# Tropical Update:

## EPS Ensemble 10-days Tracks

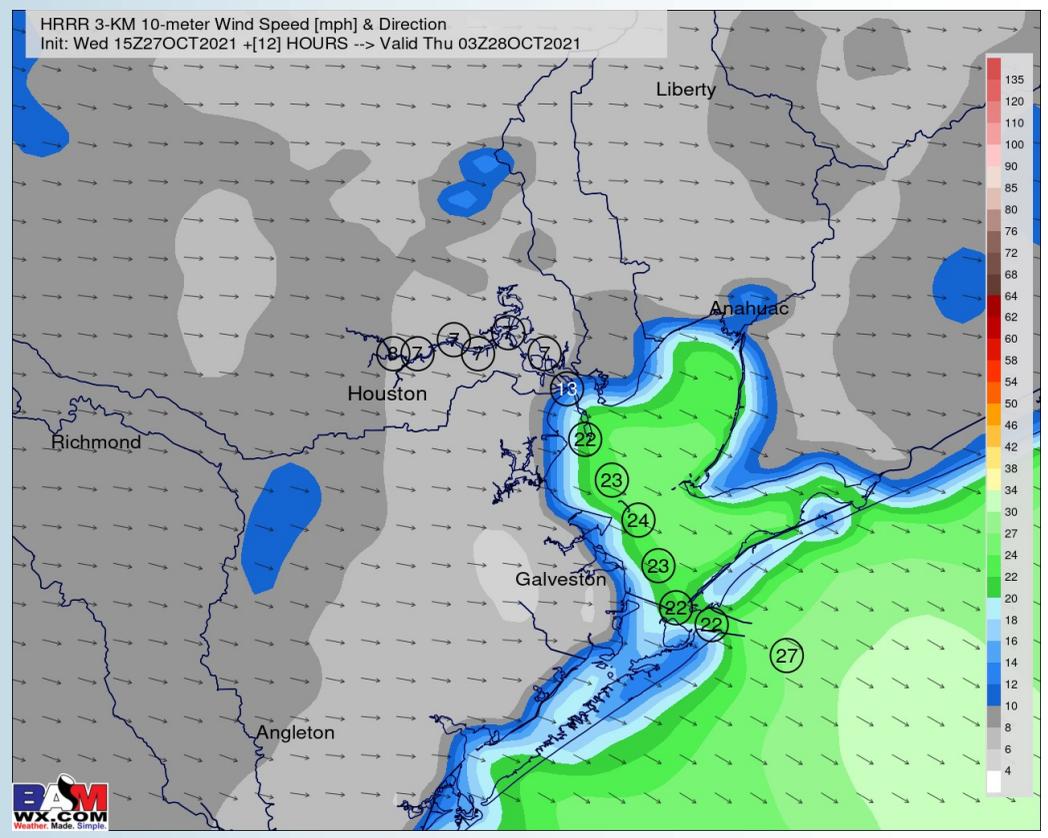

- We continue to favor the Gulf to remain quiet at least for the next 7-10 days.

