## 5-Day Rainfall Map

## NEXT 5 DAYS: IMPORTANT FORECAST NOTES (as of 2 PM ET, 9/1/22):

### Precipitation:

- ✓ Rather quiet weather pattern today and tomorrow.
- ✓ A mostly dry weekend is expected. Due data trending a bit stronger with energy moving in late Sat into Sun, we have increased chances some Sat PM and beyond.
- ✓ The weekend is certainly not a washout and most, if not all of Sat/Sun will be dry, but a few isolated pockets of precip will be possible (mainly PM).
- ✓ Lightning cannot be ruled out, however we believe this will be a rather low end risk.

### Temperatures:

- ✓ Temperatures will be on the uptick into late week/ weekend with temperatures in the upper 80s F possible.
- ✓ Heat index values this weekend likely sit close to the air temp as dew points do not look as impressive.

### Wind/Clouds:

- ✓ Winds are not looking to be much of a concern with a southerly wind at 5-10 MPH favored for the weekend.
- ✓ Expecting partly to mostly sunny skies for today and beyond.
