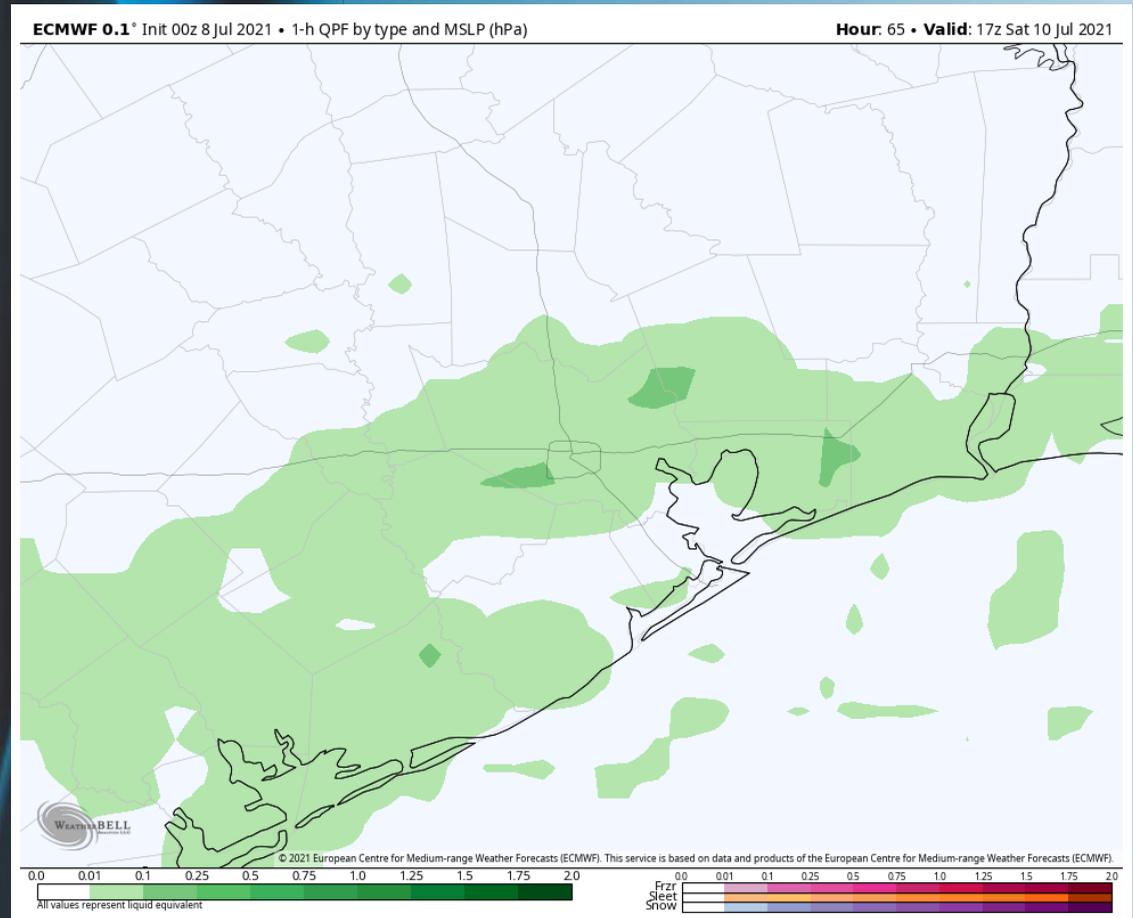

Short-Term Forecast Discussion

- Saturday is expected to see a bit more dry time, but scattered showers/ t-storms will be the call for much of the day. More breaks in the action are anticipated vs today (Thursday).
- Saturday winds are continued to favored to come out of the SE at 15-20 MPH with a few gusts higher.
- Upper 80s as high temps will be in the forecast for Saturday
 - *No fog is anticipated Saturday.*

