## Short-Term Forecast Discussion

- Isolated hit and miss showers will be the call today in a very spotty nature. Cells will be light to moderate in nature and likely would not be over one particular area for very long, but could provide a quick shot at rain. While coverage of rain across the area is likely not very high at any given time, based on the spotty nature of these cells, any location will have the potential of seeing a cell work overhead at just about any point today.
- Winds are expected to come out of the S at 13-18 MPH with a few gusts up to 20 MPH possible at the boarding station. Strongest of the winds likely come before ~10 AM, as well as inside the heaviest pockets of precip.
  - Upper 80s as high temps are expected today.
  - *No fog is anticipated.*

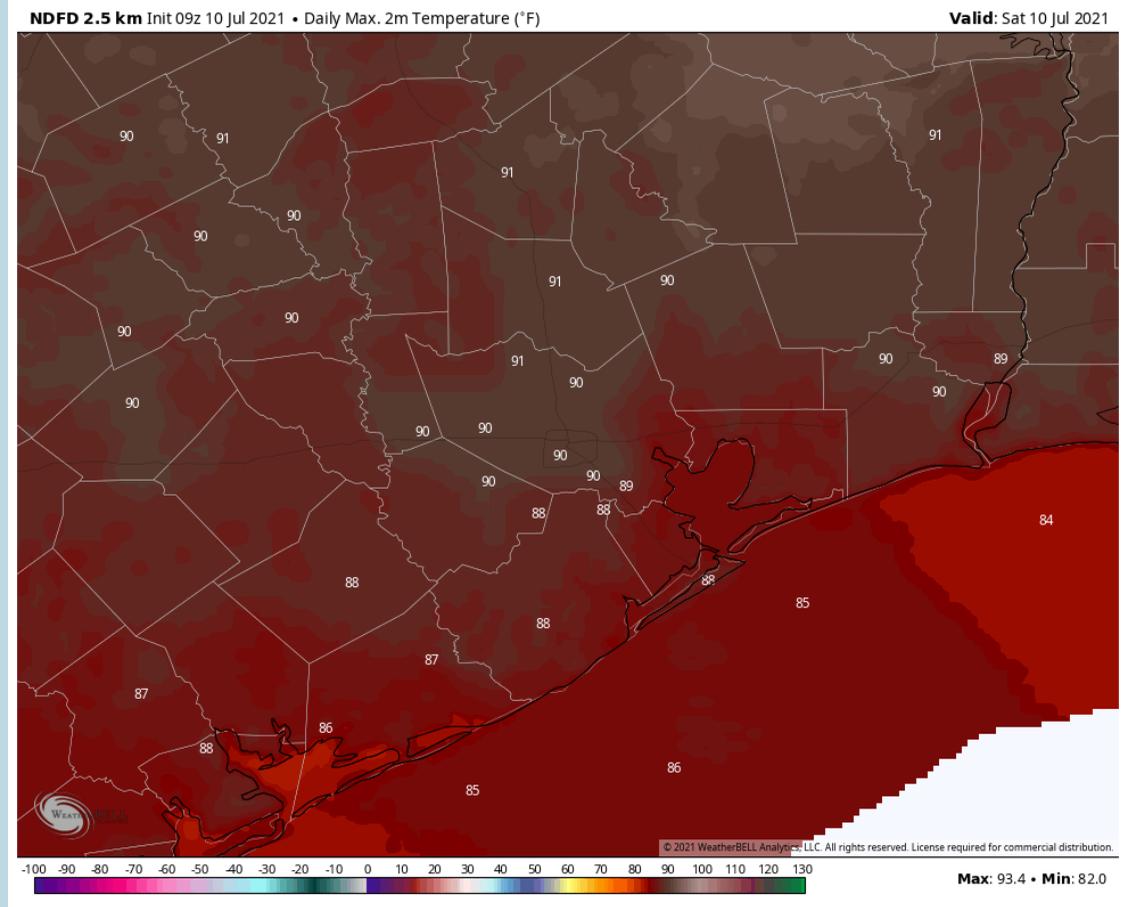

## Sustained Winds (4 PM CT)

## Simulated Radar Snapshot (2 PM CT)

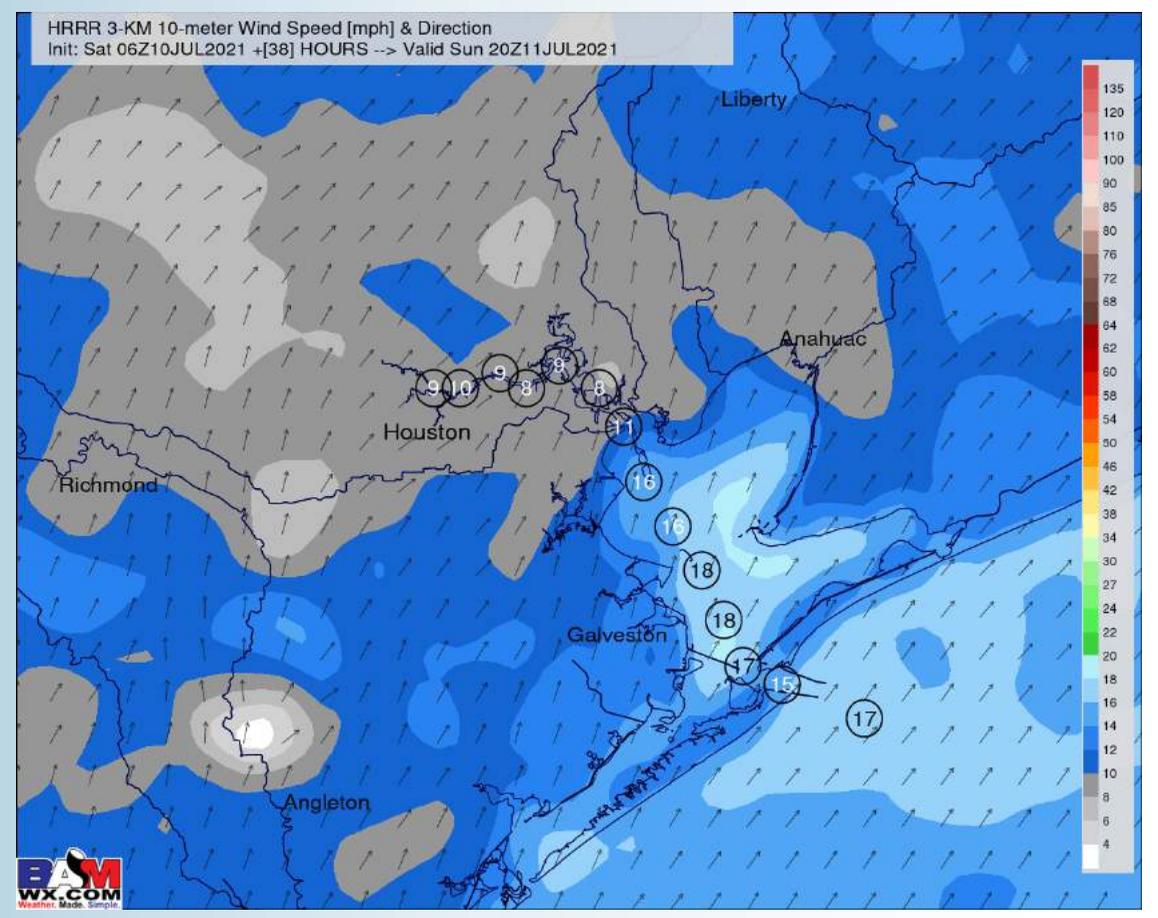

