Week 1 Forecast

Long-Range Forecast Discussion

- in the next 7 days will be an approaching cold front on THU. A few scattered chances will be possible Wed before more widespread moisture on THU. As is typical with passing of cold front, will need to watch for an uptick in winds THU evening into Friday.
- The week 2 timeframe is expected to have near normal to slightly below normal risks for temp and precip. Not eyeing a specific threat for a tropical storm or hurricane at this distance.
- Right now we are favoring near normal temperatures for the back half of November with slightly above normal precipitation risks. Tropical threats look quite minimal as we get towards the end of the season.