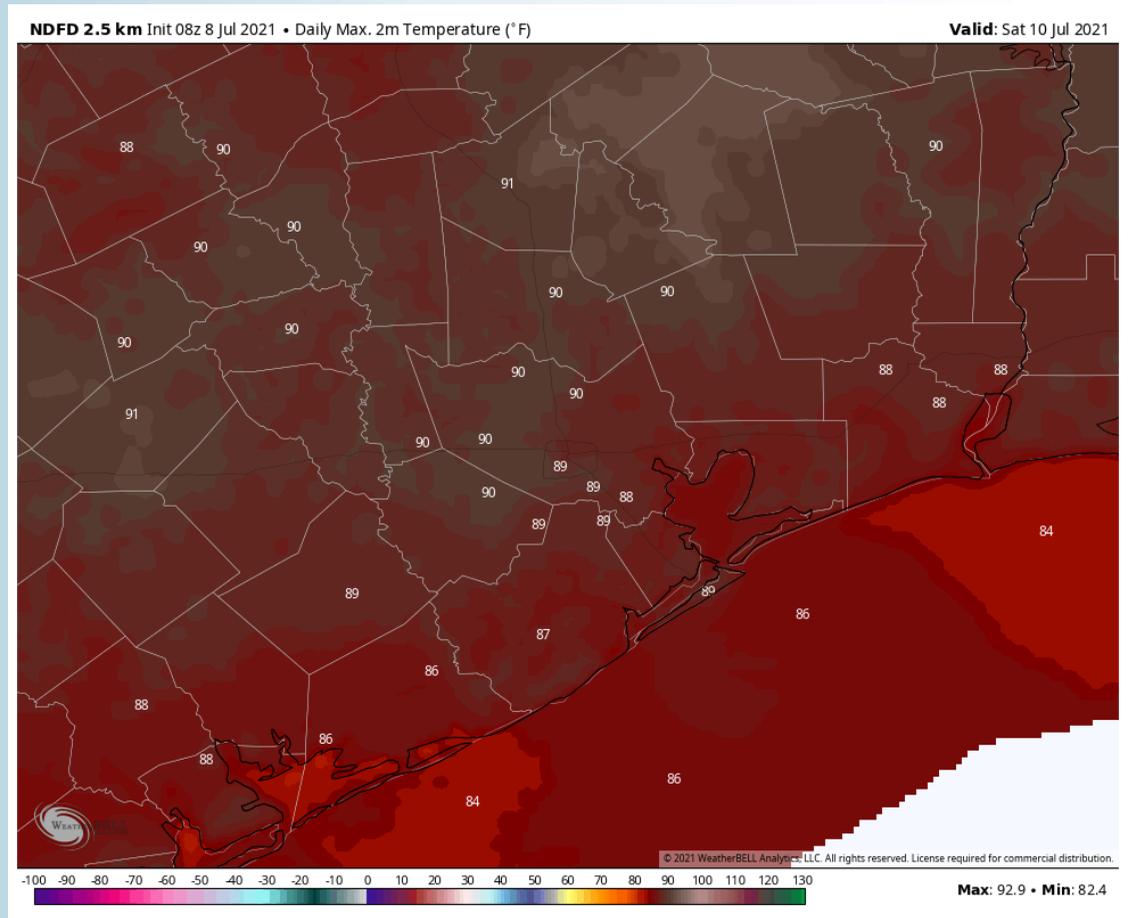

Sustained Winds (9 AM CT)

Simulated Radar Snapshot (12 PM CT)