## High Temps Today

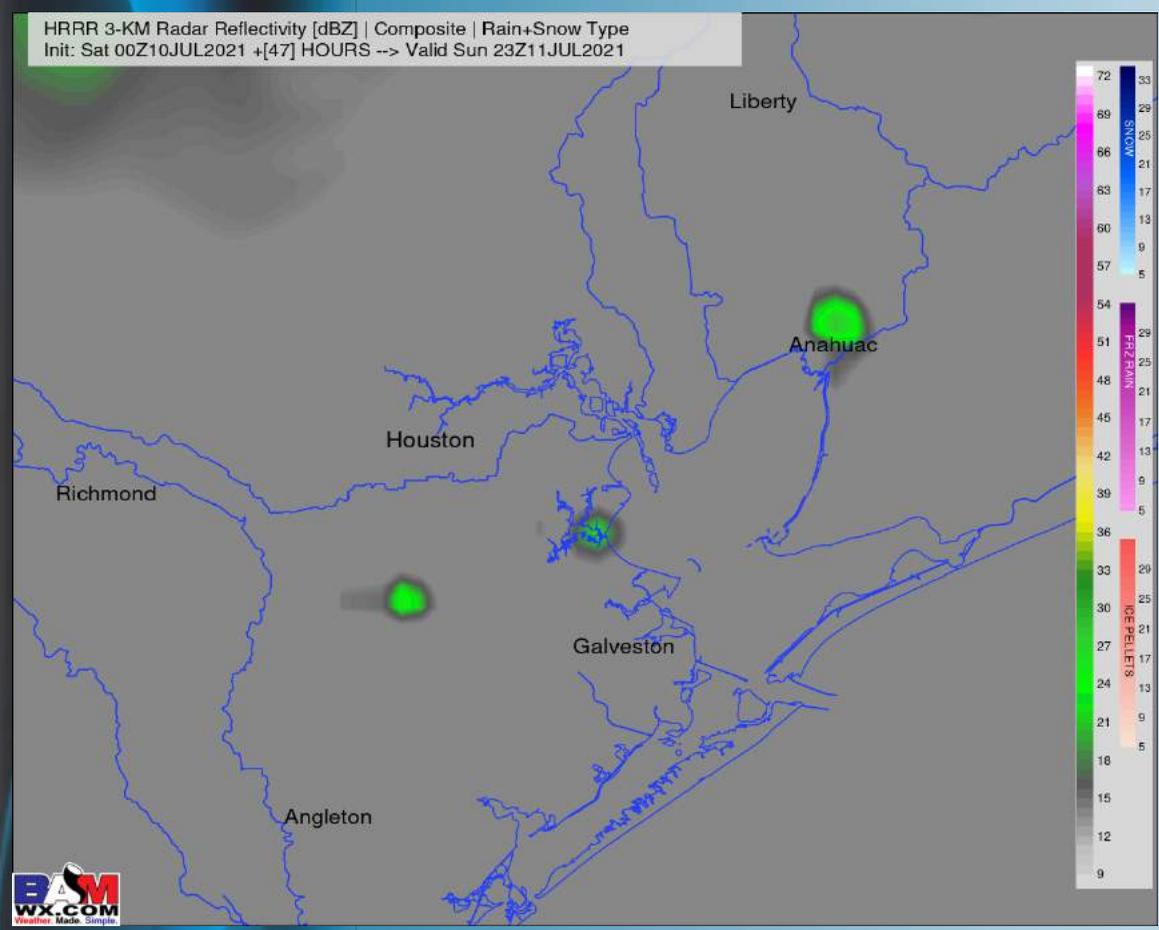

## Short-Term Forecast Discussion

- Continuing to favor a drier day on Sunday- a few pieces of guidance are hinting at a few pop ups in the afternoon hours so this will be something to watch as a risk, but would favor a generally quieter day overall.
- Sustained winds of 13-18 MPH possible coming out of the SSW will be favored for Sunday.
- Upper 80s will be the call on Sunday.
- *No fog expected for the day Sunday.*

