Short-Term Forecast Discussion

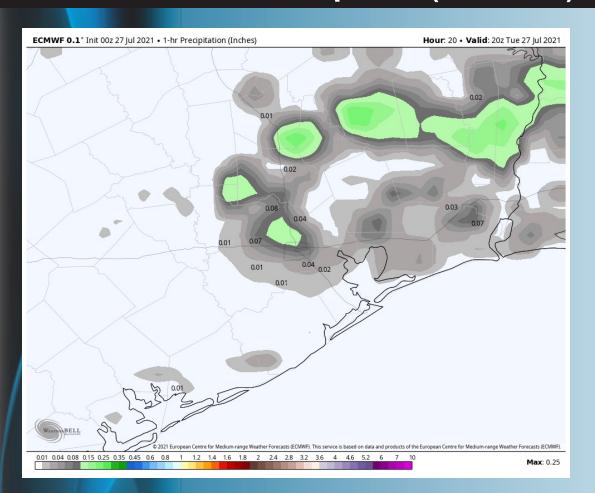

➤ Today looks to start out dry, but a few very isolated showers will work back into the forecast into the mid to late afternoon hours towards sunset. Low end chances (~10-20%) as coverage will likely be rather minimal.

- Winds will generally be coming out of the South at 5-10 MPH sustained.
- Expecting highs ranging from the upper 80s near the boarding station to the mid 90s more in-land.
 - No fog expected today into tonight.

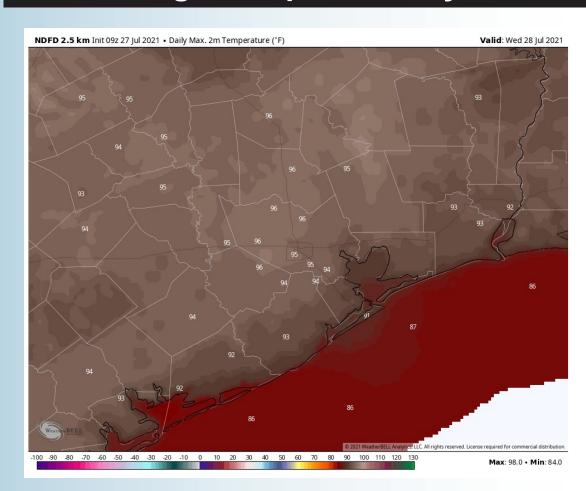

Sustained Winds (4 PM CT)

Simulated Radar Snapshot (3 PM CT)

High Temps Tuesday

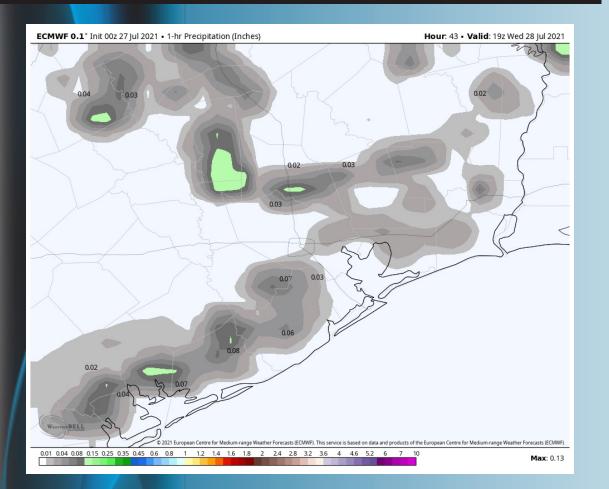

Short-Term Forecast Discussion

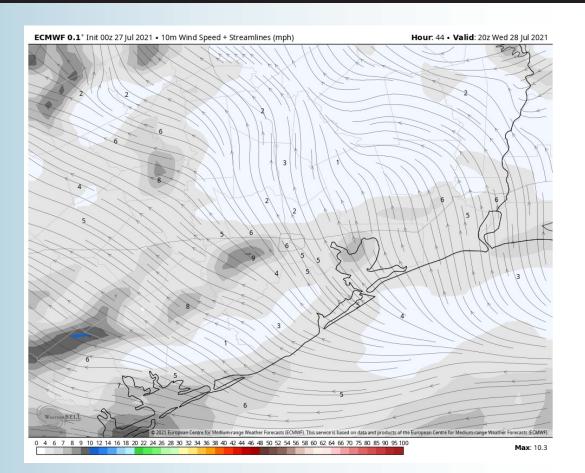

- Wednesday looks to overall be a drier day; a 10-20% chance for an afternoon shower can't be ruled out, as well, but not seeing any big impacts right now.
 - Winds will generally be coming out of the Southeast at 5-10 MPH.
 - Expecting a similar setup for Wednesday, highs ranging from the upper 80s near the boarding station to the mid 90s more in-land.
 - No fog expected Wednesday at this distance.

