Houston Pilots Forecast Package

Updated: 5:00 AM CT Wednesday, February 15, 2023

Forecaster: Alyssa McClung

Weather Headlines

- Dense fog continues this morning. Anticipating fog to break up into the early PM before redevelopment into the evening/early Thur. View visibility slides for more details.
- Expecting rain chances to stick around today and early Thur. AM before drying out for the weekend.
- Check slides below for more details on daily breakdowns of winds as they will become elevated this afternoon. Winds behind the cold front Thursday will also lead to gusty winds (gusts 30+ knots in the PM)

Houston Pilots Visibility Report

TIMEFRAME DISCUSSED	THREAT
CURRENT - 12 PM WED	Med - High

- Widespread / dense fog with visibilities of less than 1 mile expected to continue this morning.
- Anticipating fog to remain dense through the 10 11 AM timeframe today before it begins to break up and become patchier in nature getting into the early afternoon. During this early afternoon timeframe, the Boarding Station will continue to be most at risk for lingering visibility issues of less than a mile.
- Expecting widespread fog impacts to be limited within the 12 5 PM with widespread fog returning after 5 PM.

Houston Pilots Visibility Report

Confidence **11 PM WED VISIBILITY 5 AM THU VISIBILITY** HRRR | Visibility [miles] HRRR | Visibility [miles] FORECAST + [23] HOURS --- VALID: 00:00 AM [EST] Thu FEB 16,2023 FORECAST + [41] HOURS --- VALID: 06:00 AM [EST] Thu FEB 16,2023 Liberty Above Normal **Below** 01 Normal Angletor Angleton

TIMEFRAME DISCUSSED	THREAT
12 PM WED - 8 AM THU	Medium - High

Expecting patchy, dense fog between the 12 – 5 PM timeframe Wednesday. After 5 PM, fog will become more widespread impacting all stations.

- Confidence is higher than average that there will be fog overnight Wednesday into the pre-dawn hours Thursday along with pockets of rain showers. Anticipating visibilities to be less than 1 mile.
- A cold front will work through the region between 5-8 AM hours Thursday and as it does so it will take precip with it and effectively wipe out any fog risks (from North to South) as winds turn from the NW.

Houston Pilots: Wed. 2/15/2023

Forecast Discussion

Precip: Isolated showers possible in the area between 10 AM – 9 PM. Coverage will be on the order of ~30% and intensity rather light. This is certainly not a washout of a day.

Wind: Winds shift from the SW to SSE by 6 AM and remain that way for the rest of the day. Winds will be at 5-10 kts across all stations until 9 AM. After 9 AM winds will pick back up to 10-15 kts for stations north of Morgan's Point and 13-18 kts for stations south of Morgan's Point and will stay that way for the rest of the day. Occasional gusts to 18-23 knots at the boarding station will be possible anytime after 1 PM.

Temps: High temperatures Wednesday in the near 70s F across all stations.

Visibility: Please check detailed fog slides above for fog risks today. There is likely a break into the PM hours before another risk heading Wednesday night – early Thursday AM.

Precip Forecast: 1 AM CT

High Temps Wednesday

Houston Pilots: Thu. 2/16/2023

Forecast Discussion

Precip: A line of showers and a few thunderstorms will be possible Thursday AM from 5 – 8 AM with the cold front. Dry conditions filter in behind the front.

Wind: Prior to 6 AM, winds for stations north of Morgan's Point at 5 - 10 kts and 10 - 15 kts for stations south of Morgan's Point coming from the SW. After 9 AM, winds increase to 13 - 17 kts for stations north of Morgan's Point, and 18-23 knots South of Morgan's Point. Wind gusts of 30 + kts possible around the Boarding Station most of the day.

Temps: High temperatures Thursday will be near 60 F across all stations. This happens early in the day.

Visibility: Fog will be possible before the passing of the cold front. More details on early AM threat on fog slides above.

Precip Forecast: 6 AM CT

Wind Speed 12 PM CT

High Temps Thursday

Houston Pilots: Fri. 2/17/2023

Forecast Discussion

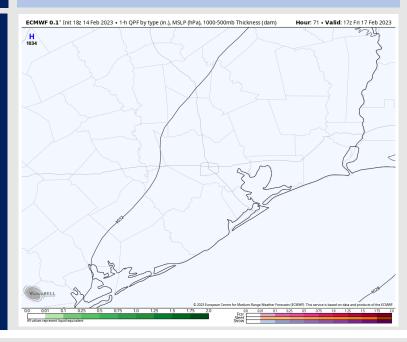

Precip: Anticipating dry conditions for Friday.

Wind: Sustained winds from the NW and gradually shifts from the NE throughout the entire day. Elevated winds of 13 – 17 kts for stations north of Morgan's Point and 17-22 kts for stations south of Morgan's Point will continue until 4 PM. Winds will then gradually decrease to 5-10 kts for stations north of Morgan's Point and 12 – 17 kts for stations south of Morgan's Point and stay that way for the rest of the evening. Wind gusts of 30 kts will be possible for stations south of 51/52 until 12 PM, before gusts fall to 20-25 knots at the boarding station.

Temps: High temperatures Friday will be mid to lower 50s F across all other stations.

Visibility: Not anticipating visibility concerns at this time.

Precip Forecast: 11 AM CT

Wind Speed

11 AM CT

High Temps Friday

Houston Pilots: 2/15/23

- Tuesday through Thursday expected to be active in precipitation, before another dry stretch beyond that. Temps expected to be near to below normal.
- Expecting near to below normal precipitation chances and above normal temperatures for the week 2 timeframe.
- Equal chances for precipitation and above normal temperatures favored in the week ³/₄ timeframe.
