

Houston Pilots Forecast Package

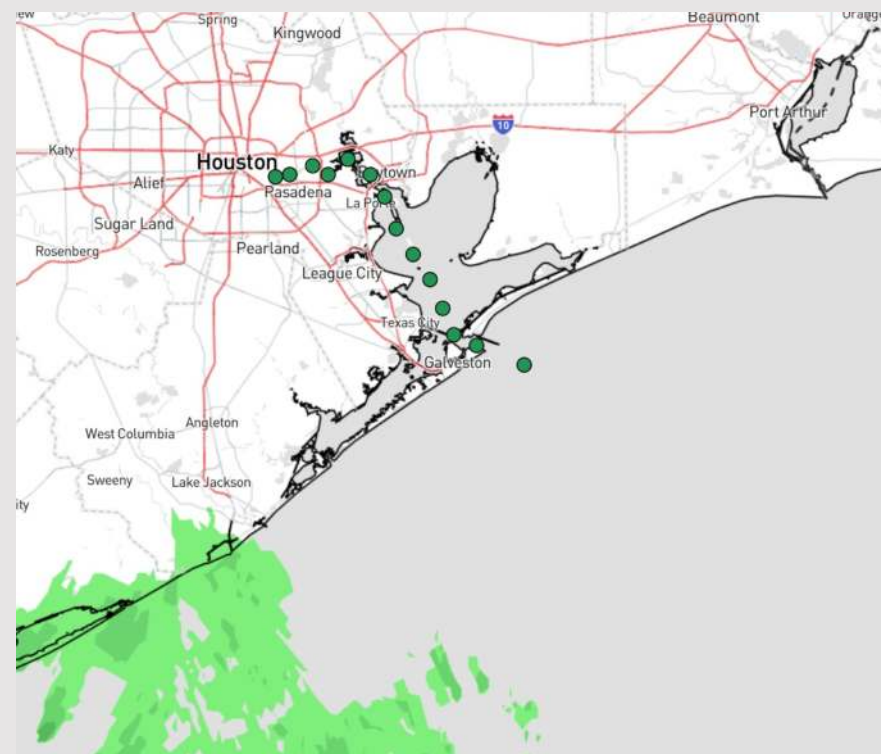

Updated: 2:00 AM CT

Wednesday, March 13, 2024

Forecaster: John Kemper

Weather Headlines

- Scattered Showers and Storm chances begin to gradually increase by Thursday PM and continue through Sunday.
- Winds will remain generally mild with non storm related gusts reaching up to 25 kts at times.
- Some low end, patchy fog risks possible for stations Wed AM. **See visibility slide, however risks will remain low end.**

Current Radar: 1:30 AM CT

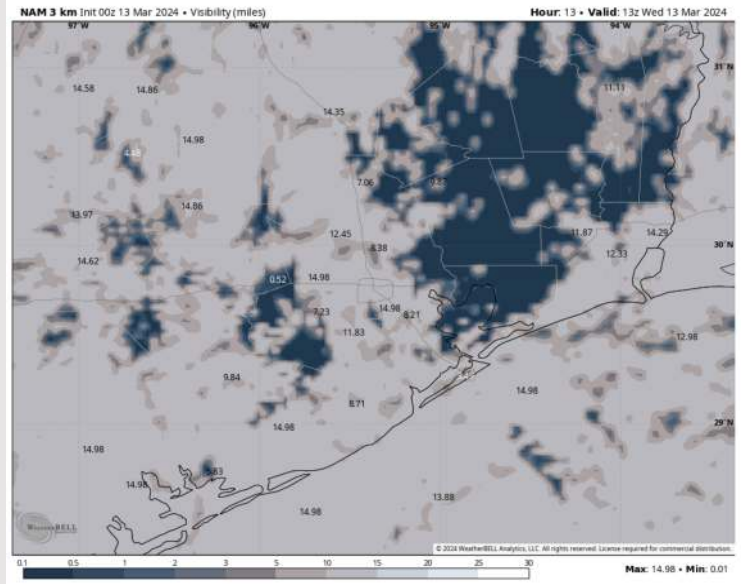

As always, please do not hesitate to reach out to us with any forecast questions via the chat option on Clarity or our on-call number, **(317)-560-8122** press 1 for forecast questions.

