6AM Synopsis: Not a whole lot of weather concerns today as mostly dry conditions are expected. Cant rule out a spotty light shower closer to the midnight timeframe. Chances pick up a bit into tomorrow morning where an isolated strike of lightning will be possible. As for today, the day will start out with some sunshine with increasing clouds throughout the day. Winds will be around 6 - 12 MPH sustained out of the NE with some gust around 15 MPH possible. High temperatures are anticipated to be in the upper 70's F to near ~80F.

Hazardous Weather Alerts:

NONE

6AM Weather Forecast

Sunday, August 15, 2021

5 Day Forecast Discussion: No big change in the forecast thinking moving forward the next few days. Rain chances will be possible essentially every day next week. However, no one day is anticipated to be a washout as chances look to be very hit and miss vs widespread. A few storms capable of lightning will be possible into the afternoon hours with the presence of instability. No severe weather is expected. Temperatures and humidity will be on the uptick as well the next few days. Heat index values in the upper 80's F to lower 90's F will be possible as early as Tuesday, with better odds of hitting this mark by Wednesday into Thursday. Winds overall should be rather weak over the next few days as well. Note that the image to the right is likely too widespread with totals as moisture is anticipated to be more hit and miss. Localized spots could see the values reached however.

7-Day Rain Map:

Date	Temp	Forecast Icon	Precip %	Rain	Relative Humidity	Wind
08-15-2021 Sun	62° 79°		0% am 10% pm	0"-0"	52%	ENE 6mph G: 11mph

6AM Weather Forecast

Sunday, August 15, 2021

Long Range Forecast Discussion & Scenarios: Tomorrow a few isolated showers will be possible but by no means will be a washout. Tuesday and Wednesday are likely the same where there will be periods of hit and miss rounds of light to moderate precipitation and a few lightning strikes cannot be ruled out. Thursday right now holds the lowest potential regarding precip chances, before additional scattered chances into the upcoming weekend. Even though most days do hold chances, we are not seeing any "washout" days featuring nonstop rain and think there can be several drier hours each day. Currently, the threat for severe weather appears lower. Temps the first half of the week will hover in the low-mid 80s, but late next week (~Wed and beyond) the potential for "feels like" temps to return to the upper 80s/ low 90s look likely.

TMax☀️	Low End	Most Likely	High End	Extreme
