8:15 AM CT Weather Forecast

Hour by Hour Forecast:

Current Weather Alerts:

None/ All Clear

Temperatures:

- ✓ High Temperatures will reach the upper 30s F near 39 today.

Wind/Clouds:

- ✓ Winds gusts will consistently remain at 18 - 23 mph today with sustained winds from the NW at 11 - 16 mph. The winds in the app would be at risk of being slightly underdone
- ✓ Skies will be mostly cloudy to overcast throughout the day with greater than 70% cloud coverage.

FORECAST NOTES

Today's Precipitation Chances:

Isolated flurry chances will be at play for the entirety of the day. These chances will be low end, and if there is any portion of the day that features 'drier' time, it would be from 3 -7 PM. Isolated flurry chances return in the evening and will last through about 5 AM. Confidence is lower to see flurries in the evening as there is a risk that dry air wins out in the low levels and keeps the overnight dry.

Rain + Snow Totals:

QPF equivalent from snow showers will not exceed 0.01" only trace moisture is favored today. Snow showers are not favored to accumulate

Dew/Frost:

Frost formation is not likely tomorrow as RH values will be too dry in the 50% range

NEXT 5 DAYS: IMPORTANT FORECAST NOTES:

- ✓ **MON:** A few isolated flurry (5-10% chance) can try to linger through 11 AM tomorrow, but it is likely the air is too dry, and any flurry chances end sooner by sunrise.
- ✓ **TUE:** Currently favoring dry conditions for TUE.
- ✓ **WED:** Dry conditions continue into WED
- ✓ **THU:** Watching for a clipper-like system, mainly very late in the PM. Totals still look too high in here and any snow chance would not arrive until post 8 PM. Risk is for snow showers to be delayed further
- ✓ **FRI:** Potential for accumulating snow continues mainly into Friday AM. At this distance around 1-2" of snow is not out of question. The PM looks to dry out

Temperatures:

- ✓ Some 'ups and downs' in the cards with an overall average to slightly below normal temperatures
- ✓ Below normal temps through Monday --> Above normal On Tuesday with cooling temps into WED/THU

Wind/Clouds:

- ✓ Mostly cloudy conditions on Monday will yield clearing into the afternoon, leaving TUE/WED with sunnier days
- ✓ Not much of a threat for gusty winds in the days ahead. A dry cold front Tuesday can elevate winds in the 25 - 30 mph range in the PM. Outside of this window, wind gusts don't look overly excessive