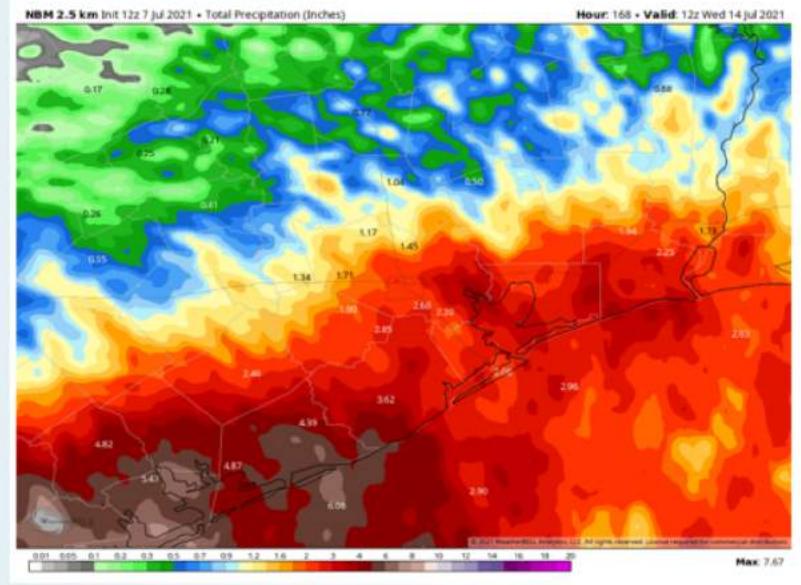

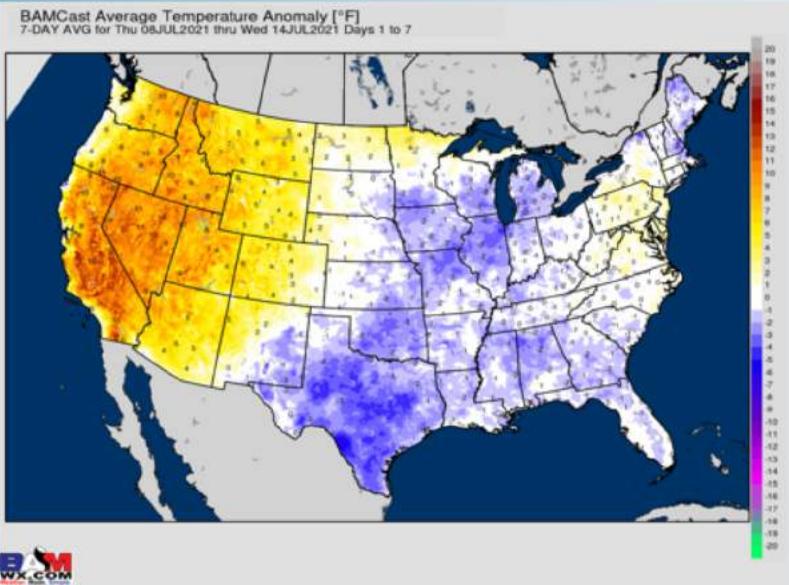

High Temps Saturday

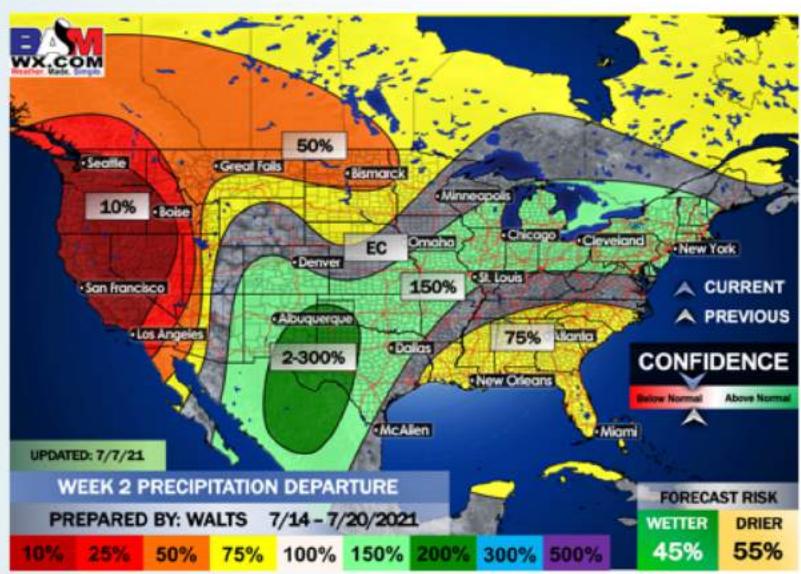

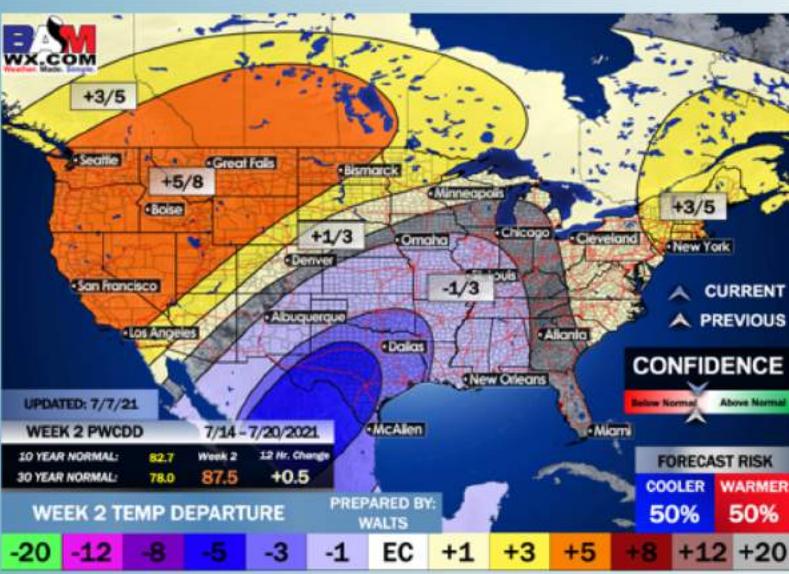

Long-Range Forecast Discussion

- The active period continues over the next 7 days with daily storm chances (chances later into the weekend/ early next week likely more scattered in nature vs the next 3 days).
Temperatures look to run below normal as well.
- Week 2 precipitation looks to be less active compared to this week/ recent weeks as an eastern/ southern ridge tries to expand.
Temperatures are still anticipated to run below normal.
- The weeks 3/4 (late July into August essentially) period likely features more seasonable to cooler than normal temperatures, while precipitation looks to continue running above normal in this period as well.