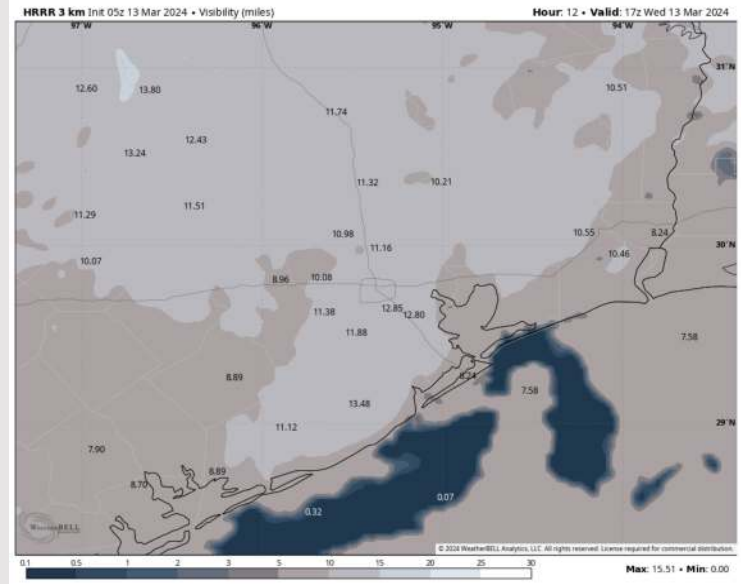

Houston Pilots Visibility Report

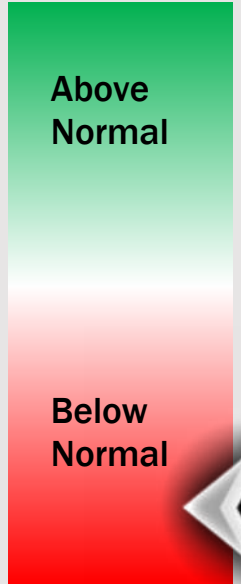

8 AM CT WED VISIBILITY

12 PM CT WED VISIBILITY

Confidence

TIMEFRAME DISCUSSED	THREAT
6AM – 4 PM WED	LOW

- Patchy fog risks can't be ruled out for all stations N of 11/12 from 6AM through 10AM. However, Confidence remains low on the coverage and reduction in visibilities. Reduced visibility of 2 – 4 miles will be possible.
- Beyond 10AM, favoring fog to no longer be a concern for Stations N of 11/12. Will need to watch for hazy conditions / perhaps some very patchy sea fog for 11/12 and the boarding station. This would be a risk from 12PM – 4PM. Confidence remains low, but very skeptical of this particular set up given winds / daytime event.
- Better risk for patchy sea fog will be in play beyond 9PM Wednesday, although drizzle potential / weaker winds will help to limit coverage.

Houston Pilots Extended Range Visibility Report

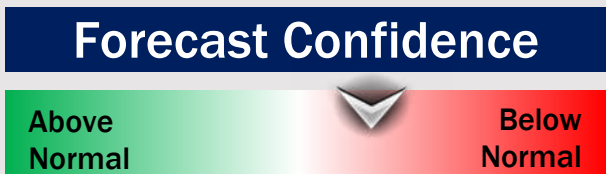

Saturday 3/16/24

Fog is not favored SAT however reduced visibilities will be possible under heavier downpours.

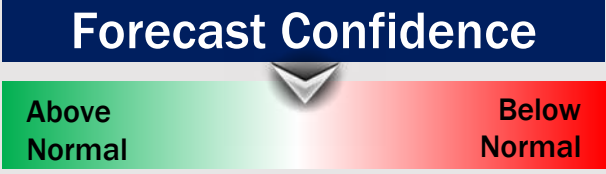

Monday 3/18/24

Fog is not favored for MON.

