### Confidence

TIMEFRAME DISCUSSED	THREAT
CURRENT - 10 AM THU	Medium

- ➤ Favoring patchy sea fog to remain a risk for the Boarding Station and Station 25/26 this afternoon (visibility of 3 5 miles) with the majority of widespread fog setting up further S into the Gulf. As we approach the 5 PM timeframe, anticipating the sea fog risk to begin to drift into the Bay, impacting stations from South to North.
- ➤ It is likely visibilities will range from 3 5 miles with the greatest fog risk (coverage and visibility of 2 miles or less) being between 8 PM and 6 AM Thursday. All stations south of Morgan's Point will be at risk for periods of visibilities reduced to <1 mile.
- ➤ Favoring fog to lift for the majority of stations around the 8 AM timeframe. Fog will possibly last out at the Boarding Station until 10 AM.
