## **Houston Pilots Forecast Package**

Updated: 1:00 PM CT Thursday, February 23, 2023

Forecaster: Alyssa McClung

## Weather Headlines

- Sea fog expected to increase in coverage with visibilities reduced to less than 1 mile. Fog will likely continue across stations over the next couple days with coverage alternating between patchy and widespread.
- Isolated shower chances on the order of <20% are expected through at least mid-week. This looks like a rather low-end risk.
- Winds will continue primarily out of the south (with variations to SW) over the coming days. A weak front tries to work in later today, but likely struggles to change wind direction.
