7:35 AM Weather Forecast

Hour by Hour Forecast:

FORECAST NOTES

Current Weather Alerts:

All Clear

Temperatures:

- ✓ High temperatures today expected to reach the low 40s F near 41 F.

Wind/Clouds:

- ✓ Partly to mostly sunny skies expected for today. Cloud cover will start to increase near 6 PM CT with a weak cold front incoming late Sunday.
- ✓ Wind gusts will not be much of a factor today. Sustained winds will be from the NW at about 6 - 9 mph, seldom exceeding 12 mph.

Today's Precipitation Chances:

Favoring dry conditions today

Rainfall Totals / Icing concerns?

No icing concerns.

Dew/Frost:

Some frost will be possible on grass tomorrow AM – roughly a 20% chance of this occurring. Parameters across the board are not too impressive (lacking some low-level moisture). However, winds will be essentially non-existent with partly to mostly cloudy cloud cover. Patchy light frosting on grass is possible, but not widespread.

Rainfall (liquid equivalent) estimates: Next 7 days

NEXT 5 DAYS: IMPORTANT FORECAST NOTES:

Precipitation:

- ✓ **SUN-MON:** A weak cold front will reach the area near 10 PM SUN - 2 AM MON. Conditions are favored to remain dry. The main storm system will stay well off to the SE Monday.
- ✓ **TUE - THU:** Watching this period closely for some clipper-like systems that can swing through that can provide for rain/ snow opportunities. Confidence in specifics remains very low at this distance. Accumulating snow is not out of the question. It is also worth noting the data varies greatly with the timing of individual system, so there can certainly be plenty of dry stretches. Also note the low percentages as well.

Temperatures:

- ✓ Near steady temps in store through mid to lake week in the low 40s F
- ✓ After Thursday, temperatures return to the mid 30s F to close out the week
- ✓ Low temperatures once again look to get back to near/ below 32 F into the following weekend.

Wind/Clouds:

- ✓ Mostly cloudy skies are possible in the AM Sunday, but partial clearing favored for the afternoon with mostly sunny skies
- ✓ MON- WED: A mixture of clouds and sun with slightly more clouds than sun overall
- ✓ THU/FRI would likely hold cloudier days with clipper systems/waves of rain + snow
- ✓ Wind gusts exceeding 20 mph will be rare in the short term. The next "gusty" day of 20 - 30 mph gusts arrives Thursday.
