7:30 AM Weather Forecast

Hour by Hour Forecast:

FORECAST NOTES

Current Weather Alerts:

Special Weather Statement - Frost

Temperatures:

- ✓ Temperatures can get into the mid 40's F today. However, as the winds shift after the 2 - 4 PM window, a rather sharp drop in temperatures will be possible - perhaps even more drastic vs the chart to the left. Low temperatures to 34 - 36 F will be possible FRI AM.

Wind/Clouds:

- ✓ Today will offer up the most sunshine the Chicago area has seen for over the last week or so. Mostly sunny conditions are expected.
- ✓ SW winds will give way to N/ NNE winds into the early afternoon as a front passes. Winds will pick up slightly into the evening as well. From 7 PM - 12 AM, a few wind gusts of 25 - 30 MPH cannot be fully ruled out.

Today's Precipitation Chances:

Today is expected to be a dry day.

Icing concerns?

A nonzero risk for a slick spot this AM due to frost - although that threat will quickly be winding down. Temperatures are cooler to the west of Wrigley Field where that potential is greater. A very low/ nonzero risk for a similar set up tomorrow.

Dew/Frost:

Would need to watch for the development of frost on grassy surfaces tomorrow. Nonzero risk for pavement surfaces.

Next 7 Day Rainfall Totals

NEXT 5 DAYS: IMPORTANT FORECAST NOTES:

Precipitation:

- ✓ **THU:** Despite a front moving through, I continue to anticipate dry conditions on today.
- ✓ **FRI-TUE:** A drier stretch is expected into the extended pattern as an area of high pressure moves in and a low-pressure system moves through well to our south. We will need to watch late next week for the return of rain chances.
- ✓ **WED-SAT:** Low confidence at this distance in any specifics or details. However, after a drier stretch, a more active weather pattern could emerge once again.

Temperatures:

- ✓ A much milder pattern is upcoming. Heading into next weekend, high temperatures may start flirting with 50 F.

Wind/Clouds:

- ✓ More sunshine is expected over the coming days.
- ✓ Today has trended sunnier! Partly cloudy skies expected tomorrow.
- ✓ More sunshine is expected this weekend into MON/ TUE. Clouds may be on the increase thereafter.
- ✓ No strong signals concerning hazardous winds. However, winds will be elevated vs the last few days/ weeks upcoming.
