Houston Pilots N 10.000

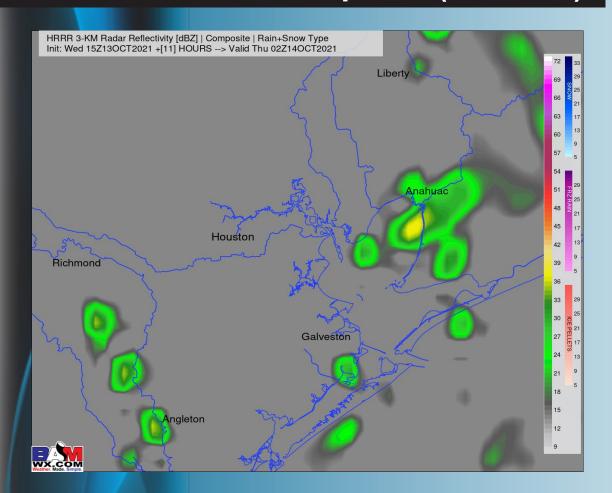

Short-Term Forecast Discussion

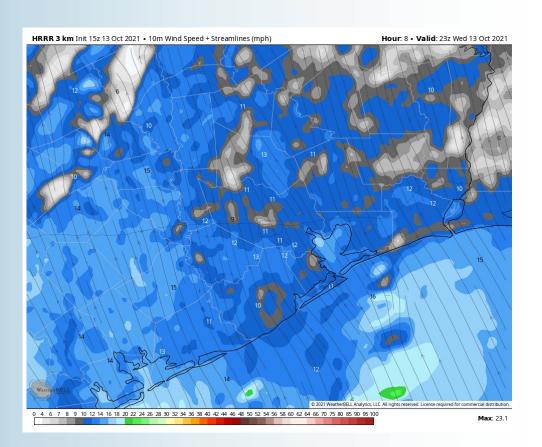

- ➤ Continue to favor mostly dry conditions with only very isolated chances the remainder of the afternoon. Chances start to pick up slightly around 7 8 PM this evening through the overnight. Overall, moisture is anticipated to be on the lighter side.
- ➤ Winds look to continue to remain a bit elevated today sustained out of the SSE. Winds this afternoon are generally expected to be in the 10 15 MPH range with gust near 20 MPH at times. After sundown, winds may pick up a little, closer to 12- 18 MPH sustained with gust near 25 MPH.
 - Low temperatures look to get into the lower 80's F tonight. Slightly cooler temperatures expected towards the HOU metro area.
 - Fog is not expected for today to tonight.

Simulated Radar Snapshot (9 PM CT)

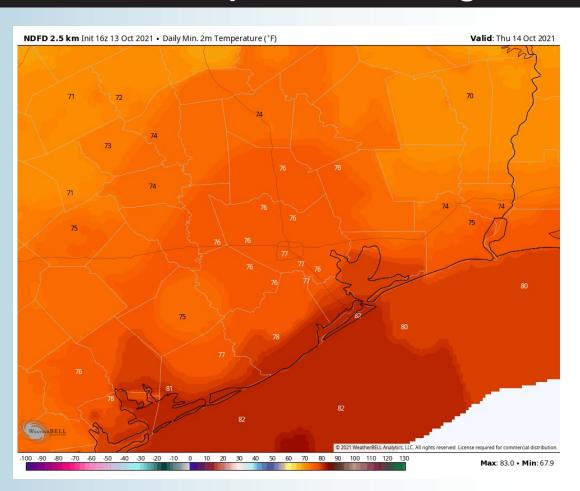

Wednesday, October 13th, 2021

Sustained Winds (6 PM CT)

