7:40 AM CT Weather Forecast

Hour by Hour Forecast:

FORECAST NOTES

Current Weather Alerts:

All Clear

Temperatures:

- ✓ High temperatures today near steady in the upper 50s F
- ✓ Lows remain near steady as well near 52 F WED AM

Wind/Clouds:

- ✓ Overcast and gloomy conditions expected today. Sunshine is not favored
- ✓ Winds speeds will increase in the late AM, reaching sustained from the NNE at 13 - 18 mph by 1 PM and 18 - 24 mph by 8 PM
- ✓ Gusts of up to 30 - 35 mph are possible mainly after 3 PM through midnight

Today's Precipitation Chances:

Will be difficult today to see a period of prolonged dry time. The AM hours are filled with low end sporadic drizzle with slightly better coverage remaining to the NW of the area. Should there be a period where drizzle/light shower chances are most minimal, that is from 12 - 3 PM. After 3 PM we would need to watch from the SE for storms to press N into the area. Lower confidence to how far north coverage extends but this would last from 3 - 8 PM as best window. After 8 PM a return to sporadic drizzle is likely. Periods of intermittent drizzle continue through sunrise WED.

Rain Totals:

The accumulative totals from drizzle windows through sunrise outside of 3 - 8 PM this afternoon will be around 0.1." That 3 -8 PM window would pose the potential for localized 0.2 - 0.4"

Dew/Frost:

Dew formation will not occur for tomorrow AM, surfaces remain wet from drizzle threats

Rainfall Totals: Next 5 Days

NEXT 5 DAYS: IMPORTANT FORECAST NOTES:

- ✓ **WED:** Favoring dry conditions for Wednesday outside of AM drizzle chances extending as late as about 9 AM. PM isolated coverage looks to stay SE of the area
- ✓ **THU:** Scattered showers will work into the area THU late AM/early PM with exact timing still needing fine tuned risk is for this to come in PM and AM stays dry.
- ✓ **FRI:** Scattered showers to continue across the area FRI AM and early PM before exiting to the east. PM can slowly dry out with time, but isolated chances will remain
- ✓ **SAT:** Likely dry for vast portion of the day. Isolated low-end afternoon showers/storms possible. Best chance for a dry day in the short term out of all other rain chance days.
- ✓ **SUN:** AM Likely dry, watching for a cold front in the PM to bring rain chances

Temperatures:

- ✓ Below normal temps are short lived through WED behind today's rain system
- ✓ Gradual warmup follows THU-SUN with temperatures returning to above normal by SUN.
- ✓ AM Lows consistently in the 50s.

Clouds:

- ✓ WED: best day for sunshine in the PM. Some cloud cover can hang around in AM
- ✓ THU/FRI: Cloudy skies enter late Thu AM with a mix of sun and clouds and potential clearing, especially on FRI PM.
- ✓ SAT/SUN: Partly cloudy outside of rain chances

Winds:

- ✓ WED/THU: Nothing too excessive noted with the wind gusts (<20 mph gusts)
- ✓ FRI/SAT: A few storms can produce gusts to 35 mph but outside of this winds generally look to remain at 20 mph or less
- ✓ SUN: A day that can trend slightly breezier with 20 -30 mph gusts possible
