## Hour by Hour Forecast:

## Current Weather Alerts:

All Clear

### Temperatures:

- ✓ High temperatures today running above normal in the mid to upper 70s F.
- ✓ Lows bottom out in the mid 50s F tomorrow AM.

### Wind/Clouds:

- ✓ Any sun observed today will be across the AM hours as skies continue to cloud up with time into the PM with rain chances entering
- ✓ Winds sustained from the SW at 7 - 12 mph
- ✓ Once showers/storms enter gusts can reach into the 25 - 35 mph range, but not favoring severe storms

## FORECAST NOTES

### Today's Precipitation Chances:

Favoring dry conditions leading up through the early afternoon. Would need to watch between 3 -5 PM for scattered showers and storms to enter (start time is anywhere between 3-5 PM). From there 5 PM through 3 AM is the best window for pulses of light showers. From 3 AM - 3 PM tomorrow, this transitions to more of a drizzle/light shower threat intermittently

### Rain Totals:

This will be a messier setup with lower confidence overall on exact amounts. Ranges of 0.25 -0.75" favored, but the risk is to lean more on the upper end of this range.

### Dew/Frost:

Dew formation will not occur for tomorrow AM, surfaces remain wet from overnight rains
