5 Day Forecast Discussion: Dry Conditions anticipated today into Sunday, with a small chance of an isolated pop-up shower/storm Sunday evening. Leaning towards a dry forecast overall for the next 3 days, however. Best chances of scattered showers/storms will be for Monday, early afternoon into early Tuesday morning. Not anticipating a washout during this period, but will need to monitor Monday night for more higher threat of rain potential. Heat and humidity will slightly increase Monday and Tuesday, with high temperatures into the upper 80's F. Winds will remain light for the period, with a few gusts over 20MPH possible Monday with approaching front.

6AM Weather Forecast

Friday, July 29, 2022

Long Range Forecast Discussion & Scenarios: Aside from isolated chances of precipitation Sunday PM, the Monday-Tuesday time frame will be the main focus for shower/storm chances in the extended period. Depending on the timing of the cold front for Monday afternoon into the overnight period, a few moderate to heavy pulses will be possible. Anticipating dry conditions right now for Wed. through Fri. at this time, with high temperatures in the lower 90's and heat indices reaching 96 on Friday potentially. Not favoring any concerns with gusty winds, with the exception of Monday-Tuesday as frontal system moves through the region. Occasional gusts should remain below 20-25MPH.
