

European Data Tropical Tracks Next 10 Days

Lower threat overall, but will still continue to be monitored.

Likely out to sea with any *potential* impact coming along the E Coast. Concern for any Gulf impacts are low until any development occurs.

No direct tropical threat for Houston expected over the next 7 days, however continuing to monitor increasing activity in the Atlantic. While a limited window exists in the Caribbean for development of a tropical system, favoring activity to remain south of the Houston area at this time. Atlantic activity looking to stay in the Atlantic.

See slides below for official thoughts on winds.

Forecast Discussion

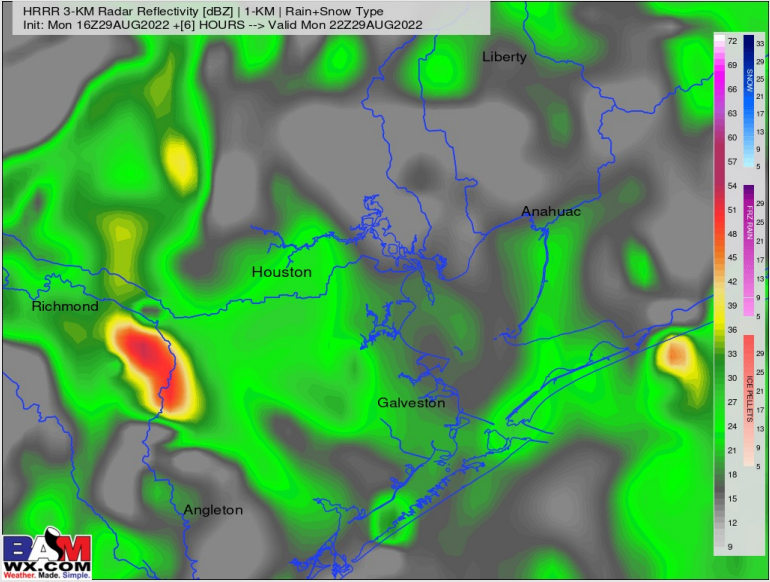

Precip Forecast: 6 PM CT

Precip: Scattered showers and thunderstorms will continue to move through the area here out through the evening hours. After 8PM, expecting only a 20-30% chance for an isolated shower/storm into the overnight with mainly dry conditions. Locally heavy downpours and stronger wind gusts possible under any of these stronger cells.

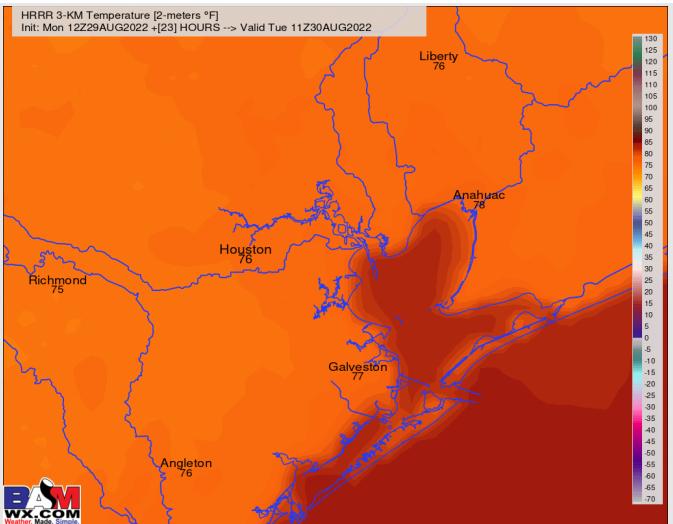

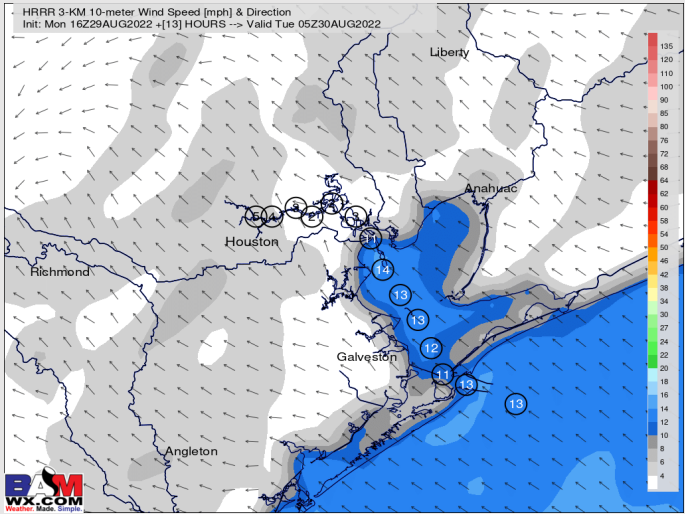

Wind: Expecting winds the rest of the day to be 10-15 MPH with gusts 15-20 MPH possible at the boarding station. Wind direction will generally out of the S/SE. We will need to watch for elevated gusts reaching 25-35 MPH under some heavier cells, but this is not expected to be widespread.