Sunday 3/17/24

Fog is not favored again for SUN, however heavier downpours may cause reduced visibilities once again.

Forecast Discussion

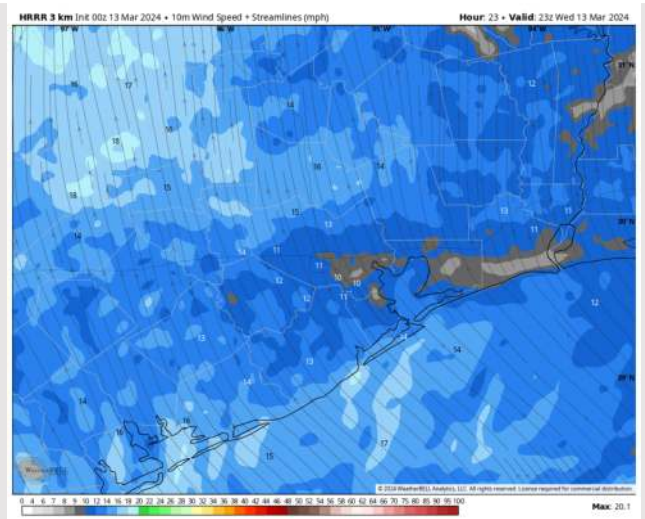

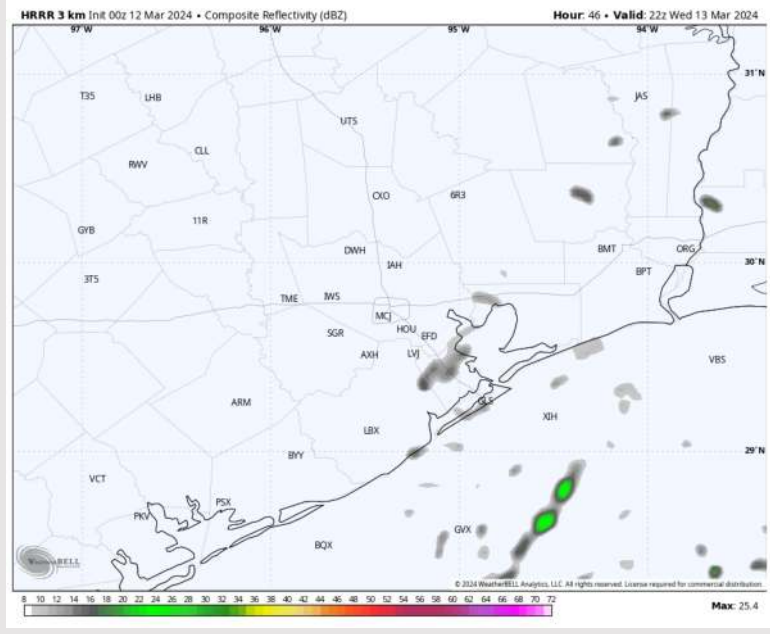

Precip: Isolated drizzle/light showers will be possible for much of the day, especially before 3PM. After 3PM, would anticipate drier conditions to fill in.

Wind: Winds out of the SE for the entire day. **N Morgan's Point:** Winds at 4-9 kts through 11 AM before increasing to 9-13 kts. **S of Morgan's Point:** Winds at 7-12 kts through 7 PM before increasing to 11-16 kts. **Wind gusts of 20-22 kts possible in the PM hours.**

