7:15 AM Weather Forecast

Hour by Hour Forecast:

FORECAST NOTES

Current Weather Alerts:

All Clear

Temperatures:

- ✓ High temperatures today can reach into the lower 40s F to 42 F. Application would pose the risk of being a touch too cool.

Wind/Clouds:

- ✓ Mostly sunny skies in store for today. Cloud cover will start to increase towards 4 PM and into the evening. Partly cloudy skies are favored overnight.
- ✓ Light NW wind at 3-8 mph today. Gusts will not be a factor.

Today's Precipitation Chances:

Conditions are favored to remain dry today. An isolated chance for a snow flurry exists from about 12 - 6 AM tomorrow morning with a 10% chance, however the corridor for light snow flurry chances is favored to move south. Favoring conditions to remain dry but it is worth mentioning this low-end risk.

Dry conditions are Snow totals /Icing concerns?

No icing concerns today

Dew/Frost:

Frost formation will be possible in the AM tomorrow with partly cloudy skies and some moisture (slightly better than this AM) to contend with in the low levels. As such there is about a 60% chance to see patchy frost on grassy surfaces from about 3 - 9 AM.

EPS ENSEMBLE FAVORED 7-DAY SNOW TOTALS

NEXT 5 DAYS: IMPORTANT FORECAST NOTES:

Precipitation:

- ✓ **WED:** Data continues to trend drier out of this wave. Any precipitation would be very light in the early AM
- ✓ **THU:** A clipper system will impact the area in the early AM near 3 AM - 9AM. We need to watch closely for snow corridors, but for now we favor snow to stay north of the CHI area with the corridor to be in S WI/extreme N IL
- ✓ **FRI-SAT:** Still some slightly below normal confidence, but most data is pulling the wave to the south of the area, keeping conditions dry. It is more likely than not that the trend will lighten with snow totals on Friday. There is a sneaky cold front that would at least offer some flurry chances on Saturday and into Sunday but a hit from a low-pressure system itself is not likely
- ✓ **SUN:** Flurries would be possible on Sunday behind the weak cold front. This does open some "cooler" air but not bitterly cold

Temperatures:

- ✓ Milder temperatures linger though Thursday before some weak cold fronts allow for an intermission of cooler temperatures around/below freezing for the weekend
- ✓ A warmup ensues to start next week with temps into the low to mid 40s.

Wind/Clouds:

- ✓ **WED:** Party cloudy skies in the AM will see increasing clouds post 6 PM
- ✓ **THU:** Overcast for the first half of the day with partial clearing (partly cloudy) in the mid PM.
- ✓ **FRI:** Clouds return in the early AM with overcast for most of the day
- ✓ **SAT/SUN:** Partly to mostly cloudy skies with a few period of flurries
- ✓ Would need to watch for 25 - 30 mph gusts Thu AM. Outside of this next best gusty period would be SAT AM