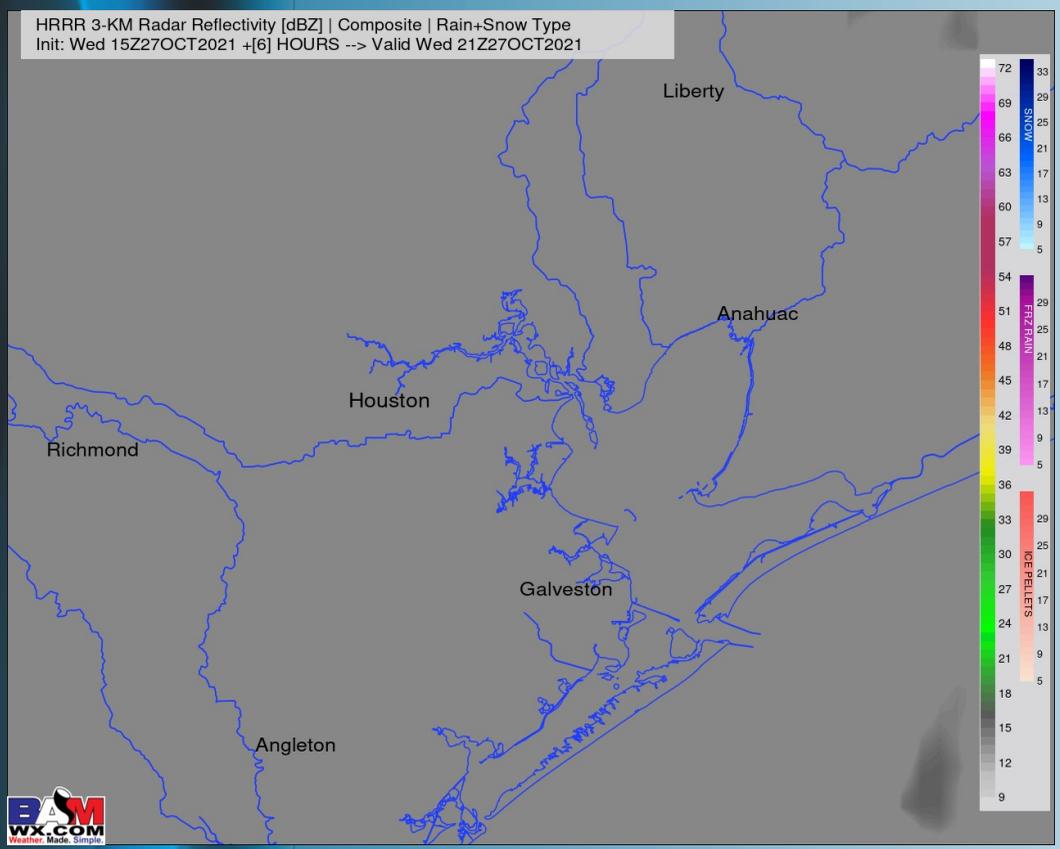

## Short-Term Forecast Discussion

- After a rather active first half of the day, the afternoon hours will be much quieter regarding precip. Expecting precip to wind down early this afternoon and be out of the area by 1-2 PM. Beyond this, dry conditions are favored.
- Winds by 1 PM will fully shift out of the NW. Expecting sustained winds closer to 20-30 MPH sustained with gusts 30-40 MPH possible the rest of the day/evening at the boarding station.
- Lows tonight fall back into the upper 50s closer to the 610 bridge, mid to upper 60s for most stations.
- **Not expecting fog tonight.**