Temps: Lows will be in the upper 70s to lower 80s for most stations.

Visibility: Not anticipating any fog concerns at this time, but rain will likely hold periods of limited visibility.

Wind Speed 1 AM CT

Low Temps Tuesday AM

Houston Pilots: Tues. 8/30/2022

Forecast Discussion

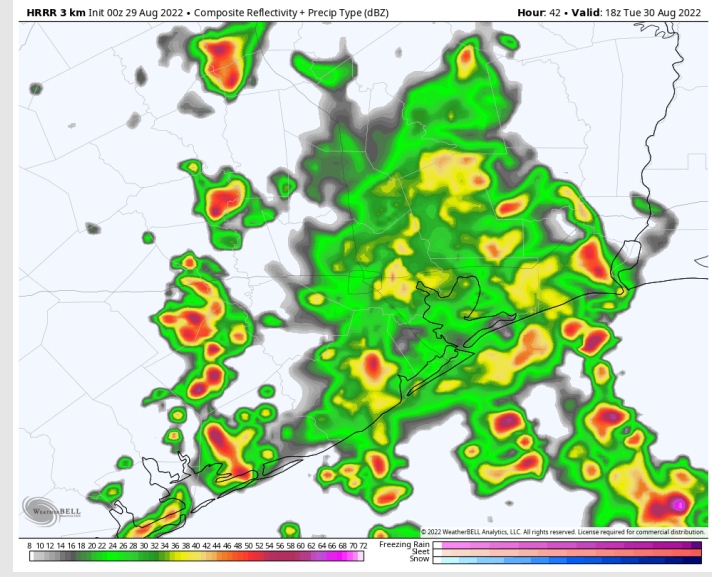

Precip: Scattered 30% chances for showers/storms beginning around 9AM Tuesday. Between 11AM-5PM coverage will increase to 70% with chances decreasing after 5PM to 20%. Locally heavy downpours, gusty winds, and lightning all are possible under stronger cells.

Wind: Winds will be tricky on Tuesday as they look to be very precip dependent. Outside of precip, winds out of the SSE at 8-13 MPH will be favored, however winds can increase a good bit inside of cells and there can be gusts 20-30 MPH embedded in heavier pockets of thunderstorms.

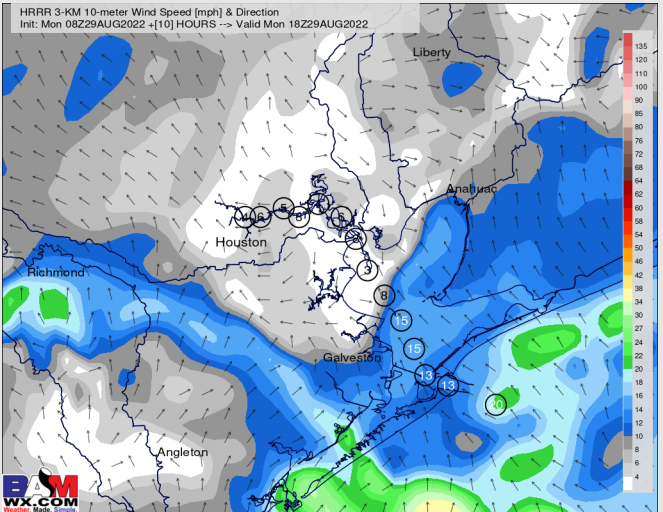

Temps: High temps Tuesday in the mid 80s F near the boarding station and in the upper 80s F near 90s F at all other stations.

Visibility: Not anticipating fog concerns at this time, but heavy rain will reduce visibility.

