7-Day Rainfall Map

NEXT 7 DAYS: IMPORTANT FORECAST NOTES (as of 9 AM ET, 7/24/23):

Precipitation:

- ✓ Primary days with greatest concerns: Wednesday and Saturday. Current thinking is both will hold strong to severe storm potential in the PM hours.
- ✓ Over the next week, the driest/ lowest chance days will be Tue/Thu/Sun.
- ✓ This is not a super active pattern, but minor disturbances will lead to chances every few days.

Temperatures:

- ✓ The warmth will linger about ~5 days longer than originally anticipated, bringing above average temps to start the fair.
- ✓ **Thursday / Friday will hold the potential for “feels like” temps to sit 95-100F in the mid PM hours.**
- ✓ We believe the second week of the fair will be cooler than the start.

Wind/Clouds:

- ✓ Non-precip winds will be highest Wed/Thu, where a few gusts 15-25 MPH will be possible.
- ✓ Cloudiest days will be Wed/Sat tied to the precip risks.
