# **Houston Pilots Forecast Package**

Updated: 12:45 AM CT Thursday, February 8, 2024

**Forecaster: John Kemper** 

### Weather Headlines

- Drizzle and scattered showers will begin to work into the area, with chances continuing through start of the weekend.
- Gusts of 20 25 mph will remain in the forecast through the end of the week.
- Increasing patchy sea fog risks will be in play as we get into Friday morning and the beginning of the weekend.

HRRR   Visibility [miles] FORECAST + [38] HOURS VALID: 09:00 AM [EST] Fri FEB 09:202 000000000000000000000000000000000	Above Normal
	Below Normal

212

#### Patchy to widespread dense sea fog will be possible from late Thursday Evening through Friday late morning. Visibilities of less than one mile will be likely for stations affected. Confidence remains below normal for this event, with drizzle / light rain showers mixing in during the AM hours and potentially limiting coverage.

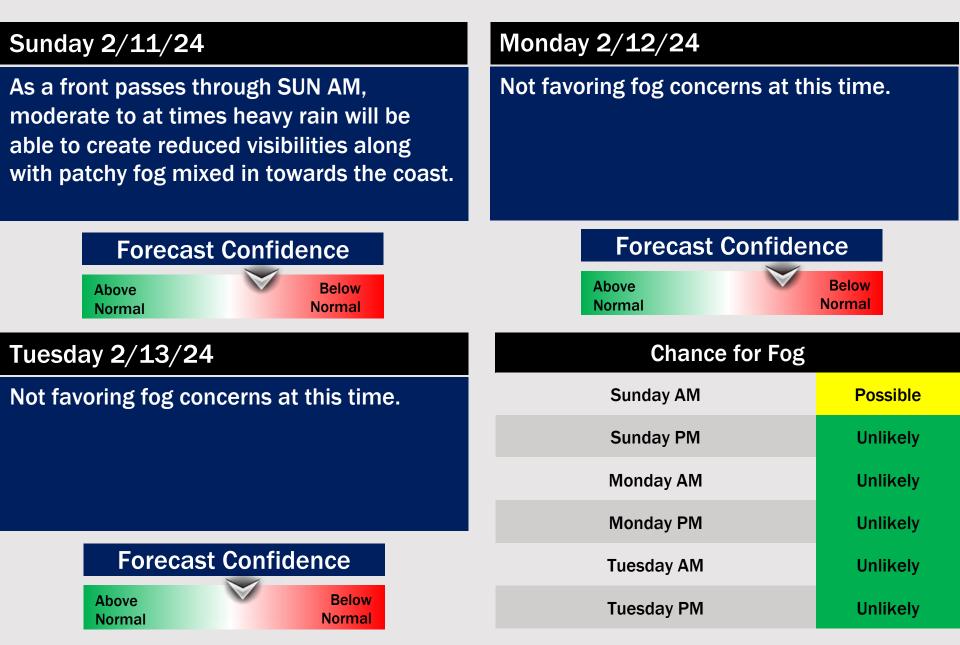

- North of Morgan's Point: Fog will be patchier in nature and likely will not work into the area until after 5AM CT. Reduced visibilities of less than 1 – 3 miles will be possible, with best localized risks of less than a mile to occur from 7AM - 9AM. The northward extent of sea fog for these stations remains the lowest confidence part of this report.
- > South of Morgan's Point: Due to consistent flow of winds from the SE settling in around / after 11PM, sea fog will start to work into the area, with visibilities of less than 1 mile to be possible almost immediately. Boarding station and 11/12 will have the best potential to see these risks initially, before fog fully extends across stations S of Morgan's point shortly after midnight. Lower confidence on end time for sea fog.

