## Tropical Model Tracks the Next 10 Days

### European Data

Keeping eyes beyond day 10

### American Data

No "high confidence" tropical threats noted over the next 10 days as model data (see above) keeps SE Texas rather quiet in this timeframe. However, we do want to mention a potential system near the day 10 period which will need to be monitored. At this distance, there are more questions vs answers. However, it is worth watching the Yucatan around ~June 19<sup>th</sup> which is around the time when any potential system would work in to that area.