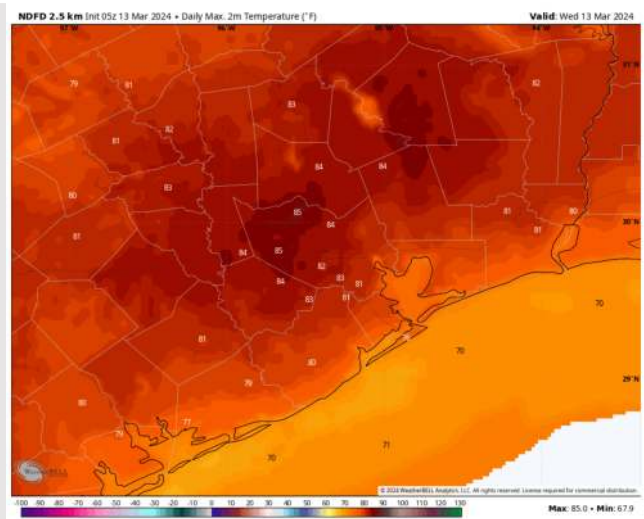

High Temps: **N of Morgan's Point:** High 70's / Low 80's F. **S of Morgan's Point:** Low 70s F.

Visibility: Another low-end risk of fog remains this AM into early PM before winds increase in the late PM hours. **See Visibility Slide for more details.**

Precip Image: 5 PM CT

Wind Speed:
6 PM CT

High Temps
Today

Houston Pilots: Thu. 3/14/2024

Forecast Discussion

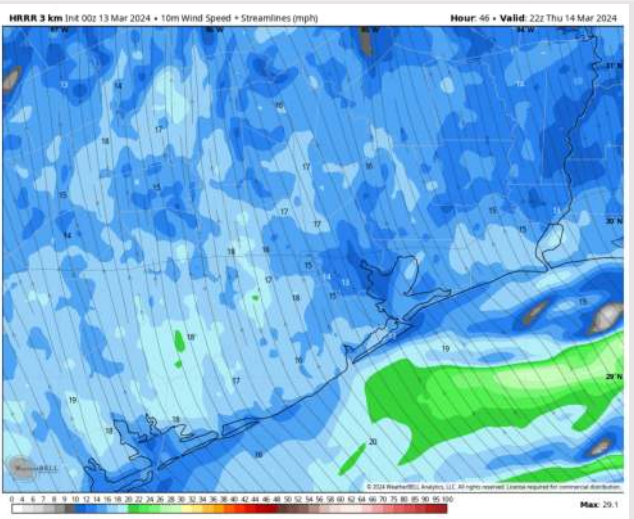

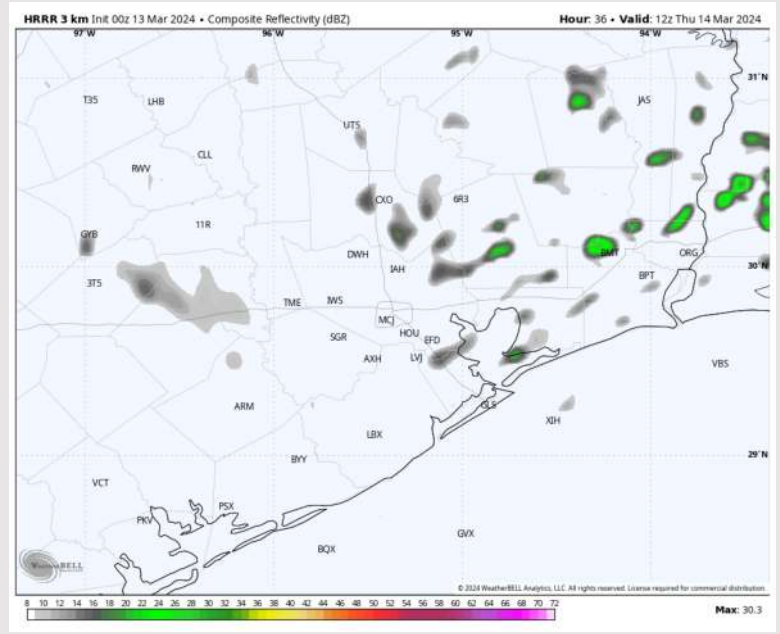

Precip: Isolated light showers will be possible after 2AM through ~ 10AM. Beyond 4PM, a few scattered showers / storms can't be ruled out.