Simulated Radar Snapshot (2 PM CT)

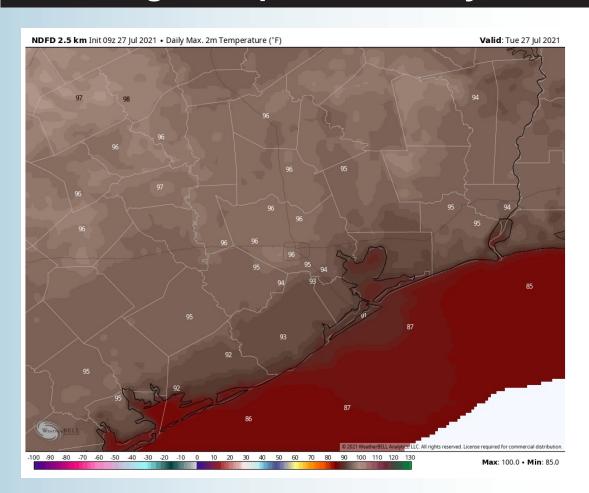

Wednesday, July 28th, 2021

Sustained Winds (3 PM CT)

High Temps Wednesday

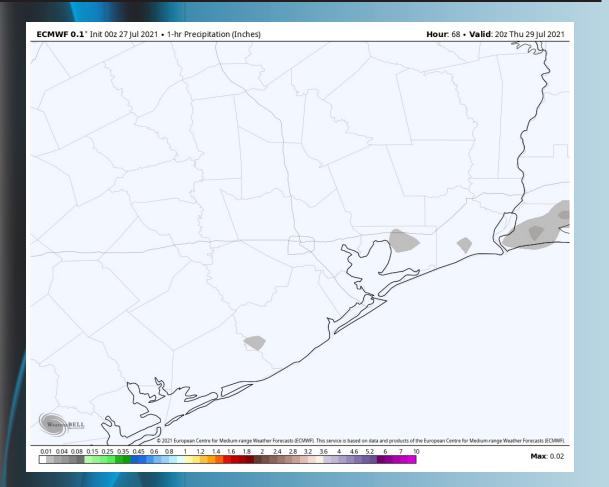

Short-Term Forecast Discussion

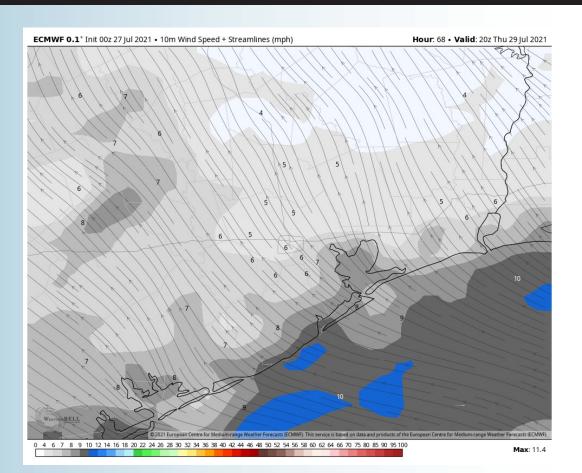

- ➤ Thursday right now is anticipated to be a dry day, with a ~10% chance of an isolated shower mid to late afternoon to the evening, but impacts will remain minimal.
- Winds will generally be coming out of the East to Southeast again at 5-10 MPH.
- Expecting a similar setup for Thursday, highs ranging from the upper 80s near the boarding station to the mid 90s closer in-land.
 - No fog expected Thursday at this distance.

Simulated Radar Snapshot (3 PM CT)

Sustained Winds (3 PM CT)

High Temps Thursday

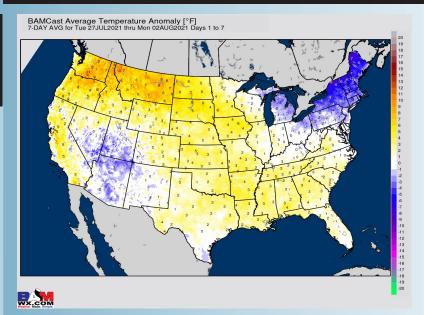

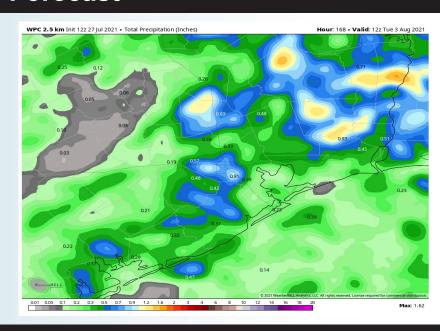

Tuesday, July 27, 2021

Week 1 Forecast

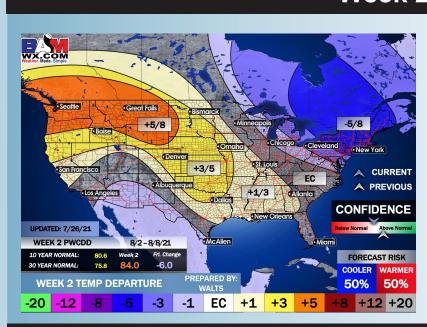

Long-Range Forecast Discussion

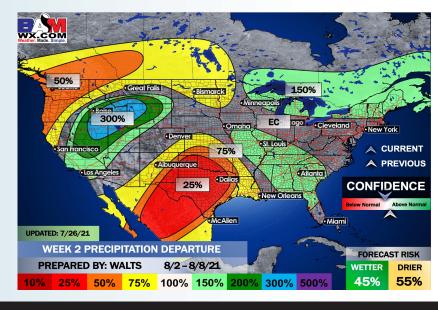

- Continuing to favor quieter weather moving forward as we start to feel more the influence of an upper level high pressure system. Thanks to this higher pressure, temps will continue to stay slightly above average for this time of year.
- The quiet weather from week 1 ahead looks to bleed into week 2 with below normal moisture risks expected.
 Temperatures are anticipated to run slightly above normal as well.
- The weeks ¾ (first half of August) period likely features more seasonable to cooler than normal temperatures, while precipitation looks to run around normal in this period as well. One thing to watch into mid-late August is the increased potential of tropical activity.
