Hazardous Weather Alerts:

ALL CLEAR

IMPORTANT FORECAST NOTES (as of 8:00 AM ET, 6/20/23):

- ✓ The bulk of very light precip is working out of the area currently. Chances will continue to diminish the deeper into the morning we work. Potential totals coming out of these lower end totals is on the order of Trace to 0.05"
- ✓ The mid-afternoon hours will hold very low end (but non-0 chances) risk for an isolated light shower as lingering energy just sticks around W PA. This energy departs the area right around gametime, which will lead to chances winding down as we work toward sunset.
- ✓ Temps will be in the upper 70s to start the game, falling to the low 70s toward the end. Winds out of the E at 8-13 MPH.

Dew Forecast

- ✓ Dew will be possible Wednesday AM ~60%. Clouds are the main factor that is keeping chances lower than they would be if we had clear skies.
