TIMEFRAME DISCUSSED

THREAT

NOW - 4 PM FRI

Med

Favoring areas of widespread, sea fog to be likely from 4AM through 9AM for locations S of Morgan's Point. Dense fog already beginning to build in around the Boarding station as of 3:00AM. Locations N of Morgan's Point run the risk of patchy dense fog during the same time frame, but confidence remains slightly lower.

- Reduced visibilities of less than 1/2 mile will be the primary hazard, with patchier fog for stations N of Morgan's point at 1 mile or less.
- Exit timing for sea fog to be highly dependent on when front can exit the area. Favoring sea fog to exit majority of stations (with the exception of the boarding station) shortly after 11AM. Fog likely to stick around the boarding station through 4PM.