Low Temps THU morning

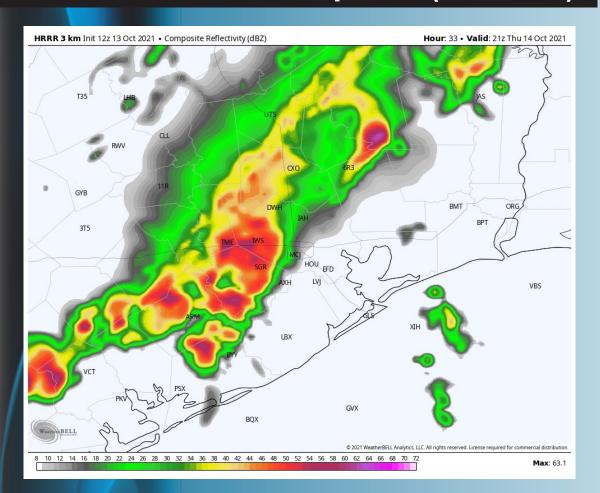

Short-Term Forecast Discussion

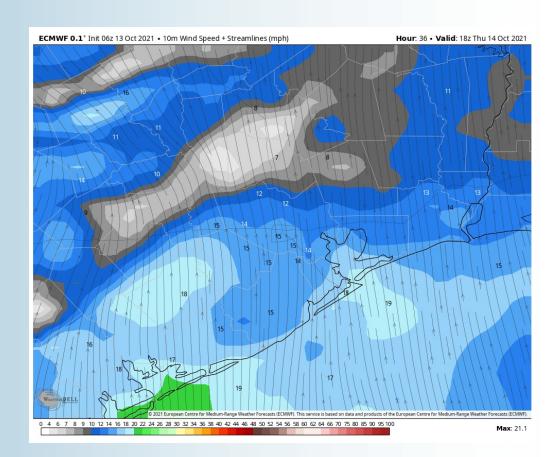

- Right now, Thursday AM looks to have isolated showers across the stations, but nothing widespread or impactful. A break in precip is expected later in the morning to midafternoon...however, we are watching closely for a potential cluster of storms along and west of the the HOU metro area after 4-6 PM through sunset that will need monitored for in future updates (right now continue to expect most impacts west of the boarding station). As it stands now, 6 PM 8 PM looks to best the best timeframe to see some moisture associated with this.
- Winds continue out of the SSE for THU. Sustained winds will still be closer to that 13-18 MPH range, occasionally gusting up to 25 MPH across the boarding station.
 - Mid 80s are again favored for the day Thursday.
 - Fog is not expected for Thursday.

Simulated Radar Snapshot (4 PM CT)

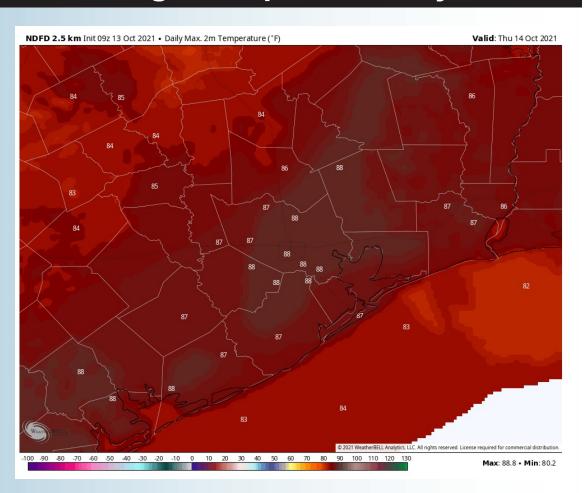

Thursday, October 14th, 2021

Sustained Winds (1 PM CT)

High Temps Thursday

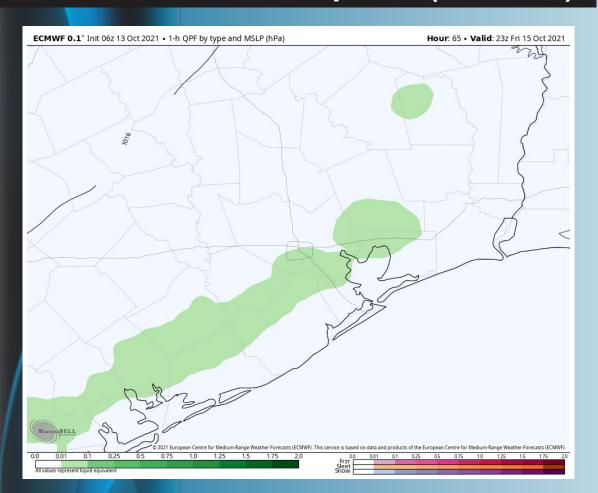

Short-Term Forecast Discussion

- Right now, Friday is expected to be a mostly dry day.