# Houston Pilots: Thu. 2/8/2024

#### **Forecast Discussion**

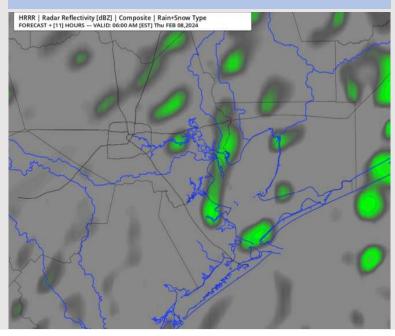

**Precip:** Favoring a few isolated pockets of drizzle through ~5 AM before light hit/miss activity works into the area through ~8 PM. Dry conditions favored for the remainder of the evening.

Wind: Winds out of the S will transition to out of the SE by 9 AM. N Morgan's Point: Winds decrease to 3-8 kts by 5 AM and remain there through 1 PM. Winds then increase to 9-14 kts through 8 PM before decreasing to 4-9 kts the rest of the day. S of Morgan's Point: Winds decrease to 9-14 kts by 6 AM and continue there the rest of the day. Gusts of up 18-23 kts will be possible through 5 AM-CT. Between 5 AM and 12 PM-CT gusts will calm. After 2 PM, gusts will again pick up towards 13 – 18 kts, then will increase to 18-23 kts after 8 PM.

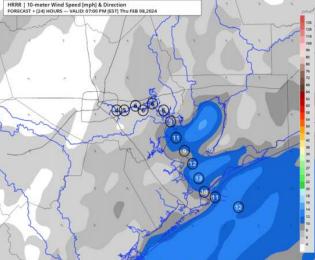

High Temps: N of Morgan's Point: Low to Mid 70s F S of Morgan's Point: Mid 60s F.

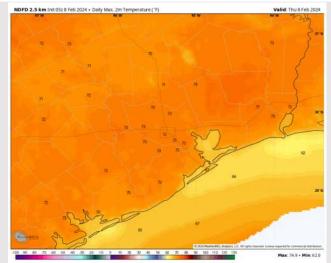

**Visibility:** Not anticipating any patchy fog concerns Thursday AM, however showers and misty conditions may lead to slightly reduced visibilities. For **11PM** and beyond, we will need to watch sea fog risks extending northwestward. See visibility graphic for additional information.

#### Precip Image: 5 AM CT

High Temps Today

# Houston Pilots: Fri. 2/9/2024

#### **Forecast Discussion**

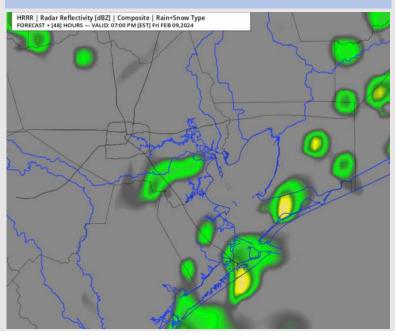

**Precip:** Favoring drizzle / light showers to begin to work into the region after 7AM and continue to be possible (40%) for the remainder of the day. Need to monitor for potential for light/moderate showers after 4PM.

Wind: Winds will remain out of the S / SE. N Morgan's Point: Winds to begin at 3 - 8 kts through 11AM before increasing to 7 – 11 kts for the rest of the day. S of Morgan's Point: Winds at 10 -15 kts for the entire day. Gusts of 20 – 25 MPH possible for all stations (greatest risk N of 51/52) during the AM hours through 4PM.

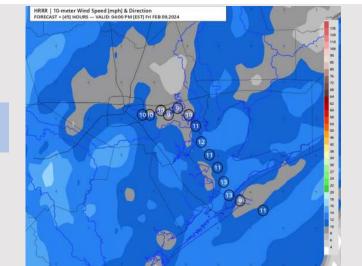

High Temps: N of Morgan's Point: Mid 70s F. S of Morgan's Point: Mid 60s.

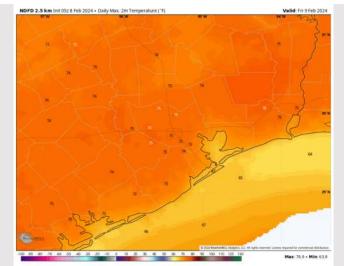

Visibility: Keeping an eye on at least patchy sea fog potential through 10AM-CT. Coverage may become widespread if drizzle / light rain coverage is more limited.