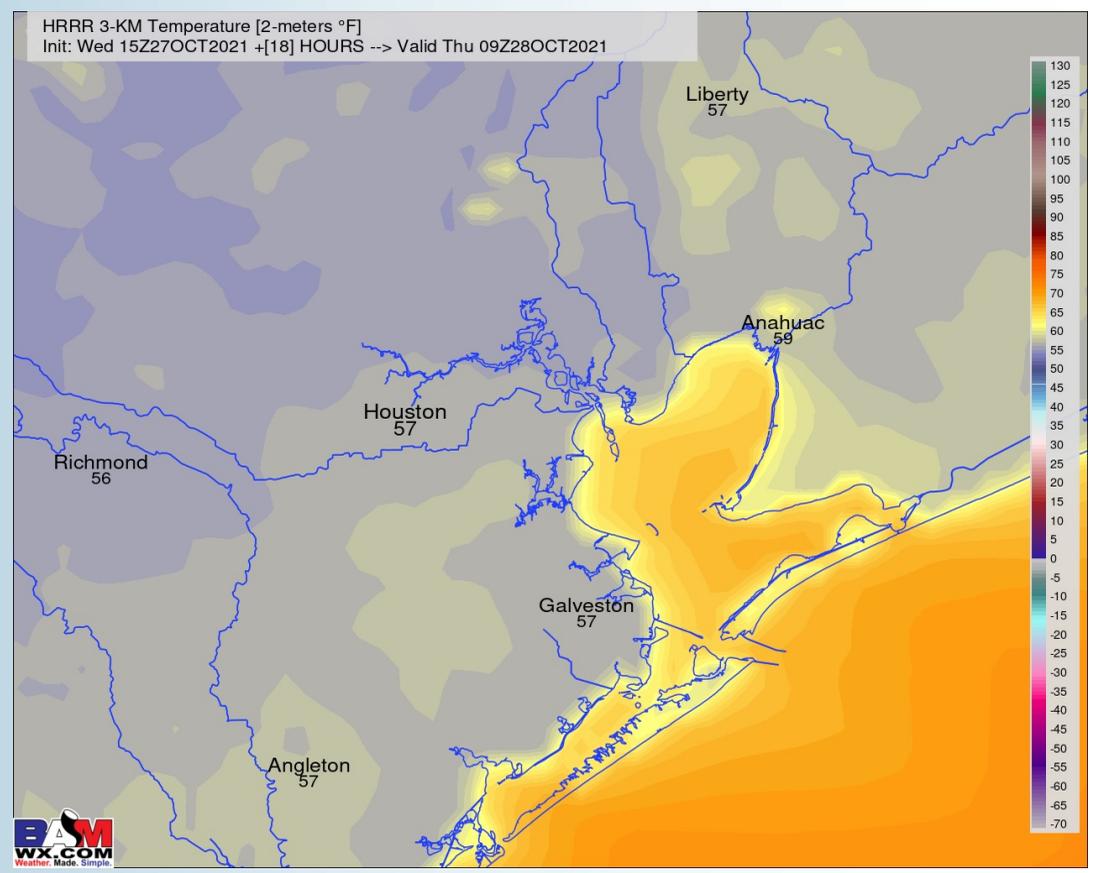

## Sustained Winds (9 PM CT)

## Simulated Radar Snapshot (4 PM CT)

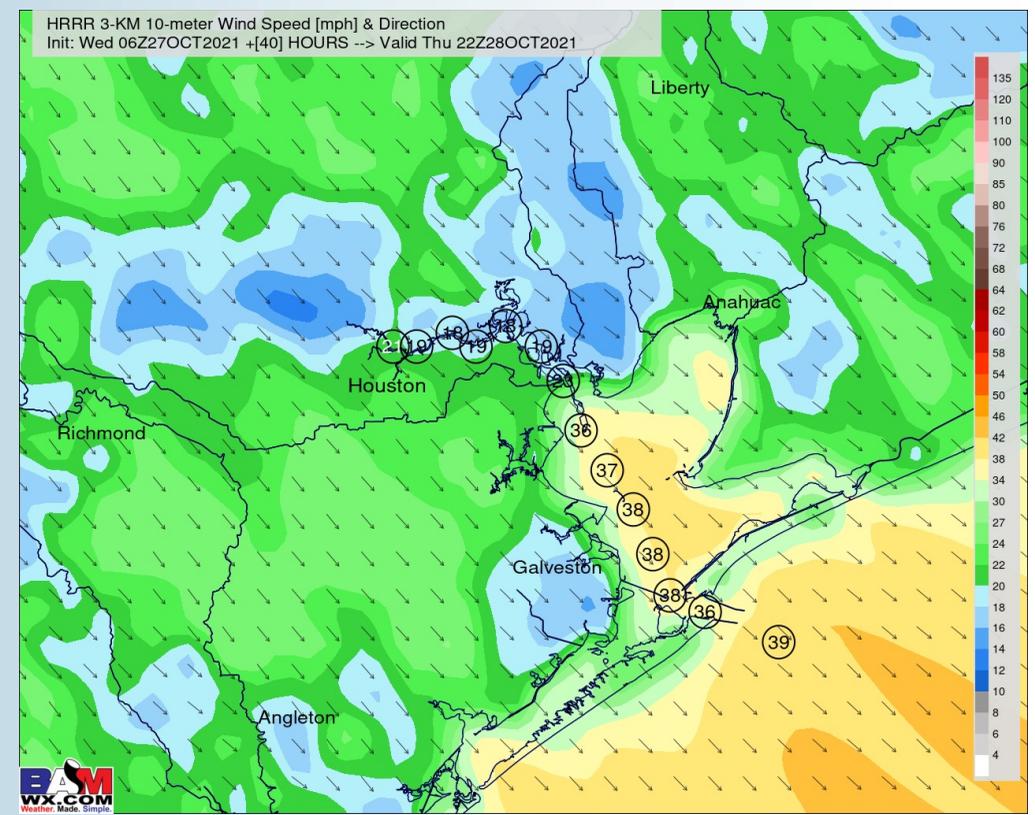

## Low Temps this evening

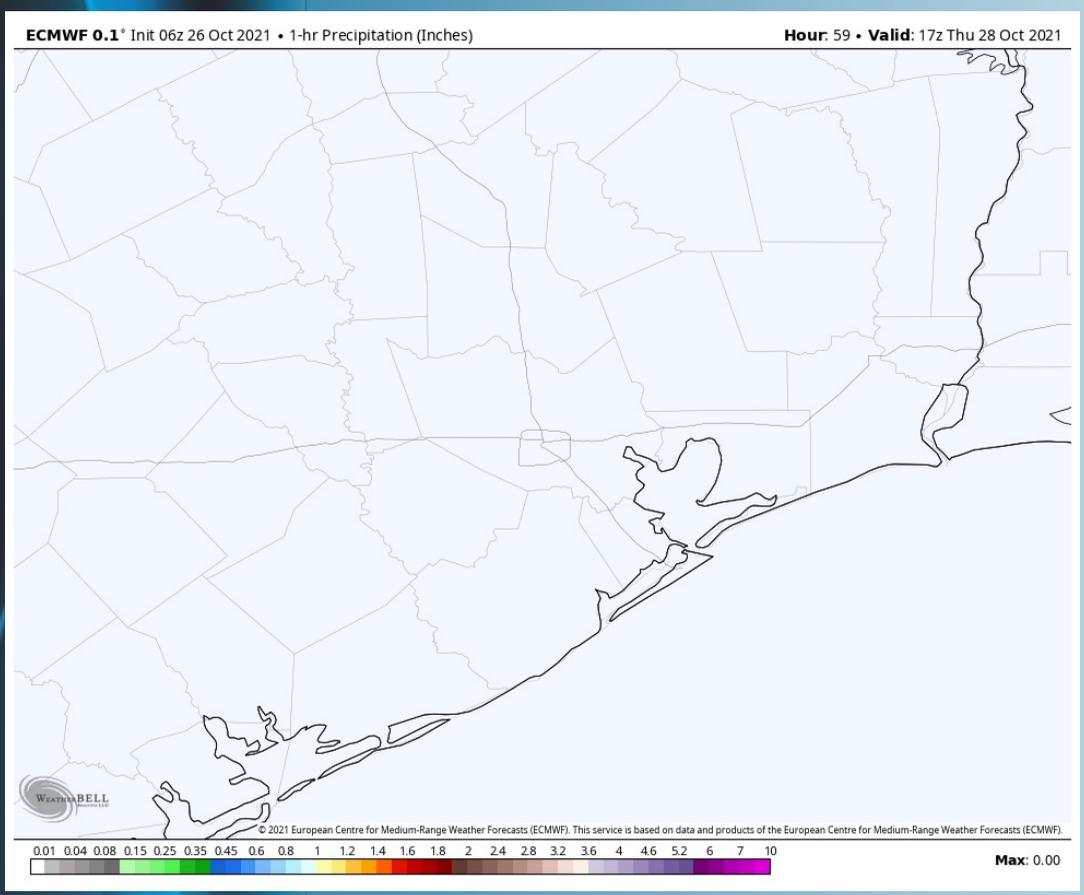

## Short-Term Forecast Discussion

- Dry conditions are anticipated Thursday for our stations.
- Winds look to be elevated again for Thu. Sustained winds 25-35 MPH for the boarding station in the AM hours, closer to 30-40 MPH sustained beyond ~Noon. Gusts 30-40 MPH in the AM are favored with 40-50 MPH gusts possible after ~Noon for the boarding station. Winds coming out of the NW for Thursday. Winds weaken a touch to 20-30 MPH sustained after sundown and through the evening hours. **Peak winds look to come 1-8 PM.**
- High temps sit in the mid 70s for Thursday.
  - **No fog expected for our stations.**

