8:15 AM CT Weather Forecast

## Hour by Hour Forecast:

## Current Weather Alerts:

### Special Weather Statement (Wind Gusts)

### Temperatures:

- ✓ High temperatures today will reach near the mid 60s F at 65 F.
- ✓ Due to persistent cloud cover/continued shots of rain into the overnight, temperatures remain relatively steady with lows around 52 F into TUE AM.

### Wind/Clouds:

- ✓ Sustained S to SSE winds today will have ranges around 17 - 22 mph mainly during the 10 AM - 4 PM timeframe. Winds back off a touch at 13 - 18 mph thereafter.
- ✓ Gusts will be quite elevated today, at 30 - 40 mph starting at 10 AM. The evening from about 6 PM - 11 PM would be the lightest at 25 - 30 mph, but gusts then pick back up with rain chances to 35 - 45 mph
- ✓ Cloudy to overcast skies in store with greater than 90% cloud cover

## FORECAST NOTES

### Today's Precipitation Chances:

For the most part, favoring a dry day. Moisture will try to push in from the south, but most chances will stay to the W of CHI. Minor drizzle window can start from 10 AM through 3 PM today, and then the better opportunity for moderate to heavy rain enters towards 10 PM tonight. 10 PM - 4 AM would hold the best window for rain, with periods of rain continuing into the mid to late AM hours.

### Rain + Snow Totals:

Any precip throughout the afternoon today will not exceed 0.01" (app seeing well). The 10 PM - 4 AM window would need to watch for around 0.5 - 0.75" of rain. Continued scattered precipitation from the late AM TUE into the early afternoon can offer up an additional 0.25 - 0.5" for a total of around 1" to locally 1.25" out of the entire wave TUE PM.

### Dew/Frost:

N/A (rain will have surfaces wet)

## Rainfall Totals Through FRI

## NEXT 5 DAYS: IMPORTANT FORECAST NOTES:

- ✓ **TUE:** Better details on rain progression left on previous slide. Mainly from 4 AM - 2 PM slightly more wet time than dry time with periods of rain. Chances exit into the early to mid PM.
- ✓ **WED:** Still monitoring for a few backside flurries into WED AM. Confidence remains low, but chances are isolated at best near 10-20%. The late AM into PM will see rapid clearing with mostly sunny conditions.
- ✓ **THU:** Favoring dry conditions.
- ✓ **FRI:** Very low confidence at this distance, but a weak signal present with a warm front for a few drizzle opportunities in the AM
- ✓ **SAT:** Placement would need to be nailed down, but rain chances are at play for Saturday as a weak frontal boundary can open some flow for light, scattered precipitation.

### Temperatures:

- ✓ Storm induced warmth to start the week with above normal temps through Tomorrow
- ✓ Backside Canadian air sinks in on Wed, moderating temps into the mid 40s F for a short period
- ✓ As high pressure settles in Thu/Fri/Sat temps warm back into the low 50s F.

### Wind/Clouds:

- ✓ Through tomorrow early PM will see consistently greater than 80% cloud cover with precipitation hanging around.
- ✓ Some partial clearing will occur Tue PM with Wed/Thu holding more sun than clouds. Friday can see some increasing clouds in the PM.
- ✓ Winds remain elevated through early WED AM with frequent periods of gusts at 30 - 40 mph
- ✓ FRI-SAT will see near calm winds with higher pressure
