Houston Pilots Forecast Package

Updated: 1:20 PM CT

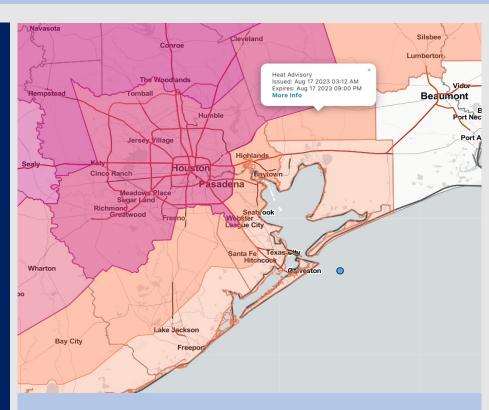

Thursday, August 17, 2023

Weather Headlines

- A dry forecast is in store over the coming days.
- Excessive heat concerns (95-100+F) to continue through the week.
- We are monitoring for the low-end potential (20%) for the development of a tropical cyclone within the Gulf of Mexico in the next 7-days.

Radar/NWS Alerts: 1:20 PM CT

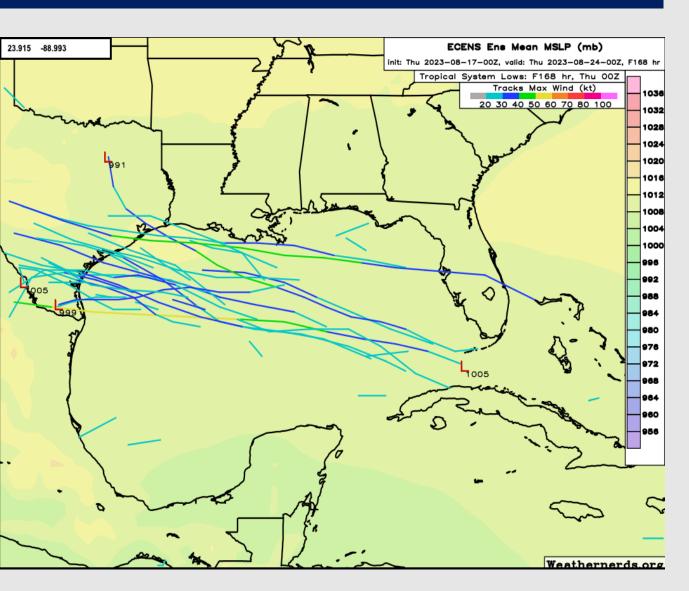

As always, please do not hesitate to reach out to us with any forecast questions via the chat option on the Weather Porthole or our on-call number, (317)-560-8122 press 1 for forecast questions.

Houston Pilots Tropical Update

EPS Low Pressure Tracks Next 7-Days

Data continues to try to develop a low-pressure system in the Gulf late Sunday/early Monday. While it seems unlikely at this distance it produces a hurricane, we need to watch trends closely over the next couple days to see if a tropical storm can form. Regardless, this will likely lead to uptick and rain/ storms activity.

Wind Speed: 7 PM CT

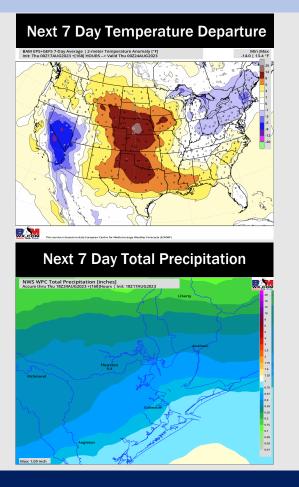

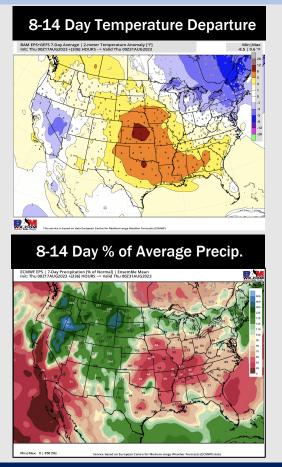

High Temps Saturday

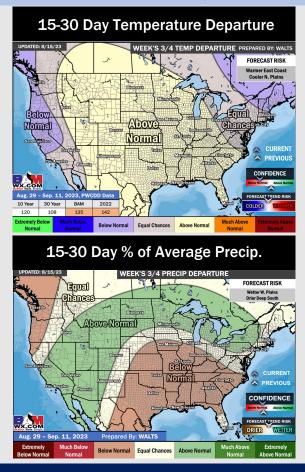

Houston Pilots: 8/17/23

- Next Tuesday will be the "best" precip chance over the next several days with most of the week staying dry. Heavy rain looks to be possible with Tuesday's wave of activity.
- Expecting near normal precipitation chances and above normal temperatures for the week 2 timeframe.
- > Above normal temperatures and below normal chances for precipitation are favored in the weeks 3/4 timeframe.
