## Short-Term Forecast Discussion

- Another dry day is expected for today.
- ENE winds in the AM will slowly transition to SE winds around 1 PM. Sustained winds will generally be around 5 – 10 MPH. Gusts approaching 15 MPH though 11 AM cannot be ruled out towards the boarding station.
- Highs temps look to be in the low 70s.
- **Fog is not favored for our stations, currently favoring any fog this AM to stay N of our stations.**

## Sustained Winds (12 PM CT)

## Simulated Radar Snapshot (11 AM CT)

## High Temperatures Today

## Short-Term Forecast Discussion

- Dry stretch expected to continue for Monday.
- Similar to today (Sunday), winds look to be sustained around 5 – 10 MPH out of the SE throughout the day on Monday.
- High temps on Monday look to be in the low to mid 70s.
- **Currently not anticipating fog for Monday, favoring any potential fog to stay N and E of our stations.**

## Sustained Winds (12 PM CT)

## Simulated Radar Snapshot (11 AM CT)

## High Temperatures Monday

## Short-Term Forecast Discussion

- Dry conditions are expected for Tuesday.
- Sustained winds for most of the day 5-10 MPH with gusts to 15 MPH at the boarding station through sundown. After sundown winds pick up, sustained winds 10-15 MPH at the boarding station with occasional gusts to 20 MPH possible. Winds generally coming out of the SSE.
- High temps Tue look to be in the mid to upper 70s.
- **Keeping an eye on potential fog E of our stations, currently not favoring fog for our stations on Tue.**

## Sustained Winds (8 PM CT)

## Simulated Radar Snapshot (2 PM CT)

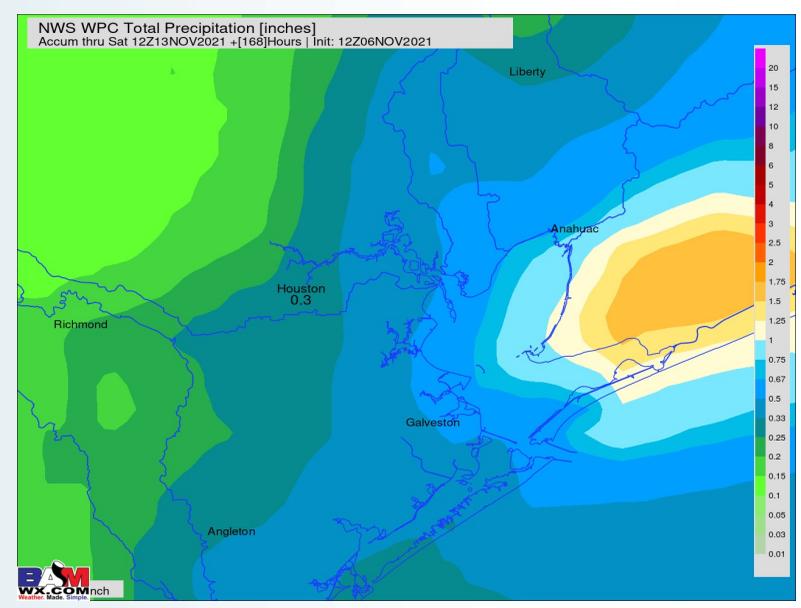

## High Temperatures Tuesday

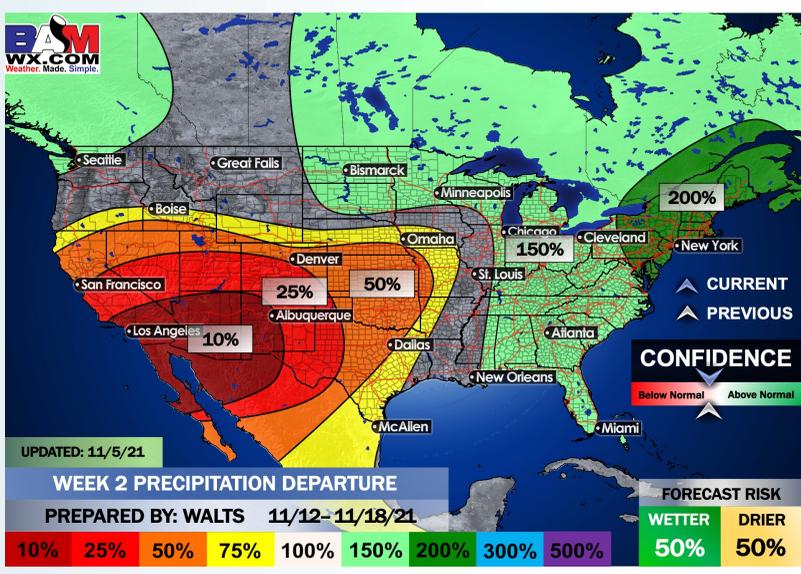

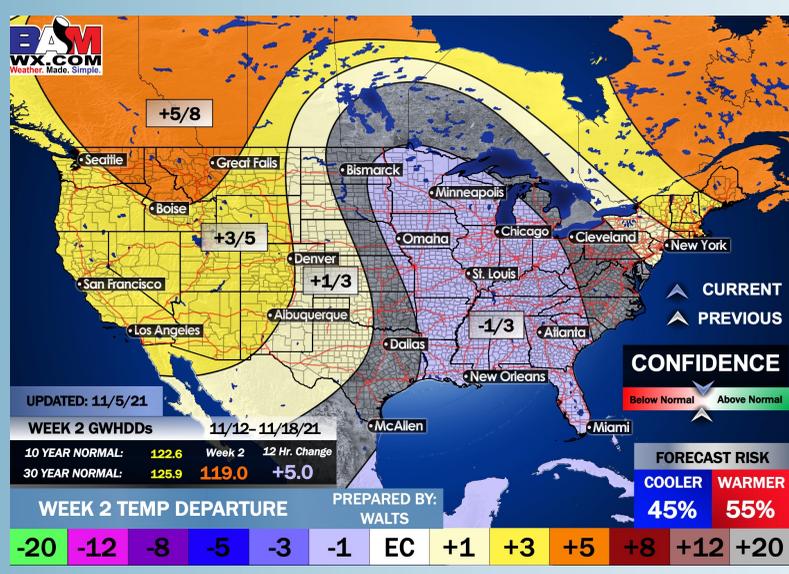

## Long-Range Forecast Discussion

- The main weather feature in the next 7 days will be an approaching cold front on THU. A few scattered chances will be possible Wed before more widespread moisture on THU. As is typical with passing of cold front, will need to watch for an uptick in winds THU evening into Friday.
- The week 2 timeframe is expected to have near normal to slightly below normal risks for temp and precip. Not eyeing a specific threat for a tropical storm or hurricane at this distance.
- Right now we are favoring near normal temperatures for the back half of November with slightly above normal precipitation risks. Tropical threats look quite minimal as we get towards the end of the season.
