7:00 AM Weather Forecast

Hour by Hour Forecast:

FORECAST NOTES

Today's Precipitation Chances:

Today is expected to be a dry day.

Icing concerns?

Ground should be too warm for any icing concerns.

Dew/Frost:

Confidence is lower regarding any dew formation (or frost) into THU AM. Winds may be just elevated enough to limit dew/ frost formation. Furthermore, would favor temperatures being JUST warm enough for more of a dew vs frost. However, if colder temperatures verify by a degree or two, frost will be possible. Would put chances around 20%.

Current Weather Alerts:

None

Temperatures:

- ✓ While mostly cloudy conditions are expected today, some peaks of sun will be possible heading through the day.

Wind/Clouds:

- ✓ While mostly cloudy conditions are expected today, some peaks of sun will be possible heading through the day.
- ✓ SW winds are expected through the day today, sustained near 5 – 10 MPH. Gust near ~20 MPH will be possible as well.

Next 7 Day Rainfall Totals

NEXT 5 DAYS: IMPORTANT FORECAST NOTES:

Precipitation:

- ✓ **WED:** A dry day is expected today.
- ✓ **THU:** Lower confidence regarding chances for drizzle tomorrow afternoon/ evening. A front passes through the area – however, currently expecting dry conditions.
- ✓ **FRI-TUE:** A drier stretch is expected into the extended pattern as an area of high pressure moves in and a low-pressure system moves through well to our south. We will need to watch late next week for the return of rain chances.

Temperatures:

- ✓ A much milder pattern is upcoming. Heading into next weekend, high temperatures may start flirting with 50 F.

Wind/Clouds:

- ✓ More sunshine is expected over the coming days.
- ✓ Pesky clouds continue to be persistent today through Friday, although some peaks of sun will be possible.
- ✓ More sunshine is expected this weekend into MON/ TUE. Clouds may be on the increase thereafter.
- ✓ No strong signals concerning hazardous winds. However, winds will be elevated vs the last few days/ weeks upcoming.
