

Houston Pilots Forecast Package

Updated: 5:00 AM CT

Saturday, January 21, 2023

Forecaster: Alyssa McClung

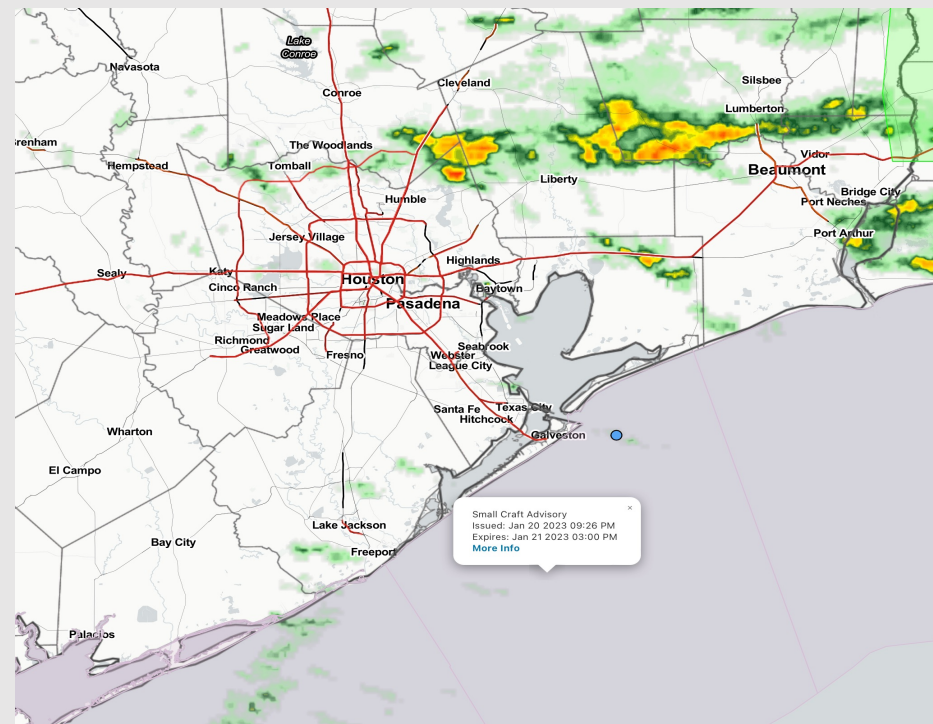

Weather Headlines

➤ Sunday morning may pose some reduced visibilities due to low level moisture producing misty conditions and possibly a couple pockets of fog (view visibility slide). Next threat comes THU.

➤ Today will consist of showers and thunderstorms with Sunday and Monday being dry days.

➤ Elevated winds for stations South of Morgan's Point will still be in play, especially near the Boarding Station (gusts of 30 – 35 kts possible today). Sunday/Monday will feature winds in the 10 -15-kt range.

➤ Worth keeping eyes out on Wednesday – Thursday next week for low water levels over the bay from prolonged elevated NW winds.

Confidence

TIMEFRAME DISCUSSED	THREAT
1 AM SUN – 4 AM SUN	Low - Med

- Anticipating a low to medium risk for visibility reduced to 3 – 5 miles early Sunday between 1 – 4 AM CT as low level moisture encourages misty conditions ahead of front.
- A few isolated pockets of fog (visibility less than 1 mile) mixed within these misty conditions cannot be ruled out for stations N of Morgan’s Point with the greatest risk being between 2 – 3 AM CT.
- Threat if favored to start at the 610 Bridge and continue to work south out ahead of cold front.
- Favoring fog threat to end after 4 AM CT.

Houston Pilots Extended Range Visibility Report

Tuesday 1/24/23

Winds eventually shifting out of the NW by PM hours will make fog unlikely. Reduced visibility risks will come in the AM hours via heavy rain.

Thursday 1/26/23

Winds will continue to be from the NW albeit calmer than Wednesday.

Wednesday 1/25/23

Winds will be from the NW throughout the day, making fog unlikely. Need to watch for low water levels across the bay as winds may be particularly strong.