 An isolated shower may be possible later afternoon to the evening along a weak cold front, but impacts will be quite minimal.
- - Mid 80s are again favored for the day Friday.
 - Fog is not expected for Friday.

Simulated Radar Snapshot (6 PM CT)

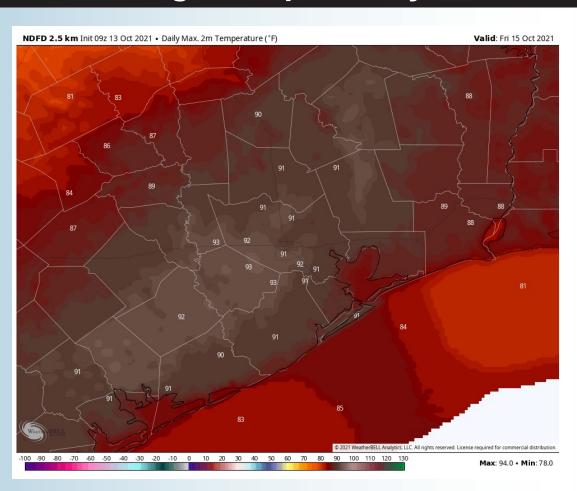

Friday, October 15th, 2021

Sustained Winds (11 PM CT)

High Temps Friday

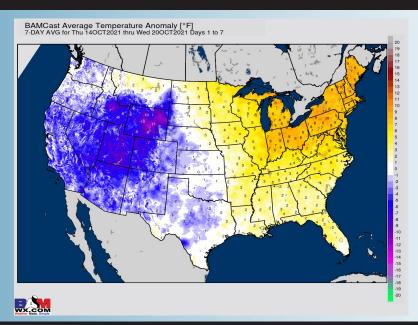

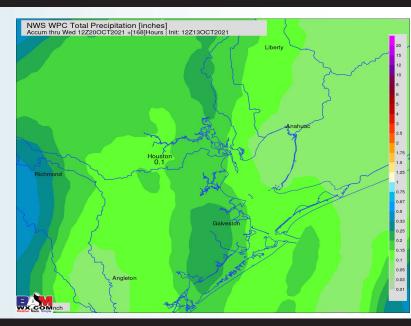

Wednesday, October 13, 2021

Week 1 Forecast

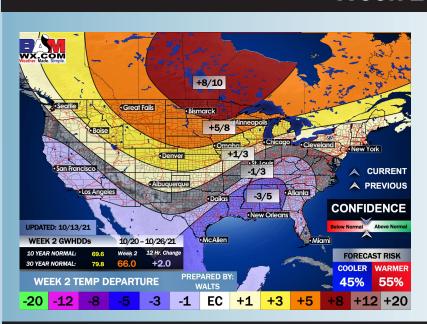

Long-Range Forecast Discussion

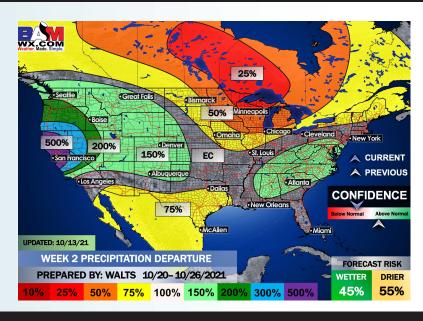

- Temps look to be average to slightly above average for this time of year, we are watching for some hit and miss rain chances this work week; however, coverage and totals look to be minimal.
- The week 2 timeframe is expected to have below average temps with slightly below average risks for precip. Not eyeing a specific threat for a tropical storm or hurricane at this distance but will need to continue to monitor for potential development.
- Right now, we have risks slightly below normal temps and normal to slightly below normal precip for the weeks 3/4 period. We will continue to monitor for tropical disturbances during this time.

Week 2 Forecast

Weeks 3/4 Forecast