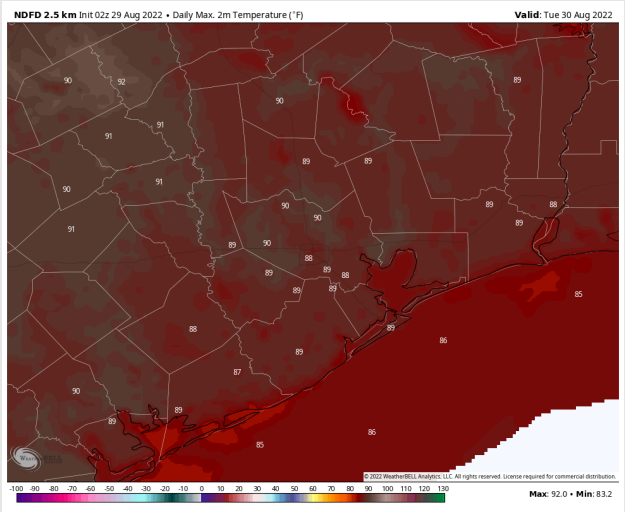

Precip Forecast: 1 PM CT

Wind Speed
10 AM CT

High Temps
Tuesday

Houston Pilots: Wed. 8/31/2022

Forecast Discussion

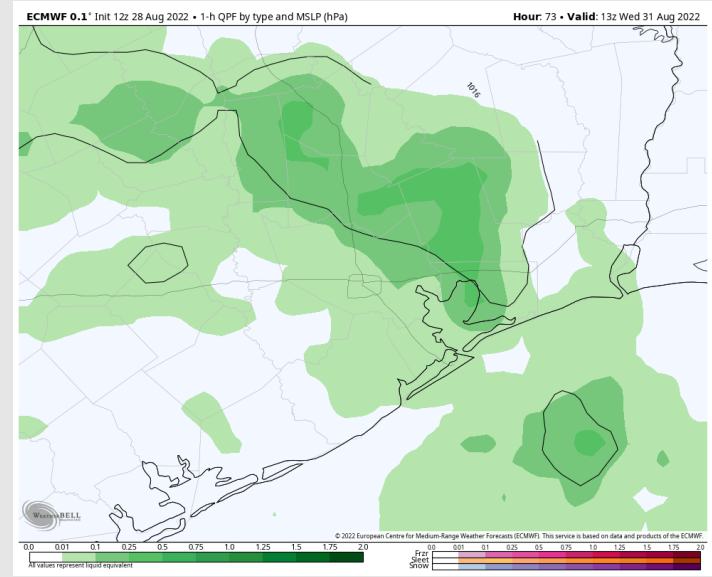

Precip: Anticipating scattered showers/storms Wednesday to begin around 4-6AM at 40% covers. Midday storm activity will decrease to 10% then resume around 3PM, however the better coverage will be north of Houston Metro.

Wind: Variable winds of 2-7 MPH Wednesday until 1PM. After 1PM winds will veer from the E 3-8 MPH and continue for the rest of the day/evening. Gusts of 15 MPH possible under stronger storms.

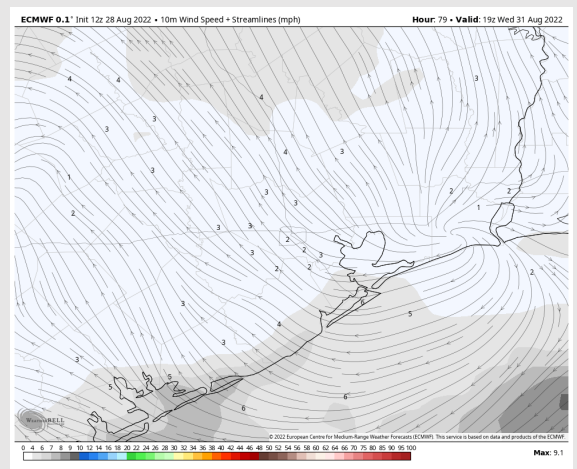

Temps: High temps Wednesday in the mid 80s near the boarding station and in the upper 80s F / near 90 F at all other stations.

Visibility: Not anticipating fog concerns at this time.