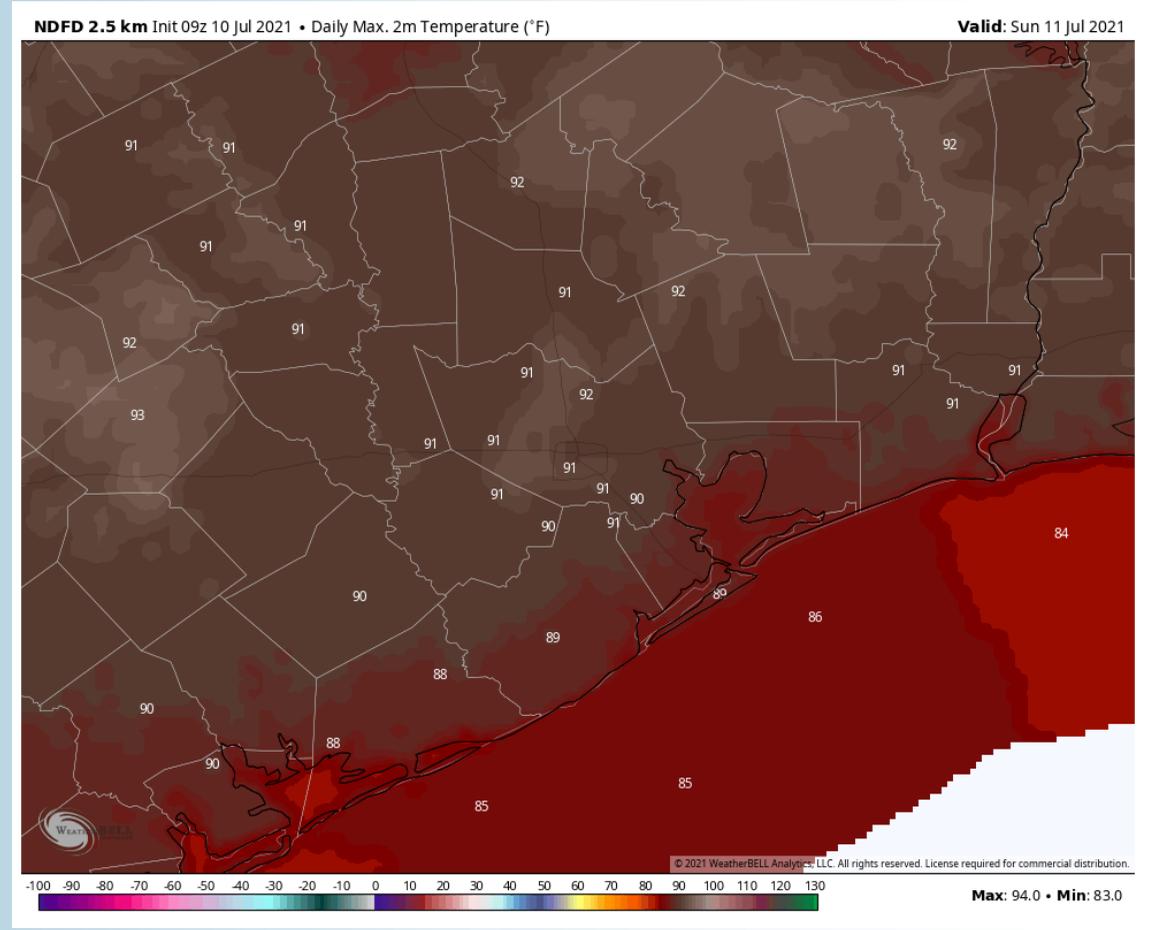

## Sustained Winds (3 PM CT)

## Simulated Radar Snapshot (7 PM CT)

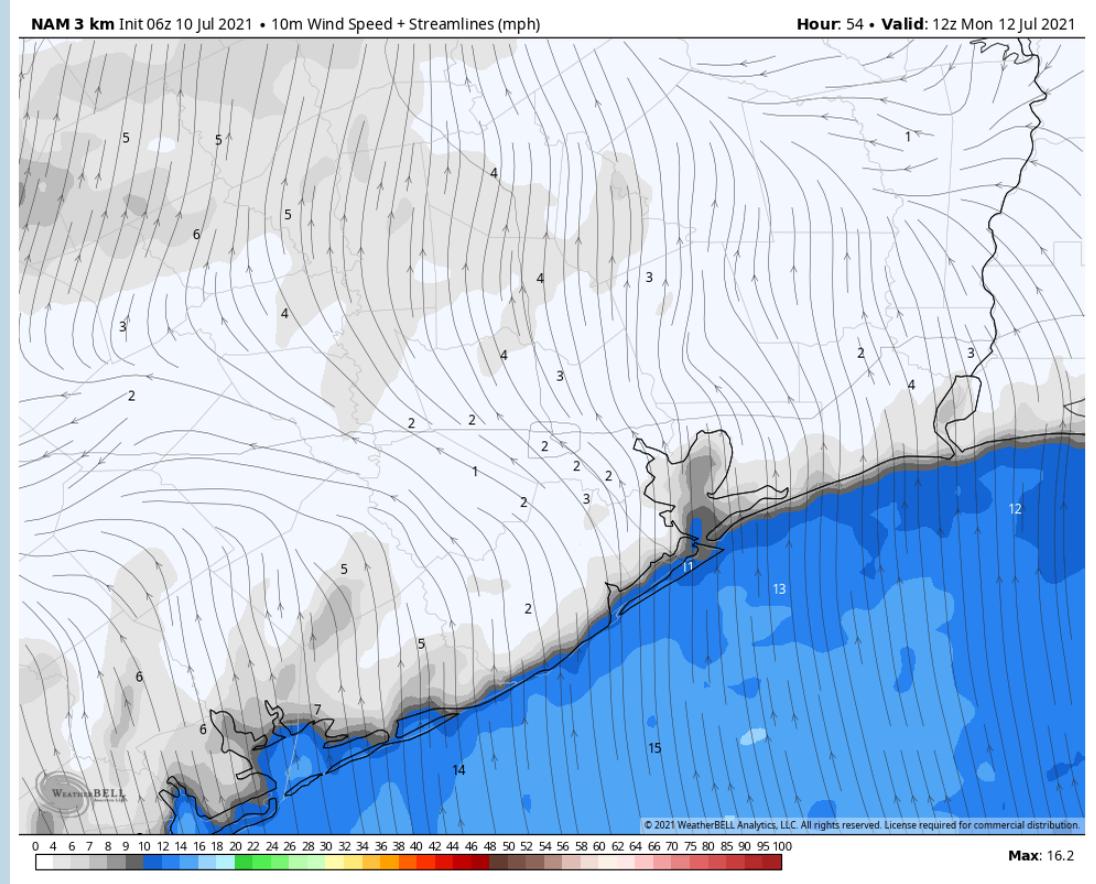

## High Temps Sunday

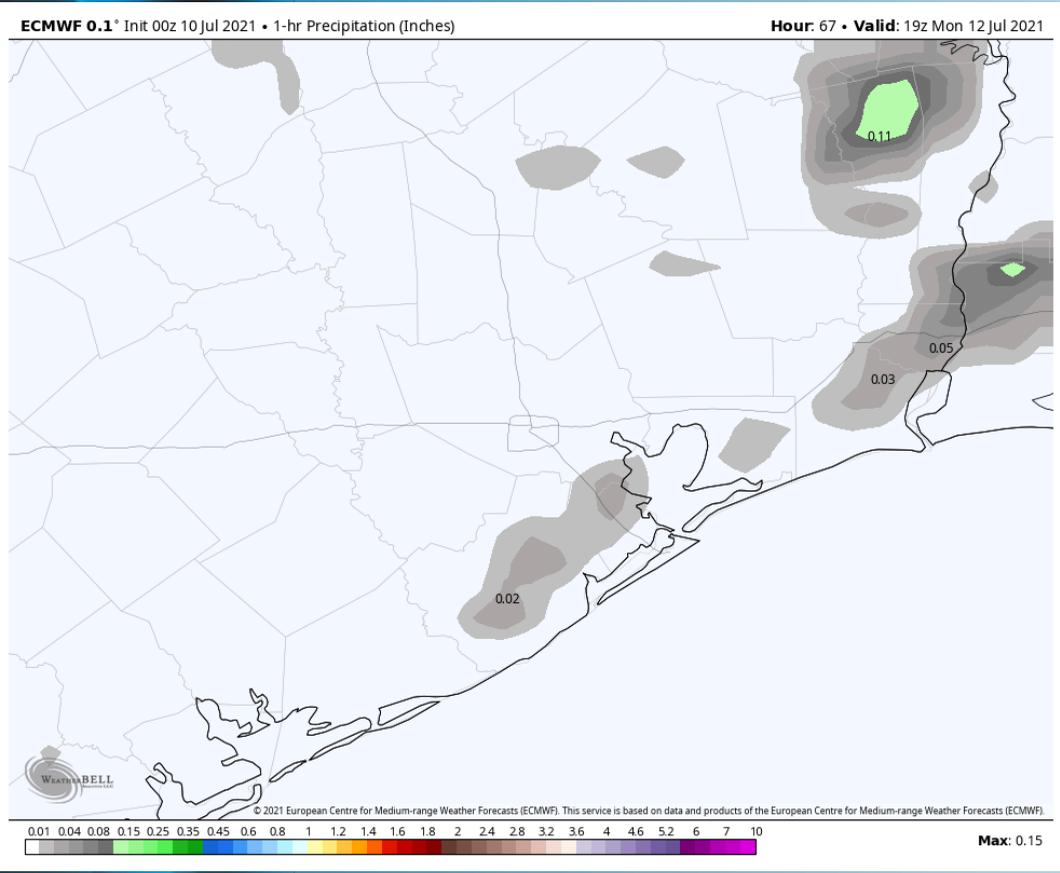

**Short-Term Forecast Discussion**

- Most of Monday should stay dry, but the mid-afternoon hours should be monitored for an isolated pocket or two of precipitation. Favoring several hours of dry time through the day.
- Looking at calmer conditions for our Monday, currently favoring winds out of the S/ SW at 8-13 MPH with a few gusts to 18 MPH possible.
- Upper 80s are anticipated on the day Monday.
- *No fog is anticipated for Monday.*