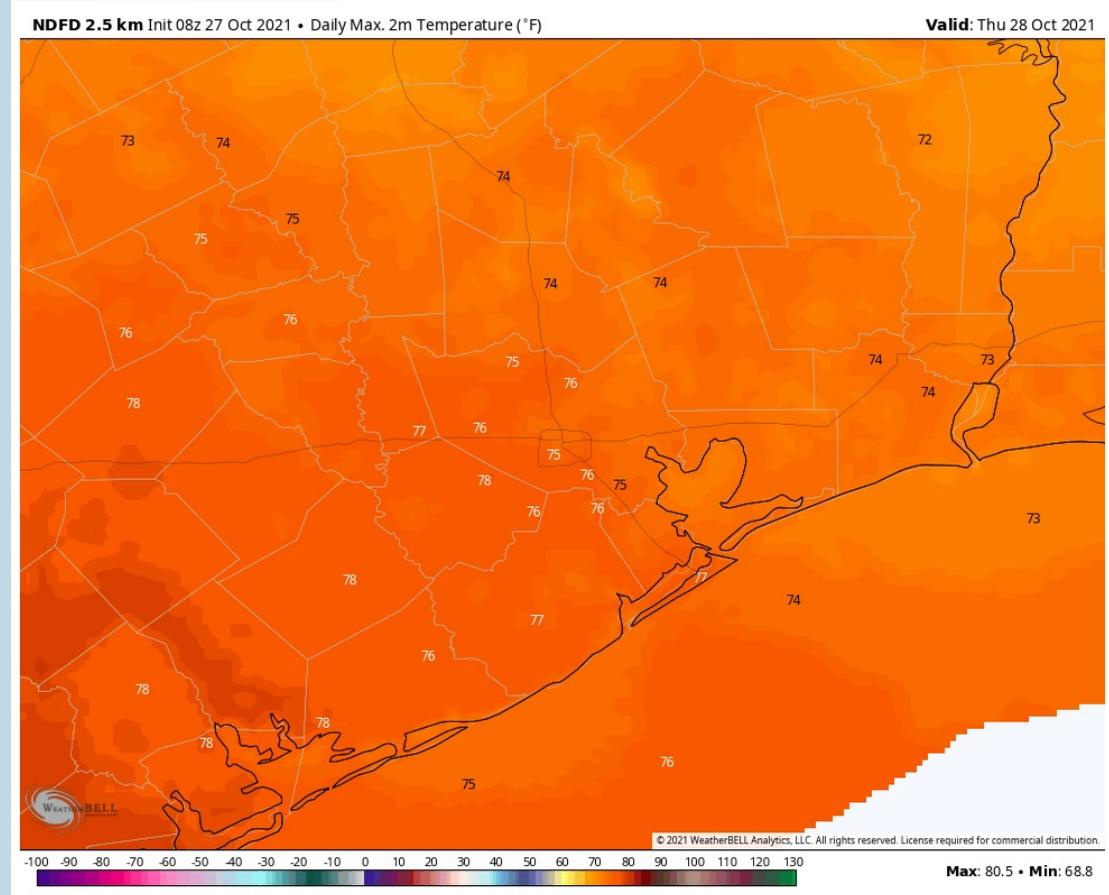

## Sustained Winds (5 PM CT)

## Simulated Radar Snapshot (12 PM CT)

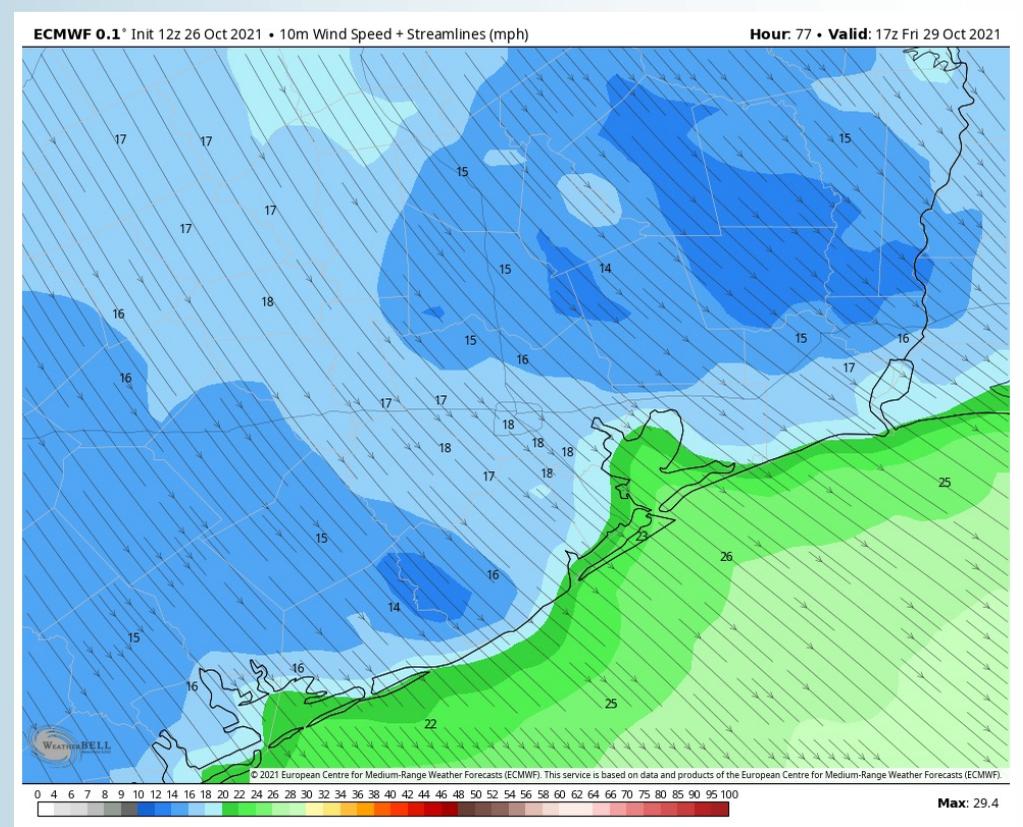

## High Temps Thursday

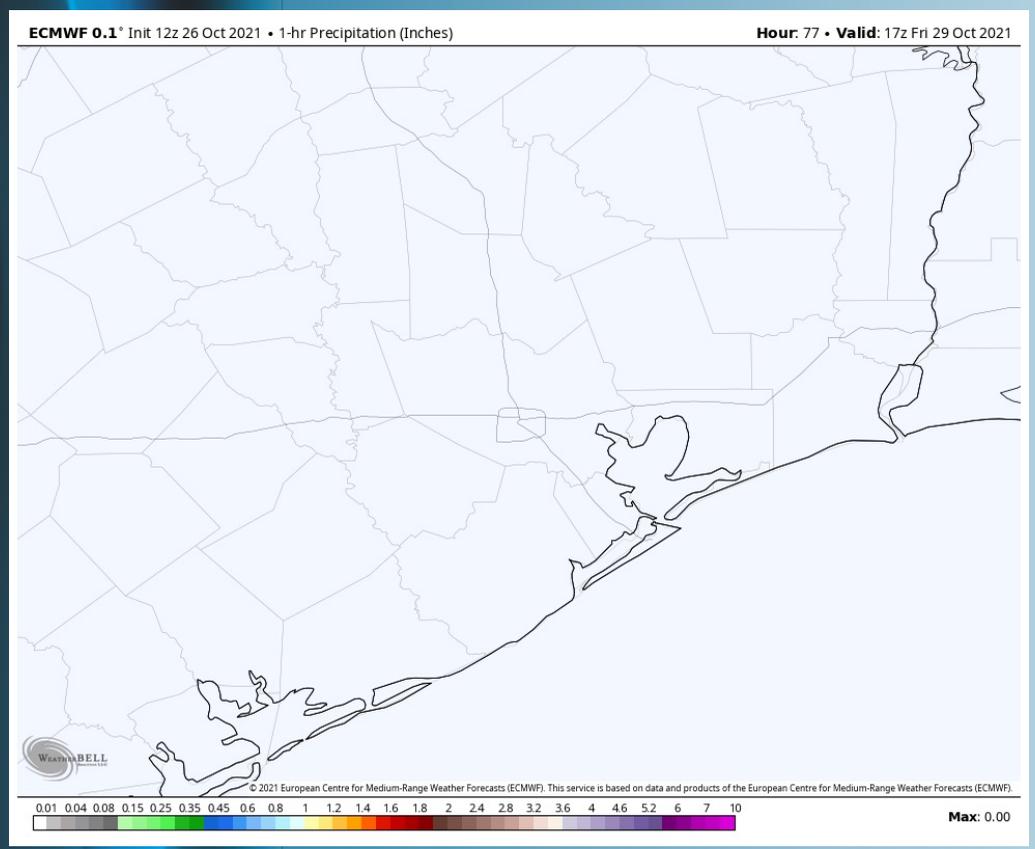

## Short-Term Forecast Discussion

- Anticipating a dry day for our stations on Friday.
- Winds will *\*slowly\** weaken some Thursday night into Friday AM, but will still remain elevated. By daybreak, sustained winds 20-30 MPH for the boarding station for much of the day, gusts 30-40MPH. Sustained winds 18-23 MPH for our other stations and gusts 25-30 MPH closer to downtown Hou/610 bridge. Winds continue out of the NW for Fri and then will weaken once again Friday after sundown.
- High temps look to be in the low 70s.
- **Fog is not expected for Friday.**

