8:00 AM Weather Forecast

## Hour by Hour Forecast:

## FORECAST NOTES

### Today's Precipitation Chances:

Favoring dry conditions today

### Snow totals /Icing concerns?

No icing concerns today

### Dew/Frost:

Frost formation is likely on grass tomorrow AM (60% or greater). There is limited low level moisture, so this frost is not expected to be heavy. Nearly clear skies and calm winds however will prompt the development of light frost. A few areas of frost will be possible on pavement, but this will be patchy and mainly for more elevated areas/naturally cooler locations that are shaded.

## Current Weather Alerts:

All Clear

### Temperatures:

- ✓ High temperatures today expected to reach the low 40s F near 41 F.

### Wind/Clouds:

- ✓ Skies will be mostly cloudy during the AM hours but clearing is favored for the afternoon. Skies will be partly cloudy after 1 PM. By 10 PM skies will be mostly clear.
- ✓ Wind gusts will not be a factor today. A light NW wind at 3 - 7 mph is in store.

## Blend of Models Snowfall Forecast Next 7 days

## NEXT 5 DAYS: IMPORTANT FORECAST NOTES:

### Precipitation:

- ✓ **MON:** Dry Conditions favored
- ✓ **TUE:** Dry Conditions favored as well, there would only be an isolated chance for a stray shower/snow shower in the evening
- ✓ **WED - THU:** Watching this period closely for some clipper-like systems that can swing through that can provide for rain/ snow opportunities. Confidence in specifics remains quite low at this time still. At least with the weak wave on WED, this has trended weaker and further south of the area. There are risks that Wednesday fares dry as well. THU is almost a guarantee for precipitation, mainly from about 3 AM - 12 PM. For now, snow threats look low but are non-zero
- ✓ **FRI:** Next best potential at a significant accumulating snow event. We simply need to get closer to date for more info, but there is a moderate to high risk for 1" + of snow.

### Temperatures:

- ✓ Near steady temps in store through mid to lake week in the low 40s F
- ✓ After Thursday, temperatures return to the mid 30s F to close out the week
- ✓ Low temperatures once again look to get back to below 32 F to start the weekend.

### Wind/Clouds:

- ✓ **MON- WED:** A mixture of clouds and sun with slightly more clouds than sun overall
- ✓ **THU/FRI:** would likely hold cloudier days with clipper systems/waves of rain + snow
- ✓ Wind gusts exceeding 20 mph will be rare in the short term. The next "gusty" day of 25 - 30 mph gusts arrives Thursday.