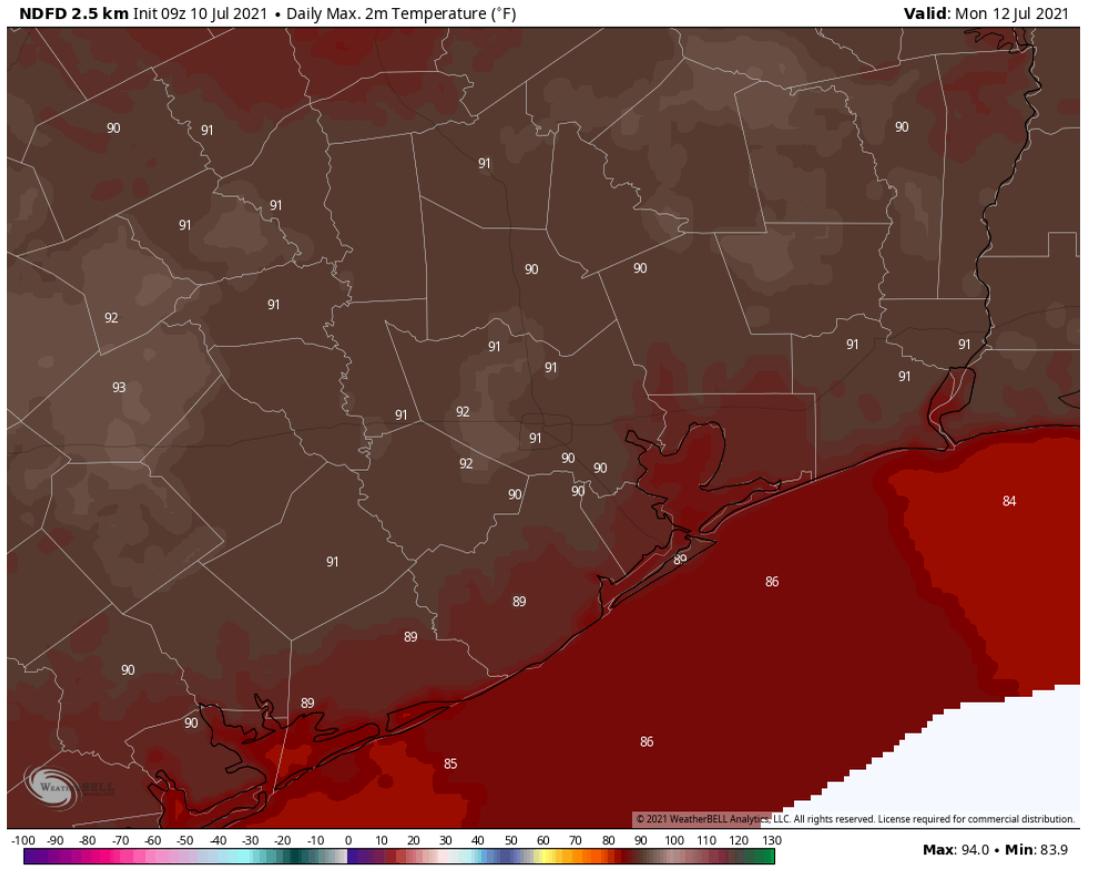

**Sustained Winds (7 AM CT)**

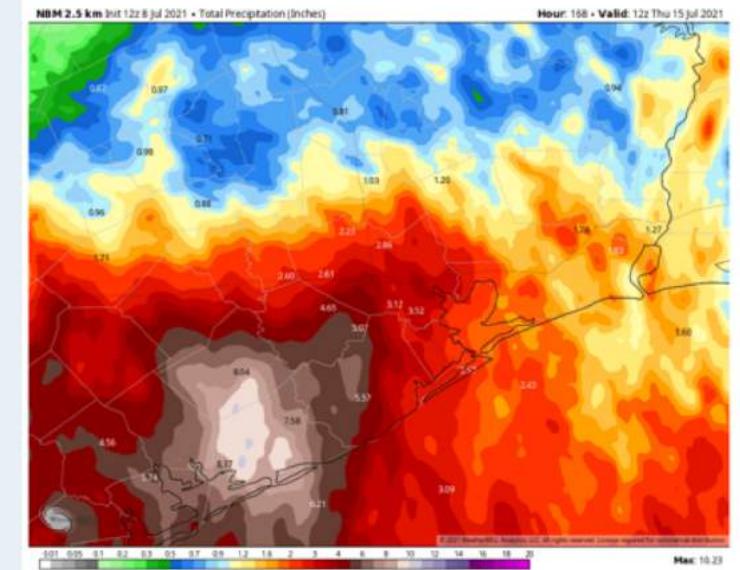

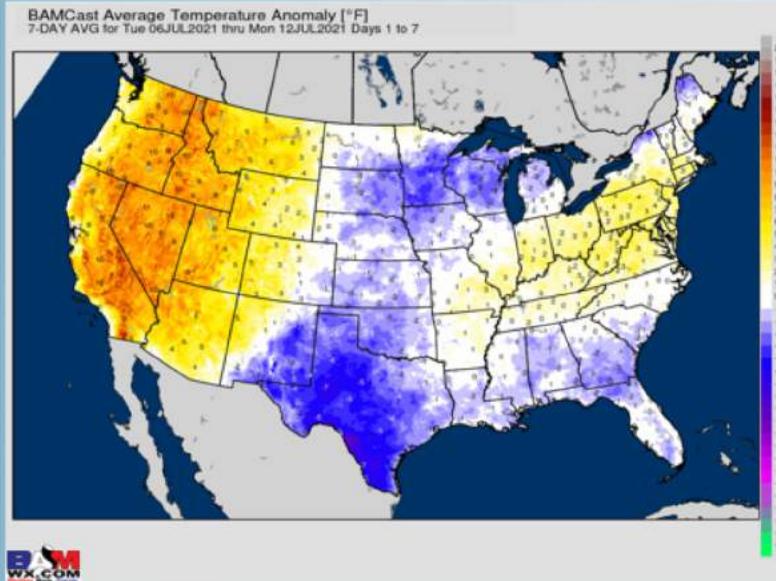

**Simulated Radar Snapshot (2 PM CT)**

**High Temps Monday**

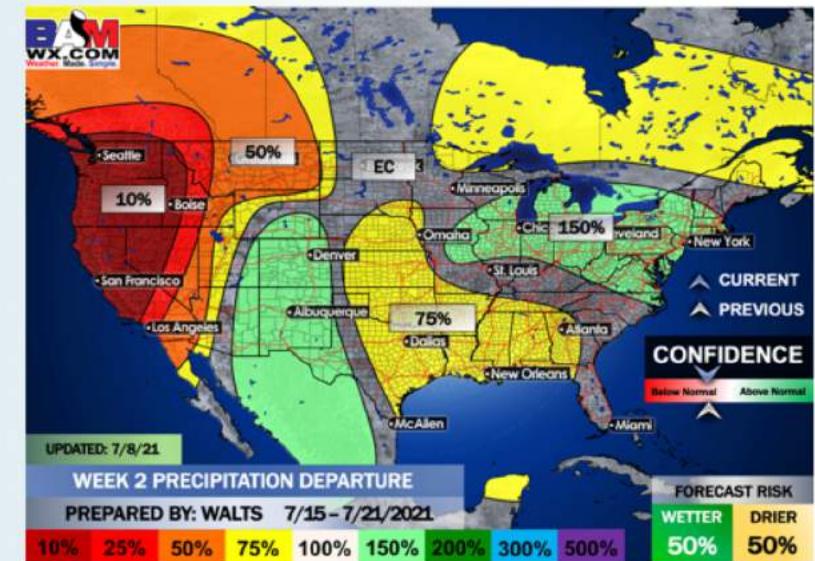

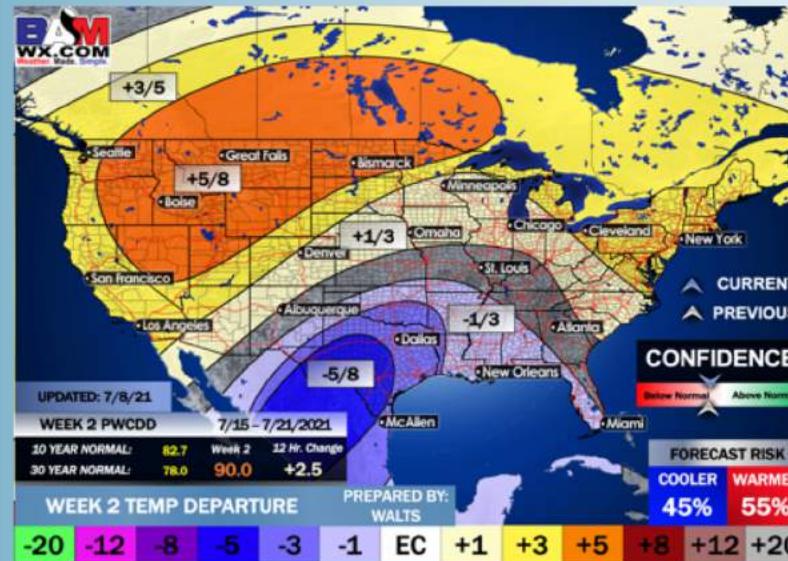

## Week 1 Forecast

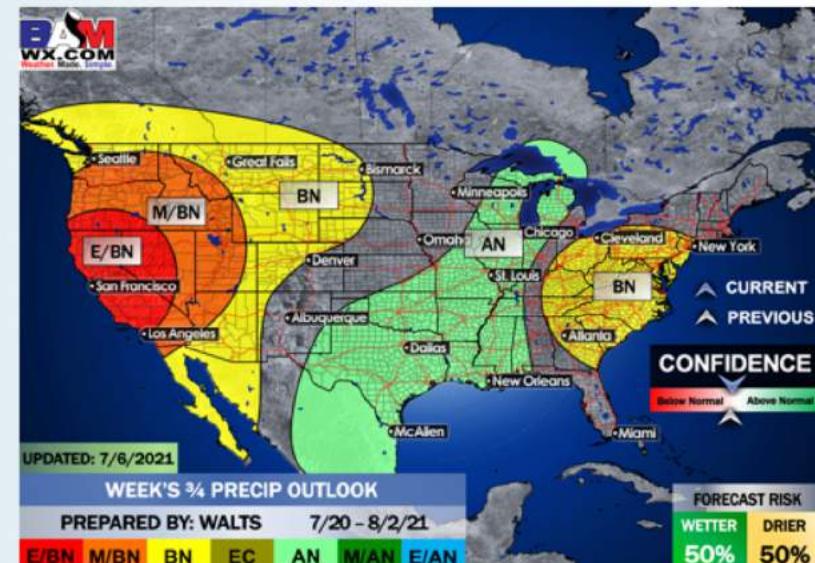