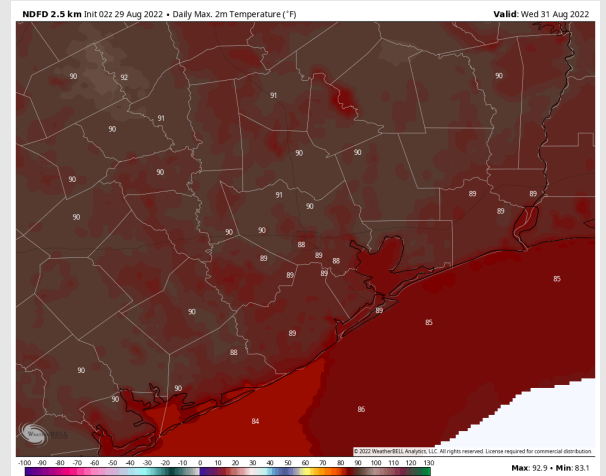

Precip Forecast: 8 AM CT

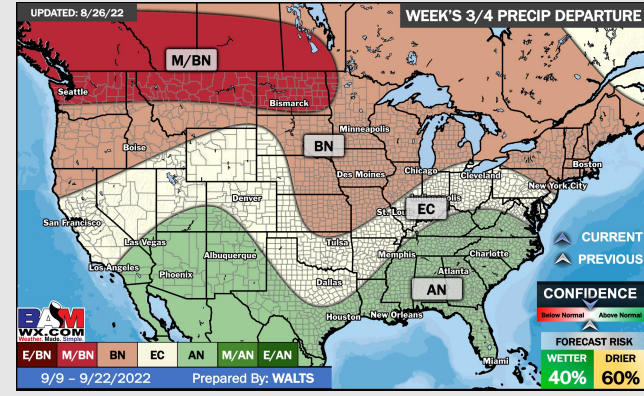

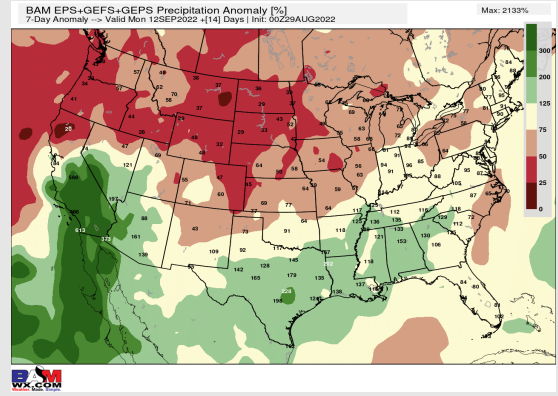

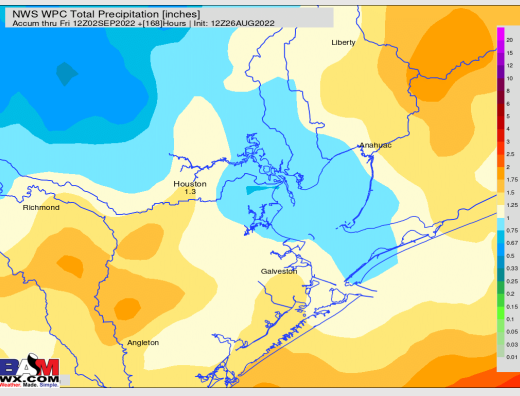

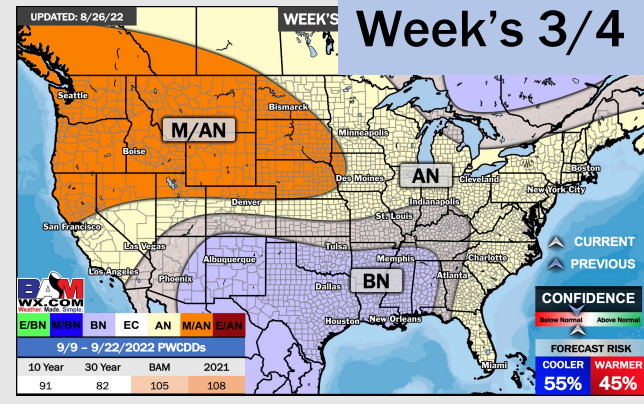

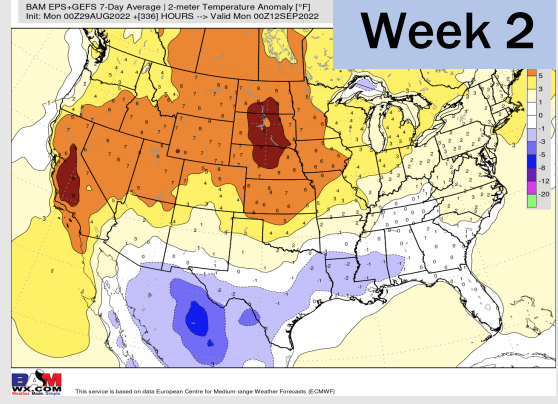

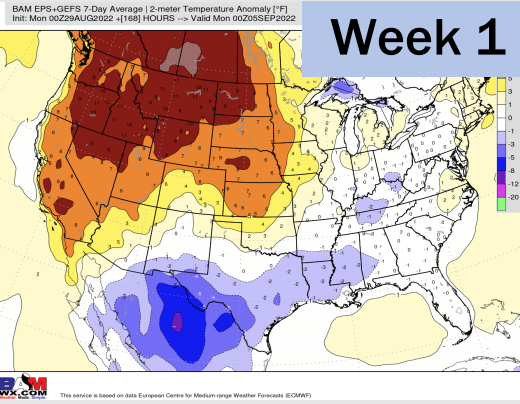

Wind Speed
2 PM CT

High Temps
Wednesday

Houston Pilots: 8/29/22

- Temperatures expected to be below normal for the next week. Increased rainfall chances as storms move through the area the next several days.
- Week 2 likely features below normal temperatures and above normal precipitation.
- The weeks 3/4 timeframe into mid September looks to feature below normal temperatures and above normal risks for precip.