Wind: Winds will be out of the SSE for the entire day. **N of Morgan's Point:** Winds at 6-11 kts through 10 AM before increasing to 15-20 kts. Winds remain at this clip through 8 PM before decreasing to 5-10 kts. **S of Morgan's Point:** Winds will be at 15-20 kts through 10 PM before decreasing to 12-17 kts. **Wind gusts of 25-35 kts will be possible from 10 AM to 10 PM.**

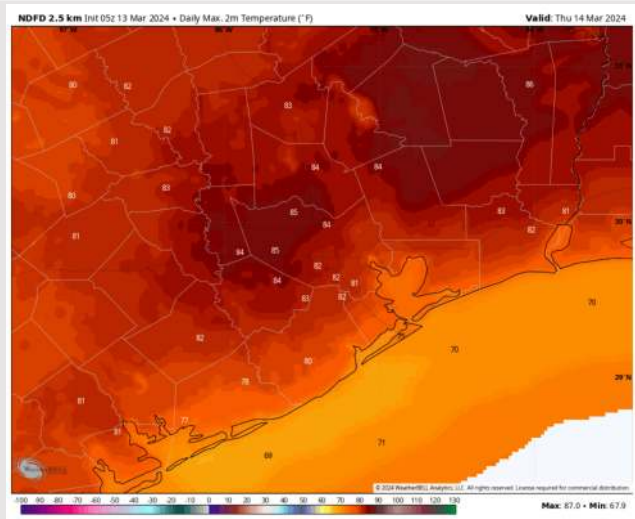

High Temps: **N of Morgan's Point:** Low 80s F. **S of Morgan's Point:** Low to Mid 70's F.

Visibility: Patchy Sea fog risks can't be ruled out, but presence of drizzle and higher winds will be mitigating factors.

Precip Image: 7 AM CT

Wind Speed:
5 PM CT

High Temps
Thursday

Houston Pilots: Fri. 3/15/2024

Forecast Discussion

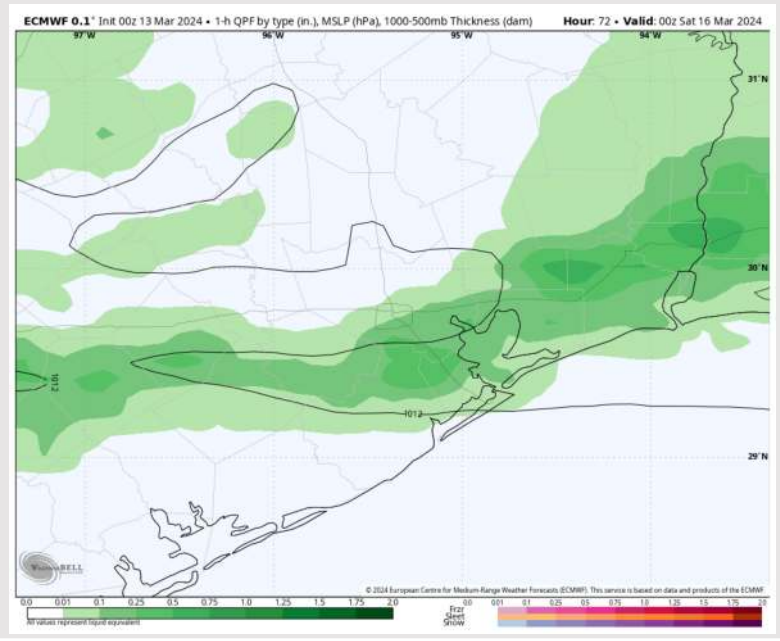

Precip: Showers and storms are favored to increase in coverage beyond 4PM, with a line of storms likely to impact all stations after 6PM. A few strong to severe storms will be in play with large hail and **damaging wind gusts of 40 - 50 kts.**

Wind: Winds out of the S / SSE throughout the day before veering out of the N immediately following the passage of front / storm line. **N Morgan's Point:** Winds at 7 - 13 kts through 10PM, then winds slightly decrease to 5 - 8 kts. **S of Morgan's Point:** 12 - 16 kts expected for the entire day. **Non-thunderstorm gusts of 18 - 23 kts cannot be ruled out throughout the PM prior to passage of front..**

