7:30 AM CT Weather Forecast

Hour by Hour Forecast:

FORECAST NOTES

Current Weather Alerts:

All Clear

Temperatures:

- ✓ Anticipating high temperatures around the mid 60s F today towards 67 F
- ✓ Temperatures will bottom out in the upper 40s F WED AM

Wind/Clouds:

- ✓ Partly cloudy skies through about 10 AM. Skies become mostly cloudy into early PM with cloudy skies by 6 PM
- ✓ E winds at 10 - 15 mph shifting SE towards 6-7 PM with incoming storms
- ✓ Elevated gusts of 25 - 30 mph today outside of storms. Locally strong to severe storms can produce gusts of 45 - 55+ mph near 9 PM.

Today's Precipitation Chances:

Warm front with late AM precipitation chances remain quite unfavorable. Earliest possible light shower/t-storm activity can occur at 1 PM -4 PM at 20%, but overall, still favoring dry conditions. 5-7 PM chances uptick slightly to being more of hit/miss in nature. Best timing for strong to locally severe storms arrives near 9 PM through 11 PM.

Rain + Snow Totals:

Thunderstorms over the 9 - 11 PM timeframe would best pose a threat for around 0.50-0.75." Locally higher totals of 1.25" possible.

Dew/Frost:

Dew not favored to form from cloudy conditions. Surfaces will be wet from rain showers however

Rainfall Totals Through Thursday

NEXT 5 DAYS: IMPORTANT FORECAST NOTES:

- ✓ **WED:** Scattered showers/storms from Tuesday will exit near 2 AM, leaving a short dry window in the mid AM hours. Would need to watch near 7 - 10 AM for a secondary pulse of locally strong to severe storms with 0.25 - 0.5" potential. This is lower confidence to observe with a risk storms delay too long and setup to the east
- ✓ **THU:** low confidence with placement but would need to monitor a low passing to the S of the area. 10 AM - 10 PM best window to see hit/miss coverage.
- ✓ **FRI:** Low-end very isolated rain chances possible again; better opportunities will be to the south of the area. More likely than not to be a dry day.
- ✓ **SAT:** High confidence this day will be dry.
- ✓ **SUN:** Dry conditions continue for Sunday.

Temperatures:

- ✓ Temperatures will remain in the mid 60s range with a cool down into the low 50s F by the weekend
- ✓ Would need to watch near 4/20 to 4/21 for low-end frost potential

Wind/Clouds:

- ✓ More clouds than sun with sporadic rain chances WED/THU
- ✓ FRI: A mix of sun and clouds
- ✓ Would need to watch for locally stronger wind gusts of 45-55 mph (55+?) with thunderstorm activity late WED AM
- ✓ THU: Trending calmer with wind gusts with FRI PM gusts of 25 - 30 mph possible
- ✓ SAT: Partly cloudy conditions with 20 - 25 mph gusts
- ✓ SAT: Partly cloudy with mostly sunny skies for SUN.
