*Precip:* Scattered showers around the area will continue through the rest of the evening hours, likely not winding down until the pre-dawn hours of Tuesday. Coverage will slowly turn more isolated, and intensity will be light to at times moderate.

Wind: Sustained winds are favored to come from the ESE at 13-18 MPH with gusts 18-23 MPH for the rest of the evening and overnight hours. There may be a brief period of time in the 8-10 PM window of 20-25 MPH gusts.

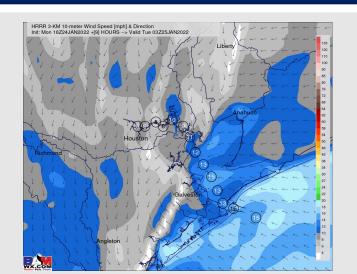

Temps: Lows fall back near 50F.

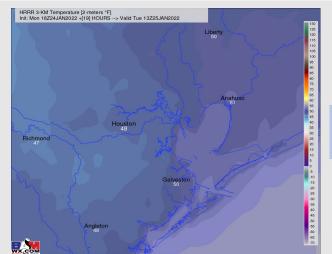

Visibility: Cannot rule out some lower visibilities from about 8 PM tonight through 4 AM tomorrow morning. Current thinking is that this will be more of a mist/ drizzle during this time period vs fog.
