2:10 PM ET Weather Forecast

HOUR BY HOUR FORECAST:

Hazardous Weather Alerts:

Flood Advisory

IMPORTANT FORECAST NOTES (as of 2:10 PM ET, 4/5/24):

- ✓ Light, scattered showers will be the main theme for the afternoon hours. There will be slightly more dry time than wet, but chances are favored to remain consistent at 30% through 7 PM. After 7 PM chances will slowly start to decrease, with increasing intermittency between scattered showers. 9 PM to 11 PM will hold very isolated chances with precipitation ending near midnight. (risk is to be delayed a touch through 2 AM). Rainfall amounts across the afternoon will range from about 0.02" - 0.05" with totals not favored to exceed 0.08"
- ✓ High temperatures expected to top out in the mid 40's F today (near 43 F) with low temperatures late this evening dropping into the upper 30s F. Overnight lows will be in the mid 30s F near 36 F.
- ✓ Winds will be generally out of the NW rather consistently today. Gusts of 21 - 26 mph with sustained winds of 9 - 14 mph.

Dew Forecast

- ✓ Dew/frost formation not likely tomorrow AM, however surfaces can be damp from this evening's light moisture
