7:40 AM CT Weather Forecast

Hour by Hour Forecast:

FORECAST NOTES

Current Weather Alerts:

All Clear

Temperatures:

- ✓ High temperatures today will reach near the mid 40s F towards 43 F. The application is at risk of being too warm today with highs. Cloud cover can cause some underachievement
- ✓ Near steady temps follow into the overnight at low to mid 40s F.

Wind/Clouds:

- ✓ SE winds sustained at 10 - 15 mph with gusts to 18 - 23 mph. Gusts increase to 22 - 27 mph post 8 PM.
- ✓ Overcast to mostly cloudy skies favored for today with greater than 70% cloud cover. Safer to lean more towards the overcast idea than allowing for a few pockets of sunshine.

Today's Precipitation Chances:

Some isolated light drizzle is possible today from the 1 -4 PM timeframe with the lifting warm front. This is only a slight chance, and the risk is to remain dry

Rain + Snow Totals:

Any precip would be in the form of rain. Rainfall amounts would only be a trace if observed

Dew/Frost:

Due to abundant cloud cover overnight (>70%) combined with RH in the upper 60% to lower 70% range, dew formation will be very difficult to observe (not favored).

Rainfall Totals Through TUE

NEXT 5 DAYS: IMPORTANT FORECAST NOTES:

- ✓ **MON:** Isolated rain showers in the AM will see an increase in coverage by noontime into the early PM, Periods of moderate rain showers continue all PM and will become scattered/widespread by 4 PM
- ✓ **TUE:** Timing progression has slowed a touch overall. Waves of scattered rain with more wet time than dry will be featured in the AM. A few rumbles of thunder are possible near the noon timeframe. Rain chances would finally lift out near 6 PM.
- ✓ **WED:** Rain chances will have pushed off E of the Chicago area, however backside flurries cannot be ruled out behind this main system early in the AM Wednesday. The rest of the day favored to be dry.
- ✓ **THU:** Favoring dry conditions.
- ✓ **FRI:** Very low confidence at this distance, but a weak signal present with a warm front for a few drizzle opportunities.

Temperatures:

- ✓ Storm induced warmth to start the week with above normal temps through Tuesday
- ✓ Backside Canadian air sinks in on Wed, moderating temps into the mid 40s F
- ✓ As high pressure settles in Thu/Fri temps warm back into the low 50s F.

Wind/Clouds:

- ✓ Sunday through Tuesday AM will see consistently greater than 70% cloud cover with precipitation hanging around.
- ✓ Some partial clearing will occur Tue PM with Wed/Thu holding more sun than clouds. Friday can see some increasing clouds in the PM.
- ✓ Winds will become blustery starting late this PM with consistent gusts of 25 -35 mph. Blustery pattern persists through WED AM
- ✓ FRI-SAT will see near calm winds