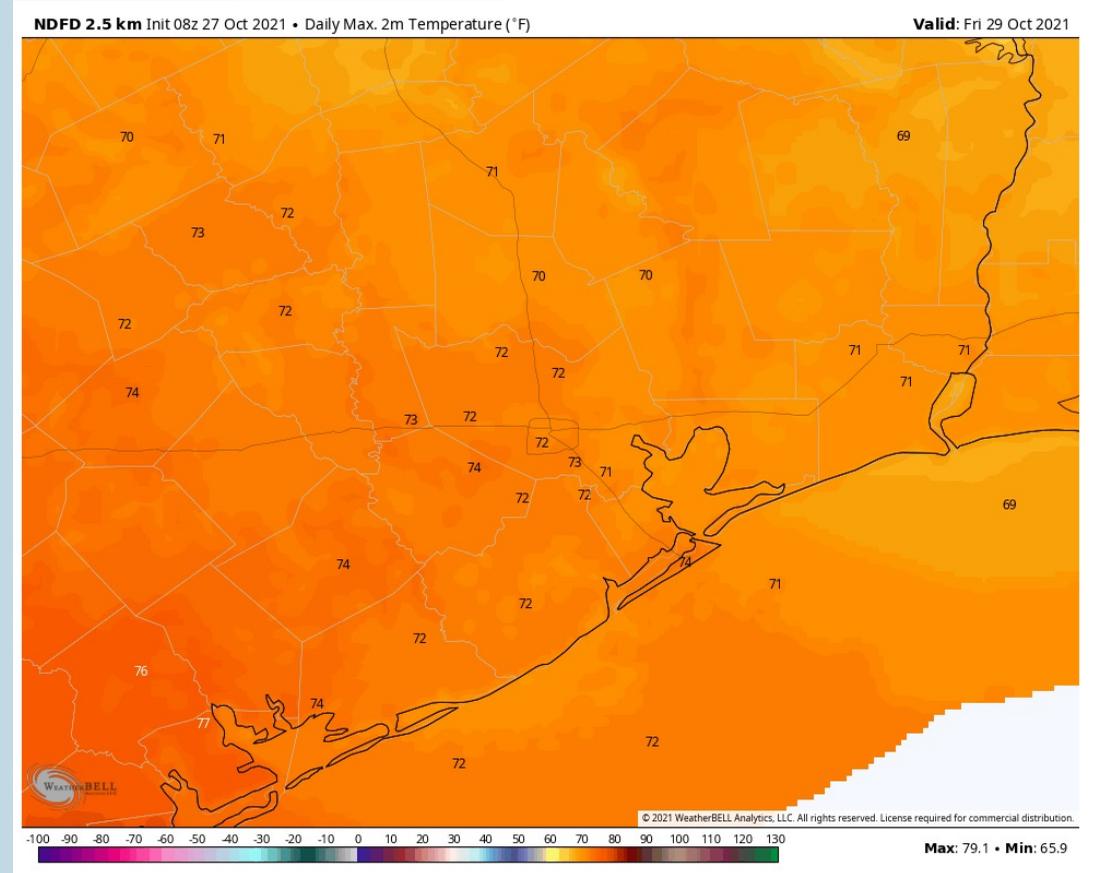

## Sustained Winds (12 PM CT)

## Simulated Radar Snapshot (12 PM CT)

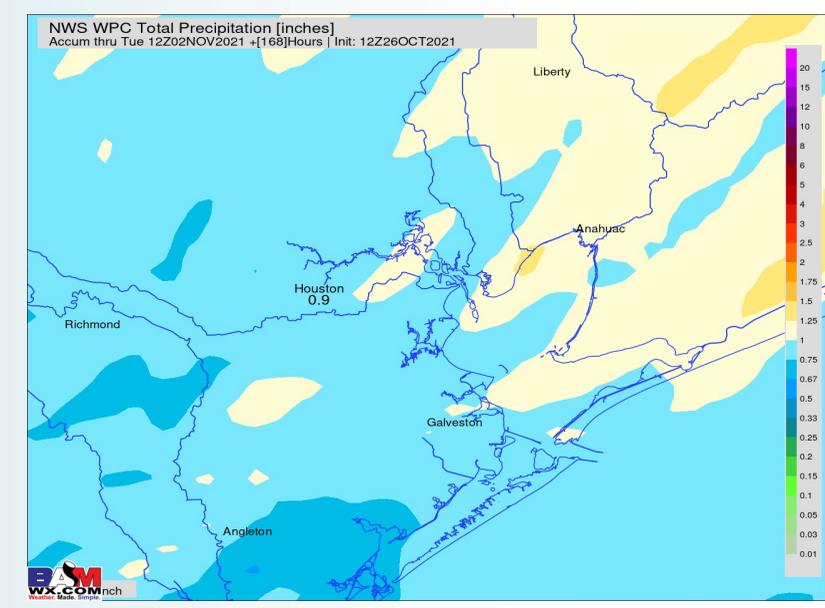

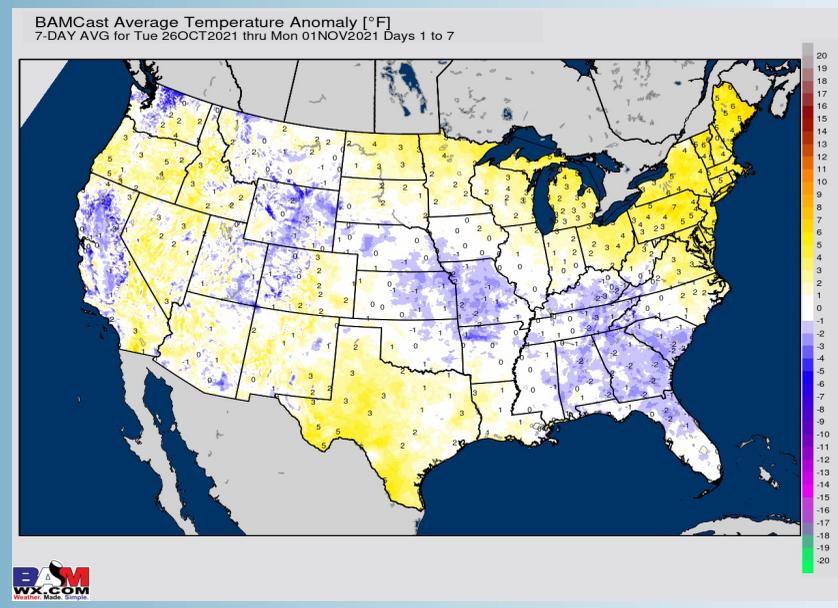

## High Temps Friday

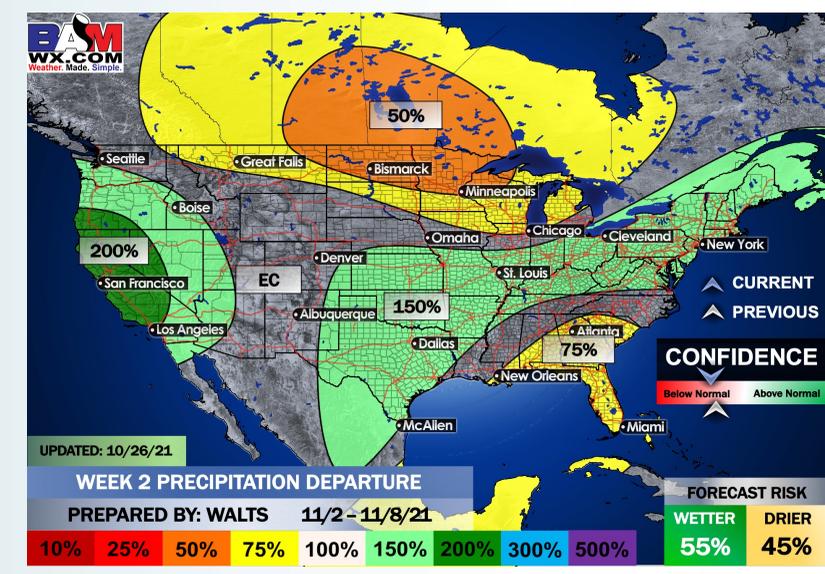

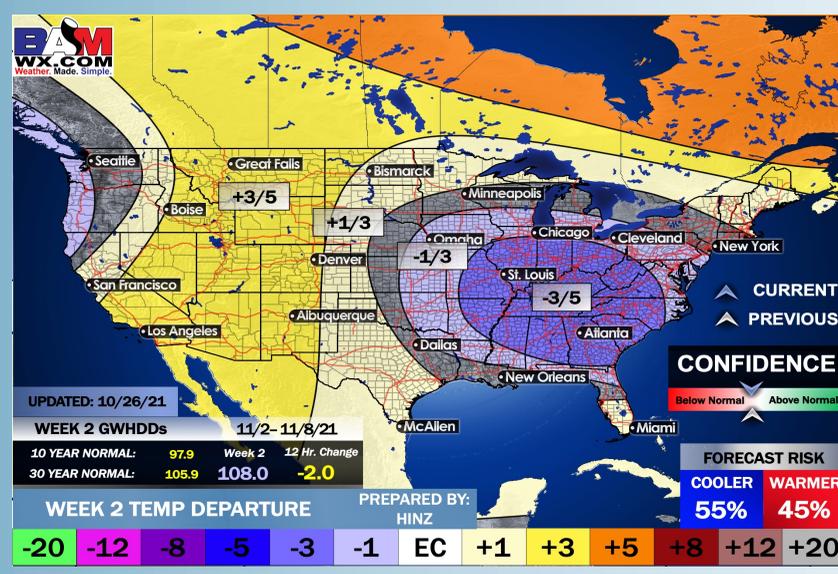

## Long-Range Forecast Discussion

- Temps look to average out normal to slightly above normal the next 7 days. expecting an overall drier week.
  
- The week 2 timeframe is expected to have near normal to slightly above normal temps with slightly above average risks for precip. Not eyeing a specific threat for a tropical storm or hurricane at this distance.
  
- Right now, we have risks for about average temps and below average precip for the first half of November. Tropical risks are on the lower side, but not a threat that should be 100% eliminated.