#### Precip Image: 6 PM CT

Wind Speed: 3 PM CT

High Temps Friday

# Houston Pilots: Sat. 2/10/2024

#### **Forecast Discussion**

5 AM CT

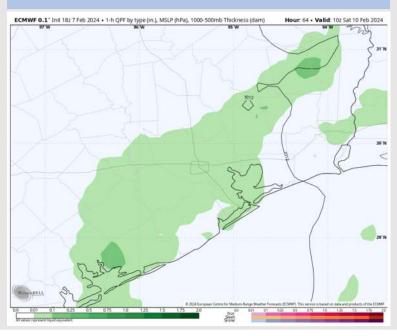

**Precip:** Light Rain risks will be ongoing during the morning hours (40%) with shower coverage gradually tapering off by 11AM.

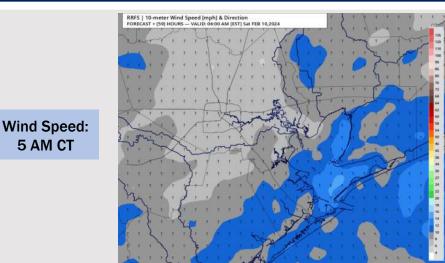

Wind: Winds will start out and remain southerly before becoming southwesterly after 8PM. N of Morgan's Point: Winds will start at 7 - 10 kts before increasing to 9 - 13 kts after 10AM. S of Morgan's Point: Winds will remain at 13 – 17 kts for the entire day. Gusts of 18 - 23 kts will be possible at all stations after 10AM.

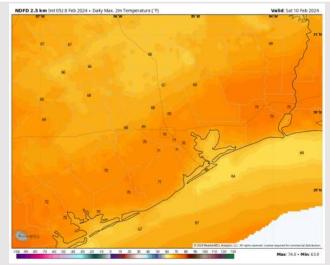

**High Temps:** N of Morgan's Point: Low 70 F. S of Morgan's Point: Mid 60s F

Visibility: Monitoring Patchy Sea Fog Risks for the AM Hours.

#### Precip Image: 4 AM CT

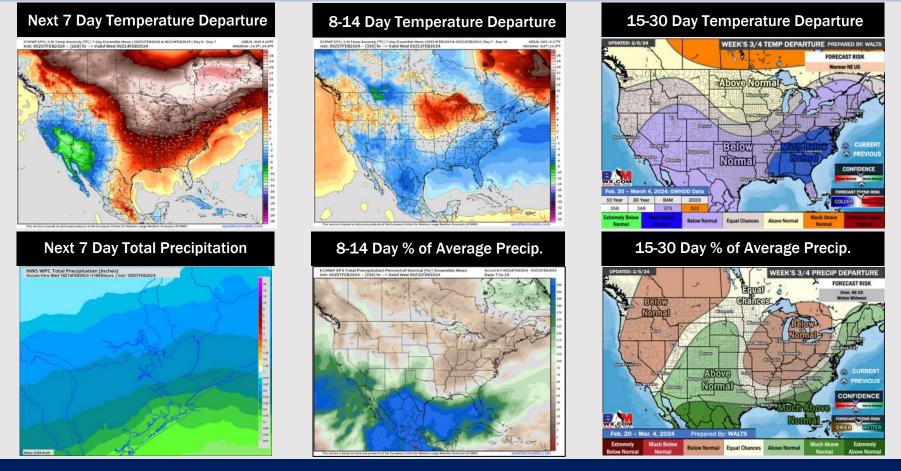

**High Temps** Saturday

### Houston Pilots: 2/8/24

- A weak front will try to press through starting on THU. Following this front will be a more active weekend. Above normal temperatures favored for the week ahead.
- Seasonable to slightly above normal precipitation chances are at play during the week 2 timeframe. Temps expected to be below normal.
- Below normal temperatures and much above normal chances for precipitation are favored in the weeks <sup>3</sup>/<sub>4</sub> timeframe.
