Hour by Hour Forecast:

FORECAST NOTES

Today's Precipitation Chances:

Today is expected to be a dry day.

Icing concerns?

Frost on grass and pavement will be possible tomorrow AM as cloud cover is favored to be partly cloudy with high humidity and low winds during the overnight

Dew/Frost:

Frost is probable for tomorrow AM (70% chance)

Current Weather Alerts:

None

Temperatures:

- ✓ Temperatures generally expected to get into the upper 30's F today to near 40 F. Application in hourly today at risk of being slightly too cool due to overestimating cloud cover.

Wind/Clouds:

- ✓ Partly to mostly cloudy skies are favored for today. There can be some haziness as well with a thin layer of clouds
- ✓ Due to strong high pressure today, winds will remain very light from the E at 4 - 9 mph.

Next 7 Day Rainfall Totals

NEXT 5 DAYS: IMPORTANT FORECAST NOTES:

Precipitation:

- ✓ **SUN - WED:** A drier stretch of weather is expected over the next few days. Earliest opportunity for a stray shower would arrive late WED PM.
- ✓ **THU+:** The pattern can start to turn next active into next weekend with precipitation chances coming into the picture. Difficult to get into any specifics / details at this range. However, general indications point to rain being the precipitation type. Thursday AM into PM would likely feature a cold front. The next potential winter concern would not arrive until ~Feb 11th

Temperatures:

- ✓ A gradual warm up is expected into next weekend. High temperatures into the 40's F will be common with closer to 50 F by next WED - FRI.

Wind/Clouds:

- ✓ More sunshine is expected over the coming days.
- ✓ SAT - TUE will likely be the "sunniest" stretch before more clouds can work back into the picture out ahead of a low-pressure system.
- ✓ No strong signals concerning hazardous winds. We will need to watch into next weekend some stronger winds pending the strength of a low-pressure system.