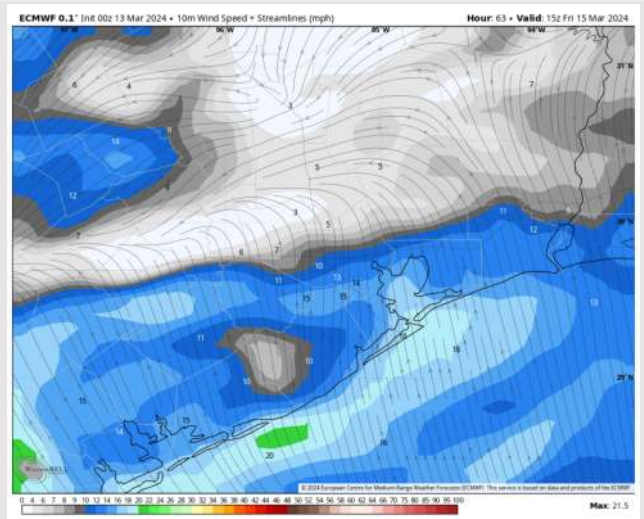

High Temps: **N of Morgan's Point:** Low 80s F. **S of Morgan's Point:** Low to Mid 70s F.

Visibility: Needing to watch timing of precip on FRI, but SE winds would allow for foggy setup behind rain chances. Heavier downpours can result in reduced visibilities as well.

