Current Weather Alerts:

No Active Alerts

Temperatures:

- ✓ High Temperatures today will again be near steady at 39 to 40 F, occurring near 11 AM - 12 PM. Temps will cool slightly into the early afternoon.

Wind/Clouds:

- ✓ There will be a thick overcast sky for today with misty/drizzle conditions
- ✓ Sustained winds will be at 5 - 10 mph today, calming to 3-7 mph after 6 PM
- ✓ Gusts of up to 17 - 22 mph are possible mainly before 5 PM. After 5 PM gusts lighten to 13 - 18 mph.

FORECAST NOTES

Today's Precipitation Chances:

Much like yesterday, foggy conditions in the remaining morning hours will turn into more of a mist/drizzle in the afternoon, especially by 2 PM and into the evening. Winds from the NNW off the lake will aide in providing light moisture transport. Gradual accumulation of up to 0.03" is possible, but favoring around 0.01-0.02"

Icing concerns?

While confidence is low at this time, drizzle threats from the late evening can transition into freezing drizzle Monday morning from about 2 AM - 7 AM. It is possible air temps remain too warm at 33 F, however winds are from the NW that can provide a weak cold air source. The main concern would be for coatings on elevated surfaces.

Dew/Frost:

Wet surfaces are favored into Monday morning with persistent drizzle/mist.

Rainfall totals through Friday

NEXT 5 DAYS: IMPORTANT FORECAST NOTES:

Precipitation:

- ✓ **Mon:** A few pockets of mist/drizzle are possible in the AM with foggy conditions. Late AM into the early afternoon is favored to be dry.
- ✓ **Tue:** A very weak cold front will enter towards the early to mid AM, with the best timeframe for a passing rain shower from about 1 AM - 9 AM. This would yield light rain amounts at around 0.1-0.2". Freezing drizzle cannot be ruled out at this distance as well, but for now temps look to be too mild. Spotty showers can linger in the PM.
- ✓ **Wed-Thu:** Conditions will look to dry out as high pressure works in behind the weak cold front. A stray shower would be possible THU AM with another weak cold front
- ✓ **FRI:** Favoring a dry day.

Temperatures:

- ✓ Temps will be near steady to start the week in the upper 30s to lower 40s F.
- ✓ Towards WED-FRI temps can warm slightly more into the mid 40s F as more sun will be able to work through persistent cloud cover.

Wind/Clouds:

- ✓ Overcast skies will be in store for Monday AM with some breaks in clouds for the afternoon.
- ✓ Mostly cloudy skies will persist into Tuesday with the cold front, but breaks in clouds will be possible Tuesday afternoon into WED/THU as high pressure settles in.
- ✓ Winds will seldom exceed 10 - 15 mph sustained over the next several days. A few gusts of up to 18 - 23 mph will be possible TUE PM + THU AM