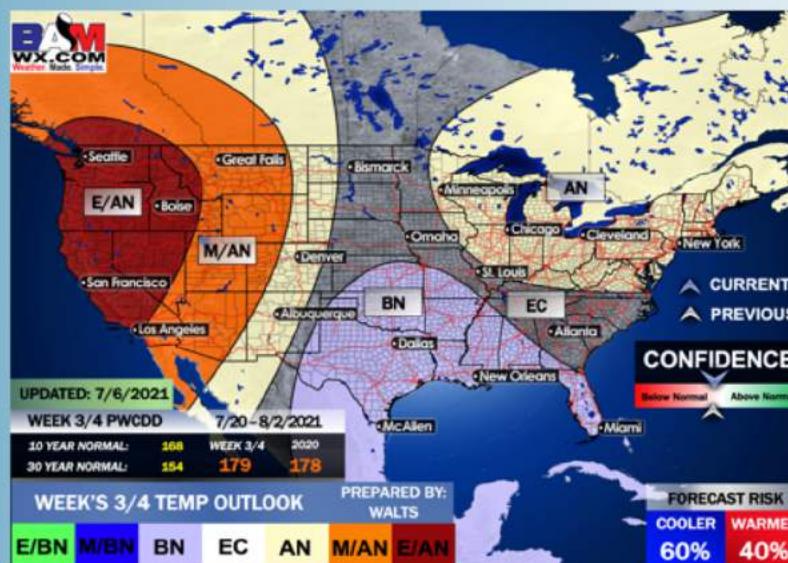

## Long-Range Forecast Discussion

- Daily storm chances will be possible over the next 7 days although chances become more hit and miss towards Saturday/Sunday into next week. Regardless, temperatures look to run below normal for the week.
- Week 2 is anticipated to be less active with below normal precipitation risks. Temperatures look to remain below normal.

## Week 2 Forecast

## Weeks 3/4 Forecast

- The weeks 3/4 (late July into August essentially) period likely features more seasonable to cooler than normal temperatures, while precipitation looks to continue running above normal in this period as well.