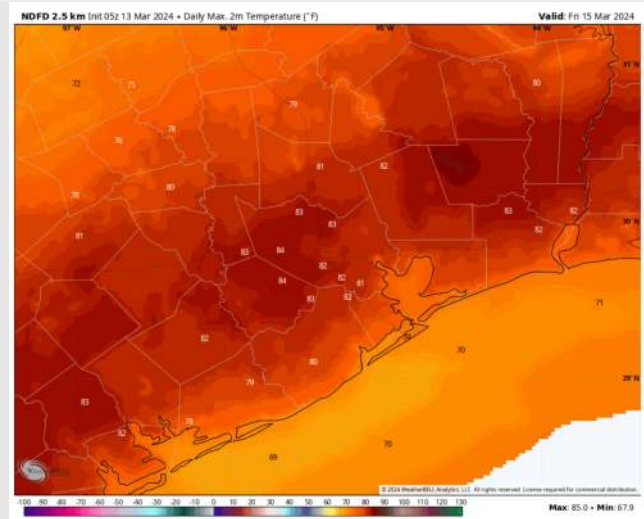

Precip Image: 7 PM CT

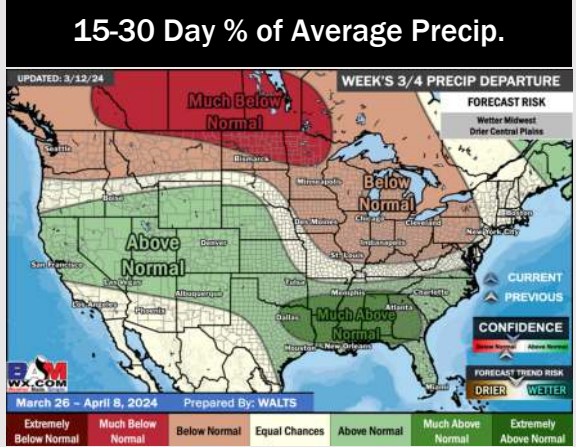

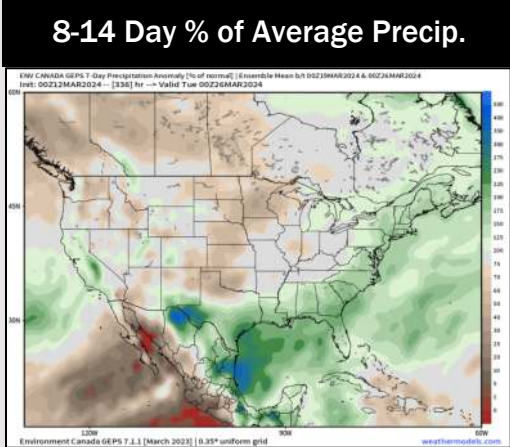

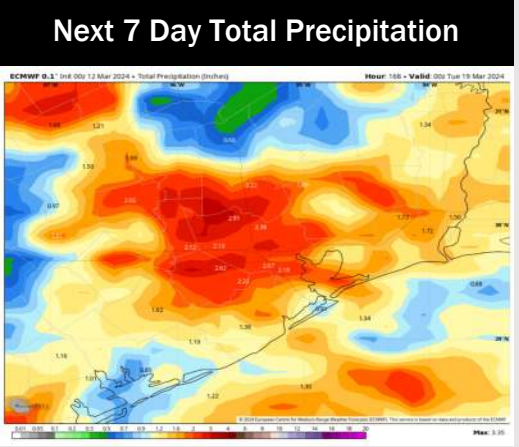

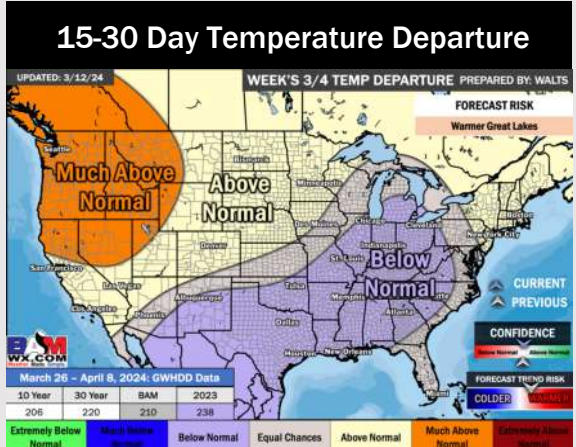

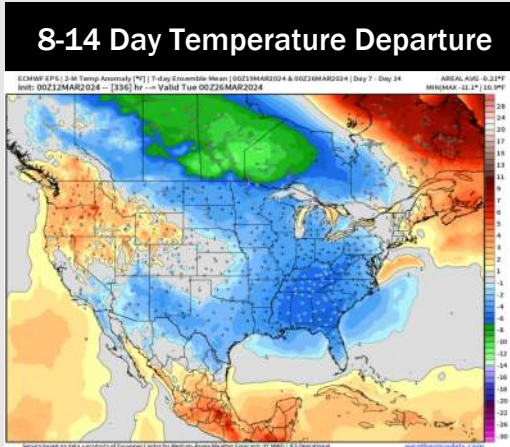

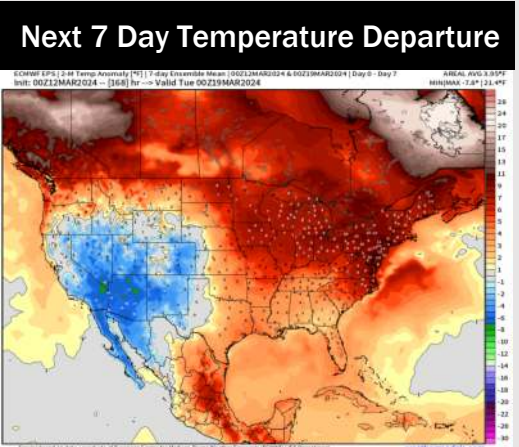

Wind Speed
10 AM CT

High Temps
Friday

Houston Pilots: 3/13/24

- Multiple shots of rain/ storms will be possible through the weekend and into next week. Temperatures expected to sit above normal.
- Slightly above normal precipitation chances are at play during the week 2 timeframe. Temps expected to be below normal.
- Below normal temperatures and above normal chances for precipitation are favored in the weeks 3/4 timeframe.
